Appendix 7: A Sample Parents’ Guide to Special Education	H21
Appendix 8: Synopsis of Statutory Powers Procedure Act	H29
Appendix 9: Elements of an Agreement Between a Facility and a District School Board	H31
Appendix 10: Regulation 181/98 and Regulation 464/97	H33

PREFACE AND ACKNOWLEDGEMENTS

This publication replaces the *Special Education Information Handbook, 1984*. It reflects the many changes that have taken place in legislation, regulations, policy, and educational practice since publication of the earlier document.

The present document has benefited from the suggestions of a wide variety of organizations and individuals. The Ministry of Education is grateful to the Minister's Advisory Council on Special Education, to special education coordinators from across the province, and to a variety of associations for their advice, feedback, and significant contributions to the materials in this guide. The ministry also acknowledges the contribution of Alberta Education. Material from the binder *Programming for Students With Special Needs, Individualized Program Plans, 1995* is used by permission of Alberta Education, as represented by the Minister of Education and the Special Education Branch.

Material in this guide may be periodically superseded by new legislation or information, or as a result of evolving research and practice. The guide will be updated as required.

Readers may also read and download information from the Ministry of Education website at <http://www.edu.gov.on.ca>.

INTRODUCTION

The Ministry of Education in Ontario is committed to ensuring that all students have the knowledge, skills, and confidence they need to succeed in a rapidly changing society and that they are provided with the learning opportunities and supports they require. In order to do this, the ministry establishes legislation, regulations, and policies regarding the governance, funding, and delivery of education.

The context of special education and the provision of special education programs and services for exceptional pupils in Ontario are constantly evolving. Provisions included in the Canadian Charter of Rights and Freedoms and the Ontario Human Rights Code have driven some of these changes. Others have resulted from the evolution and sharing of best practices related to the teaching and assessment of exceptional pupils.

The provision of special education programs and services for the youth of this province rests within a legal framework. The Education Act and the regulations related to it set out the legal responsibilities pertaining to special education. They provide comprehensive procedures for the identification of exceptional pupils, for the placement of those pupils in educational settings where the special education programs and services appropriate to their needs can be delivered, and for the review of the identification of exceptional pupils and their placement.

To assist school boards and schools in delivering educational programs to exceptional pupils in accordance with its policies, the ministry has prepared this revised and updated version of its guide to special education. The guide provides comprehensive information about legislation, regulations, policies, program planning, and resources pertaining to the education of exceptional pupils in Ontario. It is intended primarily for the use of administrators, special education professionals, teachers, and special education advisory committees (SEACs). Parents¹ of special needs students may also find this document useful.

The guide is divided into the following eight sections:

“Part A. Legislation and Policy” describes the legislative and policy framework for special education programs and services.

“Part B. Funding for Special Education” describes funding for special education.

“Part C. Program Planning” describes a process of problem solving that focuses on the needs of the student, on programming, and on referral for identification.

1. Hereafter, throughout this document, *parent* or *parents* is used to refer to both parent(s) and guardian(s).

“Part D. The Identification, Placement, and Review Process”

describes the IPRC and appeals processes as set out in Regulation 181/98.

“Part E. The Individual Education Plan (IEP)” provides a guide to the development of an IEP.

“Part F. Programs and Services” describes specialized programs and services that are available to assist school boards and schools in meeting the needs of the exceptional pupil.

“Part G. Related Ministries: Roles and Resources” provides information about the roles and resources of related ministries.

“Part H. Appendices” includes copies of policies related to special education as well as support materials.

This guide will be updated as needed. For that reason, it is in loose-leaf format with replacements or additional sections to be released as new legislation or policies are issued.

LEGISLATION AND POLICY MEMORANDA PERTAINING TO SPECIAL EDUCATION

The Education Act

The Education Act¹ and the regulations made under it constitute the core of the legislation governing the operation of schools and school boards² in Ontario. Subsection 8(3) of the Act requires the Minister of Education to ensure that appropriate special education programs and special education services are provided in accordance with the Act and regulations.

It states that:

The Minister shall ensure that all exceptional children in Ontario have available to them, in accordance with this Act and the regulations, appropriate special education programs and special education services without payment of fees by parents or guardians resident in Ontario, and shall provide for the parents or guardians to appeal the appropriateness of the special education placement. . . .

The current legal framework for the education of exceptional pupils originated with the Education Amendment Act, 1980 (frequently referred to as Bill 82), which made it mandatory for all school boards to provide, or purchase from another school board, special education programs and services for their exceptional pupils. This requirement is now found in paragraph 170(1)7 of the Education Act, which states that:

Every board shall . . . provide or enter into an agreement with another board to provide in accordance with the regulations special education programs and special education services for its exceptional pupils.

Subsection 1(1) of the Education Act includes the following definitions of *exceptional pupil*, *special education program*, and *special education services*.

An **exceptional pupil** is defined as:

a pupil whose behavioural, communicational, intellectual, physical or multiple exceptionalities are such that he or she is considered to need placement in a special education program by a committee, established under subparagraph iii of paragraph 5 of subsection 11 (1), of the board,

- (a) of which the pupil is a resident pupil,
- (b) that admits or enrolls the pupil other than pursuant to an agreement with another board for the provision of education, or
- (c) to which the cost of education in respect of the pupil is payable by the Minister.

1. The Education Act, R.S.O. 1990, C.E.2, as amended, referred to hereafter as the Education Act, or the Act.

2. The terms *school board* and *board* are used in this document to refer to district school boards and school authorities.

A **special education program** is defined as:

in respect of an exceptional pupil, an educational program that is based on and modified by the results of continuous assessment and evaluation and that includes a plan containing specific objectives and an outline of educational services that meets the needs of the exceptional pupil.

Special education services are defined as:

facilities and resources, including support personnel and equipment, necessary for developing and implementing a special education program.

Regulations

A number of regulations made under the Education Act contain specific references to the education of exceptional pupils. The content of these regulations is quoted at appropriate points throughout this guide. The following table provides an overview only.

Regulation	Name of Regulation
296	Ontario Schools for the Blind and the Deaf This regulation relates to the operation of the Ontario Schools for the Blind and the Deaf.
298	Operation of Schools – General <i>Subsection 3(3)</i> permits a reduction in the length of the instructional program for exceptional pupils below the required 5 hours per day. <i>Section 11</i> sets out the duties of principals, in addition to those in the Act. <i>Section 19</i> sets out qualifications teachers must hold to be placed in charge of or to teach in a special education program. <i>Section 26</i> sets out the relationship between principals and professional support staff, including psychiatrists, psychologists, and social workers. <i>Section 30</i> provides for special education programs for pre-school children who are deaf or hard of hearing. <i>Section 31</i> sets out maximum enrolment for special education classes.

Regulation	Name of Regulation
181/98	<p>Identification and Placement of Exceptional Pupils The provisions of this regulation are described in detail in the following sections of this guide:</p> <ul style="list-style-type: none"> - Part D: The Identification, Placement, and Review Process - Part E: The Individual Education Plan (IEP) <p>The regulation is reproduced in full in Appendix 10.</p> <p>For more information on categories and definitions of exceptionality, see page A18 of this guide.</p>
137/01	<p>Amending Ontario Regulation 181/98. See note on page H34 in Appendix 10.</p>
306	<p>Special Education Programs and Services This regulation requires each school board to maintain a special education plan for the delivery of special education programs and services.</p>
464/97	<p>Special Education Advisory Committees This regulation governs the appointment to and operation of Special Education Advisory Committees (SEACs).</p> <p>The regulation is reproduced in full in Appendix 10.</p>

Policy/Program Memoranda

Policy/program memoranda (PPMs) are official numbered memoranda issued by the Ministry of Education and directed to school boards and schools. These memoranda are statements of ministry policy and often include information about the Education Act and regulations made under the act. The PPMs listed below contain information about the education of exceptional pupils. These memoranda are referred to in various locations in this guide.

Policy/Program Memorandum Number	Policy/Program Memorandum Title and Date of Issue
1	Ontario Schools for the Blind and Deaf as Resource Centres. April 2, 1986
8	Learning Disabilities. Revised 1982
11	Early Identification of Children's Learning Needs. Revised 1982
59	Psychological Testing and Assessment of Pupils. October 11, 1982
76C	Alternative Educational Programs and Services for Deaf, Blind, and Deaf-Blind Exceptional Pupils. October 4, 1991

Policy/Program Memorandum Number	Policy/Program Memorandum Title and Date of Issue
81*	Provision of Health Support Services in School Settings. July 19, 1984
85	Educational Programs for Pupils in Government-Approved Care and/or Treatment Facilities. January 20, 1986
89	The Residential Demonstration Schools for Students With Learning Disabilities: General Information and Details of the Referral Process. February 6, 1990
127	Provincial Secondary School Literacy Test in English-Language Secondary Schools – Accommodations, Deferrals, and Exemptions. September 15, 2000

* This PPM is supported by the *Interministerial Guidelines for the Provision of Speech and Language Services*, September 1988, and by the August 14, 1989, assistant deputy minister's memorandum clarifying interministerial responsibility regarding suctioning and catheterization.

ROLES AND RESPONSIBILITIES IN SPECIAL EDUCATION

Clearly defined roles and responsibilities are an essential part of delivering special education programs and services. The roles and responsibilities within special education are outlined below.

The Ministry of Education

The Ministry of Education:

- sets out, through the Education Act, regulations, and policy documents, including policy/program memoranda, the legal obligations of school boards regarding the provision of special education programs and services;
- prescribes the categories and definitions of exceptionality;
- requires that school boards provide appropriate special education programs and services for their exceptional pupils;
- establishes the funding for special education through the structure of the funding model. The model consists of the Foundation Grant, the Special Education Grant, and other special purpose grants;
- requires school boards to report on their expenditures for special education;
- sets province-wide standards for curriculum and reporting of achievement;
- requires school boards to maintain special education plans, review them annually, and submit amendments to the ministry;
- requires school boards to establish Special Education Advisory Committees (SEACs);
- establishes Special Education Tribunals to hear disputes between parents and school boards regarding the identification and placement of exceptional pupils;
- establishes a provincial Advisory Council on Special Education to advise the Minister of Education on matters related to special education programs and services;
- operates Provincial and Demonstration Schools for students who are deaf, blind, or deaf-blind, or who have severe learning disabilities.

The District School Board or School Authority

The district school board or school authority:

- establishes school board policy and practices that comply with the Education Act, regulations, and policy documents, including policy/program memoranda;

- monitors school compliance with the Education Act, regulations, and policy documents, including policy/program memoranda;
- requires staff to comply with the Education Act, regulations, and policy documents, including policy/ program memoranda;
- provides appropriately qualified staff to provide programs and services for the exceptional pupils of the board;
- reports on the expenditures for special education;
- develops and maintains a special education plan that is amended from time to time to meet the current needs of the exceptional pupils of the board;
- reviews the plan annually and submits amendments to the Minister of Education;
- provides statistical reports to the ministry as required;
- prepares a parent guide to provide parents with information about special education programs, services, and procedures;
- establishes one or more IPRCs to identify exceptional pupils and determine appropriate placements for them;
- establishes a Special Education Advisory Committee;
- provides professional development to staff on special education.

The Special Education Advisory Committee

The Special Education Advisory Committee:

- makes recommendations to the board with respect to any matter affecting the establishment, development, and delivery of special education programs and services for exceptional pupils of the board;
- participates in the board's annual review of its special education plan;
- participates in the board's annual budget process as it relates to special education;
- reviews the financial statements of the board as they relate to special education;
- provides information to parents, as requested.

The School Principal

The school principal:

- carries out duties as outlined in the Education Act, regulations, and policy documents, including policy/program memoranda, and through board policies;
- communicates Ministry of Education and school board expectations to staff;
- ensures that appropriately qualified staff are assigned to teach special education classes;

- communicates board policies and procedures about special education to staff, students, and parents;
- ensures that the identification and placement of exceptional pupils, through an IPRC, is done according to the procedures outlined in the Education Act, regulations, and board policies;
- consults with school board staff to determine the most appropriate program for exceptional pupils;
- ensures the development, implementation, and review of a student's Individual Education Plan (IEP), including a transition plan, according to provincial requirements;
- ensures that parents are consulted in the development of their child's IEP and that they are provided with a copy of the IEP;
- ensures the delivery of the program as set out in the IEP;
- ensures that appropriate assessments are requested and that, if necessary, consent is obtained.

The Teacher

The teacher:

- carries out duties as outlined in the Education Act, regulations, and policy documents, including policy/program memoranda;
- follows board policies and procedures regarding special education;
- works with the special education teacher to acquire and maintain up-to-date knowledge of special education practices;
- where appropriate, works with special education staff and parents to develop the IEP for an exceptional pupil;
- provides the program for the exceptional pupil in the regular class, as outlined in the IEP;
- communicates the student's progress to parents;
- works with other school board staff to review and update the student's IEP.

The Special Education Teacher

The special education teacher, in addition to the responsibilities listed above under "The Teacher":

- holds qualifications, in accordance with the regulations under the Education Act, to teach special education;
- monitors the student's progress with reference to the IEP and modifies the program as necessary;
- assists in providing educational assessments for exceptional pupils.

The Parent/Guardian

The parent/guardian:

- becomes familiar with and informed about board policies and procedures in areas that affect the child;
- participates in IPRCs, parent-teacher conferences, and other relevant school activities;
- participates in the development of the IEP;
- becomes acquainted with the school staff working with the student;
- supports the student at home;
- works with the school principal and teachers to solve problems;
- is responsible for the student's attendance at school.

The Student

The student:

- complies with the requirements as outlined in the Education Act, regulations, and policy documents, including policy/program memoranda;
- complies with board policies and procedures;
- participates in IPRCs, parent-teacher conferences, and other activities, as appropriate.

REQUIREMENTS OF SCHOOL BOARDS UNDER THE EDUCATION ACT

Under the Education Act and its regulations, school boards are required to do the following.

Enrol All Pupils Who Have the Right to Attend

The general rules governing the right to attend school are briefly outlined below.

A person who is qualified to be a resident pupil of a board has the right to attend a school of the board. At the elementary level, to be qualified to be a resident pupil of the board, the person and the person's parent or guardian must live within the area of jurisdiction of the board (section 33). In order to have the right to attend school at a separate school board or at a French language school board, a person must reside within the area of the board where the person's parent is a school supporter. In order to support a Roman Catholic board, the parent must be Roman Catholic;* in order to support a French-language district school board, the parent must be a French-language rights holder.* However, there is no obligation on Roman Catholics or French-language rights holders to support their respective boards: these parents may send their children to the public or English-language board, as the case may be. Once the pupil is enrolled in school, he or she becomes a resident pupil of the board (subsections 33[6] and 36[5]). A person is qualified to be a resident pupil of a board for elementary school purposes from the ages specified in the Education Act (sections 33 and 34) until the age of 21.

At the secondary level, to be qualified to be a resident pupil of a board, the person and the person's parent must live within the area of jurisdiction of the board; or the person must reside in the secondary school district and be the owner or tenant of residential property in the area that is separately assessed; or the person must be at least 18 years old and have lived in the area for at least a year (section 36). The rules outlined in the preceding paragraph with respect to school support at the elementary level apply at the secondary level as well (section 36). In addition to these rules, there is "open access" at the secondary level between public and separate boards that operate in the same area (section 42). "Open access" means that a person who is qualified to attend a secondary school of a public board is also eligible to attend a secondary school of a separate board that operates wholly or partly in the same area, and vice versa. To attend a school of a French-language board, the pupil must be the child of a French-language rights holder.

These are the general rules regarding enrolment rights. For circumstances not covered by these rules, the student and/or the student's parent or guardian are advised to check with the superintendent of the board that the student wishes to attend.

* *Note:* Asterisked terms are defined in section 1 of the Education Act.

In order to be admitted to secondary school, the person must be promoted to secondary school or the secondary school principal must be satisfied that the person is capable of doing the work of the secondary school (section 41).

School boards have the legal ability to direct secondary day school students to continuing education programs under certain circumstances (section 49.2). Students may be directed to a continuing education course or class operated by a board if:

- they have already attended secondary school for 7 or more years;
- they have been out of school for 4 years since the age of 16;
- they are funded at the continuing education level of grant (because they will have turned or will be turning 21 by December 31 of that year).

The appropriate school board supervisory officer should be contacted for answers to specific questions about whether a particular child has the right to attend a certain board or school.

Note: The fact that a person has the right to attend school within a particular school board jurisdiction does not mean that the person can attend whichever school he or she wishes. School boards may have attendance areas, and permission is required from the board (paragraph 171[1]7) for a person to attend school outside of his or her attendance area.

Implement Procedures for Early and Ongoing Identification (Education Act, Clause 8[3][a])

School boards are required to implement procedures for early and ongoing identification of the learning abilities and needs of students, as detailed in Policy/Program Memorandum No. 11.

Provide Special Education Programs and Services

Under paragraph 170(1)7 of the Education Act, each board is required to “provide or enter into an agreement with another board to provide in accordance with the regulations special education programs and special education services for its exceptional pupils”.

Provide a Mechanism for Appeal

Regulation 181/98, dealing with the identification and placement of exceptional pupils, provides a mechanism for parents to appeal the identification and placement decisions of an Identification, Placement and Review Committee (IPRC) to an appeal board.

Under the regulation a parent may request an appeal of an IPRC decision to a school board appeal board. It is up to the school board to administer the procedures related to the holding of the appeal board meeting. Part D of this guide contains a detailed discussion of these procedures.

Establish a Special Education Advisory Committee (Education Act, Section 57.1)

Under the Education Act, every district school board must establish a Special Education Advisory Committee (SEAC). In addition, the Lieutenant-Governor-in-Council has the authority to make regulations:

- requiring that school authorities establish SEACs;
- governing:
 - the establishment and composition of SEACs;
 - practices and procedures relating to SEACs;
 - the powers and duties of SEACs;
 - the duties of district school boards or school authorities in relation to SEACs.

This authority is exercised under Regulation 464/97. (For further information, refer to pages A27-28.)

REQUIREMENTS OF SCHOOL BOARDS UNDER THE REGULATIONS

One of the purposes of a school board's special education plan is to inform the Ministry of Education and the public about special education programs and services that are provided by the board in accordance with legislation and ministry policy on special education.

Under the regulations, school boards are required to do the following.

Establish Special Education Plans

Regulation 306 requires that all school boards establish and maintain special education plans. In its special education plan each board is required to outline how it intends to meet the needs of its exceptional pupils. The board must maintain the plan and ensure that it is amended from time to time "to meet the current needs of the exceptional pupils of the board".

Individual students are not identified in the plan, but the system-wide method of providing programs and services is set out.

Each school board must:

- review the plan once a year and send any amendments of the plan to the minister;
- every two years, prepare and approve a report on the special education programs and services it provides;
- have its Special Education Advisory Committee (SEAC) participate in the annual review of board plans (see pages A27–28 for further information about SEACs).

Traditionally, the ministry has sent instructions to boards in the winter about how to submit their amendments/reports and what type of information to include. The reports and amendments must be submitted by July 31 of every year. The minister has the right to require a board to amend its plan in a manner that the minister considers necessary "so as to ensure that the board provides special education programs and special education services that meet the current needs of the exceptional pupils of the board".

School board special education plans should be available at the school board office (or at individual schools) for parents to see. The ministry has issued a policy document, *Standards for School Boards' Special Education Plans, 2000*, which describes the new province-wide standards that school boards must meet when developing their special education plans.

Provide for a Shortened School Day

Regulation 298, subsection 3(3), permits a school board to shorten the length of the instructional program on each school day to less than 5 hours for an exceptional pupil in a special education program. A board should not use this section for its own benefit, for example, because of a shortage of staff. This subsection applies in situations where it is for the benefit of the child that the instructional program be shortened. This might occur, for example, if the exceptional pupil does not have sufficient stamina to attend for a full school day, or is medically unable to attend for the full day.

Employ Teachers With Appropriate Qualifications

According to Regulation 298, subsection 19(14), no teacher shall be placed in charge of special education or be assigned or appointed to teach in a special education class, in a class for deaf, hard-of-hearing, blind, or low-vision students, or as a resource or withdrawal teacher in special education programs unless the teacher's Certificate of Qualifications indicates qualifications in special education.

Follow Maximum Enrolments Set Out for Self-Contained Classes

According to Regulation 298, section 31, the maximum class sizes for special education classes for various types of exceptional pupils are as follows:

- 8 in a class for pupils who are emotionally disturbed or socially maladjusted (behaviour),* have severe learning disabilities, or are below compulsory school age and have impaired hearing (who are deaf or hard-of-hearing);*
- 10 in a class for pupils who are blind, deaf, trainable retarded (have developmental disabilities),* or have speech and language disorders;
- 12 in a class for pupils who are hard-of-hearing, have low vision,* or have orthopaedic or other physical disabilities;*
- 12 in a class for pupils in the Primary Division who are educable retarded (mildly intellectually disabled);* and 16 in a class for pupils in the Junior and Intermediate Divisions who are educable retarded (mildly intellectually disabled);*
- 25 in a class for elementary pupils who are gifted;*
- 6 in a class for aphasic or autistic* pupils, or for pupils with multiple disabilities* for whom no one disability is dominant;
- 16 in a class for exceptional pupils consisting of pupils with different exceptionalities.

* *Note:* The asterisked terms have been clarified in a memo to school boards, dated January 15, 1999, regarding the categories and definitions of exceptionality. (See pages A18-20.)

Establish Identification, Placement and Review Committees (IPRCs)

An IPRC is composed of at least three persons, one of whom must be a principal or supervisory officer of the board. The process for school boards to follow when identifying and placing exceptional pupils is set out in Regulation 181/98. A detailed discussion of the process is provided in Part D of this guide. The regulation deals with the following matters:

- the referral to an IPRC
- the setting up of an IPRC meeting
- the composition of the IPRC
- the material presented to an IPRC
- the role of parents/students at an IPRC
- IPRC decision-making power
- follow-up IPRC meetings
- Individual Education Plans and transition plans
- IPRC reviews
- the appeal of an IPRC decision
- the composition and powers of an appeal board
- the Parents' Guide

Provide Individual Education Plans (IEPs) for Pupils Identified as Exceptional

An Individual Education Plan (IEP) is a written plan. It is a working document that describes the strengths and needs of an individual exceptional student or of a student with special needs, the special education program and services established to meet a student's needs, and sets out how the program and services will be delivered. It also describes the student's progress.

In Regulation 181/98, "Identification and Placement of Exceptional Pupils", sections 6 and 7 set out the requirements for creating and reviewing an IEP for any student identified as exceptional. The regulation states that principals are required to ensure that an IEP is developed for each student who has been identified as exceptional by an IPRC within 30 school days³ of the student's placement in a special education program.

The IEP must include:

- specific educational expectations for the student;
- an outline of the special education program and services to be received by the student;
- a statement of the methods by which the student's progress will be reviewed;

3. As amended by Ontario Regulation 137/01. See note on page H34 in Appendix 10.

- for students 14 years of age or older, a plan for transition to appropriate postsecondary school activities, such as work, further education, and community living, unless the student is identified as exceptional solely on the basis of giftedness.

In developing the IEP, the principal shall:

- consult with the parent and, where the student is 16 years of age or older, the student;
- take into consideration any recommendations made by the IPRC or the Special Education Tribunal, as the case may be, regarding special education programs or special education services;
- when developing the transition plan, consult with such community agencies and postsecondary educational institutions as he or she considers appropriate.

The principal shall ensure that the IEP for a student is included in the student's Ontario Student Record (OSR), unless a parent has objected in writing to its inclusion.

Standards for the IEP are outlined by the Ministry of Education in a document entitled *Individual Education Plans: Standards for Development, Program Planning, and Implementation, 2000*.

A detailed discussion of the IEP is provided in Part E of this guide.

CATEGORIES AND DEFINITIONS OF EXCEPTIONALITIES

The following five categories of exceptionalities have been identified in the Education Act definition of *exceptional pupil*:

- behaviour
- communication
- intellectual
- physical
- multiple

These broad categories include the following definitions, as clarified in the memo to school boards of January 15, 1999:

Behaviour

A learning disorder characterized by specific behaviour problems over such a period of time, and to such a marked degree, and of such a nature, as to adversely affect educational performance, and that may be accompanied by one or more of the following:

- a) an inability to build or to maintain interpersonal relationships;
- b) excessive fears or anxieties;
- c) a tendency to compulsive reaction;
- d) an inability to learn that cannot be traced to intellectual, sensory, or other health factors, or any combination thereof.

Communication

Autism

A severe learning disorder that is characterized by:

- a) disturbances in:
 - rate of educational development;
 - ability to relate to the environment;
 - mobility;
 - perception, speech, and language;
- b) lack of the representational symbolic behaviour that precedes language.

Deaf and Hard-of-Hearing

An impairment characterized by deficits in language and speech development because of a diminished or non-existent auditory response to sound.

Language Impairment

A learning disorder characterized by an impairment in comprehension and/or the use of verbal communication or the written or other symbol system of communication, which may be associated with neurological, psychological, physical, or sensory factors, and which may:

- a) involve one or more of the form, content, and function of language in communication; and
- b) include one or more of:
 - language delay;
 - dysfluency;
 - voice and articulation development, which may or may not be organically or functionally based.

Speech Impairment

A disorder in language formulation that may be associated with neurological, psychological, physical, or sensory factors; that involves perceptual motor aspects of transmitting oral messages; and that may be characterized by impairment in articulation, rhythm, and stress.

Learning Disability

A learning disorder evident in both academic and social situations that involves one or more of the processes necessary for the proper use of spoken language or the symbols of communication, and that is characterized by a condition that:

- a) is not primarily the result of:
 - impairment of vision;
 - impairment of hearing;
 - physical disability;
 - developmental disability;
 - primary emotional disturbance;
 - cultural difference;
- b) results in a significant discrepancy between academic achievement and assessed intellectual ability, with deficits in one or more of the following:
 - receptive language (listening, reading);
 - language processing (thinking, conceptualizing, integrating);
 - expressive language (talking, spelling, writing);
 - mathematical computations; and
- c) may be associated with one or more conditions diagnosed as:
 - a perceptual handicap;
 - a brain injury;
 - minimal brain dysfunction;
 - dyslexia;
 - developmental aphasia.

Intellectual

Giftedness

An unusually advanced degree of general intellectual ability that requires differentiated learning experiences of a depth and breadth beyond those normally provided in the regular school program to satisfy the level of educational potential indicated.

Mild Intellectual Disability

A learning disorder characterized by:

- a) an ability to profit educationally within a regular class with the aid of considerable curriculum modification and supportive service;
- b) an inability to profit educationally within a regular class because of slow intellectual development;
- c) a potential for academic learning, independent social adjustment, and economic self-support.

Developmental Disability

A severe learning disorder characterized by:

- a) an inability to profit from a special education program for students with mild intellectual disabilities because of slow intellectual development;
- b) an ability to profit from a special education program that is designed to accommodate slow intellectual development;
- c) a limited potential for academic learning, independent social adjustment, and economic self-support.

Physical

Physical Disability

A condition of such severe physical limitation or deficiency as to require special assistance in learning situations to provide the opportunity for educational achievement equivalent to that of pupils without exceptionalities who are of the same age or development level.

Blind and Low Vision

A condition of partial or total impairment of sight or vision that even with correction affects educational performance adversely.

Multiple

Multiple Exceptionalities

A combination of learning or other disorders, impairments, or physical disabilities that is of such a nature as to require, for educational achievement, the services of one or more teachers holding qualifications in special education and the provision of support services appropriate for such disorders, impairments, or disabilities.

PROGRAM AND DIPLOMA REQUIREMENTS IN ONTARIO SCHOOLS

Ministry Documents Related to Program and Diploma Requirements for Elementary and Secondary Schools

Curriculum policy applies to all students in Ontario schools, including students who have special needs, and is outlined in the following documents:

- *The Ontario Curriculum* policy documents describe grade-by-grade expectations by subject for students in elementary and secondary schools in Ontario. Programs based on these documents are designed to provide the greatest possible opportunity for every student to develop, as completely as possible, his or her abilities and interests while addressing each student's special needs.
- *Ontario Secondary Schools, Grades 9 to 12: Program and Diploma Requirements, 1999* (OSS) sets out the policies and requirements that govern the program in English-language secondary schools in Ontario. It outlines the policies of the Ministry of Education for programs in Grades 9 to 12, including the requirements for the awarding of the Ontario Secondary School Diploma (OSSD). Programs based on these requirements are designed to equip students with the knowledge and skills they will need to lead satisfying and productive lives in the twenty-first century. Some key policy directions outlined in this document and which affect students with special needs are described below.

Ontario Secondary Schools, Grades 9 to 12: Program and Diploma Requirements, 1999

The high school program is based on a credit system. In order to earn an Ontario Secondary School Diploma (OSSD), a student who entered Grade 9 in the 1999–2000 school year, or who enters in subsequent years, must earn a minimum of 30 credits, including 18 compulsory credits and 12 optional credits. Starting in the 2000–01 school year, students must also complete 40 hours of community involvement activities, and starting in 2001–02, they must pass the provincial secondary school literacy test.

To ensure that all students, including those identified as exceptional, are able to qualify for the OSSD, principals may substitute up to 3 compulsory course credits from the remaining courses offered by the school that meet the requirements for compulsory credits. Where there is a need to substitute a compulsory credit course for an exceptional pupil, the substitution:

- should be in keeping with the student's strengths, needs, learning expectations, and accommodations as set out in the student's Individual Education Plan (IEP);
- must be approved in writing by the student's parents, if the student is not an adult;
- will be noted on the student's Ontario Student Transcript.

Community Involvement

As part of the diploma requirements, students must complete a minimum of 40 hours of unpaid community involvement activities before graduating from secondary school. This requirement is in addition to the 30 credits needed for a secondary school diploma. Students will be able to choose their own community involvement activities, within guidelines that will be provided by the school and school board. Students will be responsible for fulfilling this requirement on their own time and for keeping a record of their activities on a form supplied by the school. (See Policy/Program Memorandum No. 124A, Ontario Secondary School Diploma Requirement: Community Involvement Activities in English-Language Schools.)

The Provincial Secondary School Literacy Test

Beginning with students who enter Grade 9 in the 2001–02 school year, all students, including those identified as exceptional pupils, must successfully complete the provincial secondary school literacy test in order to graduate with an OSSD.

The test evaluates students' reading and writing skills based on provincial curriculum expectations in language and communications up to and including Grade 9.

Accommodations, deferrals, or exemptions are available as appropriate to meet the individual needs of students who are receiving special education programs and services and who have an IEP. (See Policy/Program Memorandum No. 127.)

The Ontario Secondary School Certificate

The Ontario Secondary School Certificate will be granted on request to students who leave school before earning the OSSD, provided that they have earned a minimum of 14 credits (7 compulsory credits and 7 optional credits).

The Certificate of Accomplishment

Students who leave school before fulfilling the requirements for the Ontario Secondary School Diploma or the Ontario Secondary School Certificate may be granted a Certificate of Accomplishment, which will be accompanied by the student's Ontario Student Transcript. For students who have an IEP, a copy of the IEP may also be included.

Full Disclosure

Under the terms of the "full disclosure" policy, all Grade 11 and 12 courses taken or attempted by students, including students who are identified as exceptional pupils, will be recorded on the Ontario Student Transcript, with the percentage grades earned and the credits gained. The transcript may include an indication of any extraordinary circumstances affecting a student's achievement in Grade 11 or 12 courses.

A student's parents or a student who is an adult (18 years of age or over) may request that the principal identify, by using a special indicator, any Grade 11 and 12 courses in which the student's performance was affected by extraordinary circumstances. If the principal agrees with the student's or parents' claim, the special indicator "S" is entered in the "Note"⁴ column of the transcript for these courses. However, the student's percentage grades are also recorded. The special indicator may also be used for courses from which the student has withdrawn because of extraordinary circumstances.

If the principal does not agree with the parents' or student's claim that extraordinary circumstances have had a significant effect on the student's achievement, the parents or the student may request that the appropriate supervisory officer review the matter. (See OSS, section 6.2.2.2.) Full details may be found in *The Ontario Student Transcript (OST): Manual, 1999* and in OSS.

The Annual Education Plan (AEP)

All students in Grades 7 to 12 will prepare an annual education plan with assistance from their parents, guidance counsellors, and teacher-advisers. (The program is now in place for all students in Grades 7 to 12.) The planning process will help students set goals and review and assess their achievements and progress along the way. The plan identifies:

- the student's goals for academic achievement;
- the student's course selections for the following year;
- the extracurricular activities, cooperative education programs, and work experience opportunities in which the student will be participating, both in and outside school;
- a range of possible postsecondary goals. Beginning in Grade 10, students should consider and research the requirements for continued study at a college or university or private vocational school, apprenticeships or internships, or direct entry into the work force.

Exceptional pupils, their parents, and teachers should take the student's IEP and transition plan into consideration when developing an annual education plan.

4. The following notations may also appear in the "Note" column:
M modified curriculum expectations that do not lead to a credit
I interdisciplinary studies
F French Immersion
C cooperative education
A alternative expectations, which do not lead to a credit

Prior Learning Assessment and Recognition (PLAR)

Beginning in the 2001–02 school year, students may receive a credit without taking a course if they can demonstrate that they have the skills and knowledge from prior learning to meet the expectations for the course set out in the provincial curriculum. To receive a credit through the PLAR process, students are assessed through formal tests and other methods of evaluation appropriate to the subject.

Students may obtain a maximum of four credits through the PLAR process, but no more than two in one subject area. The PLAR process applies only to courses in Grades 10 to 12. PLAR will be implemented in a phased-in approach: Grade 10 in 2001–02, Grade 11 in 2002–03, and Grade 12 in 2003–04.

PLAR procedures must also be available to exceptional students. Assessment strategies must be adapted for this group in keeping with their special needs; for example, extra time might be allowed for the completion of work or a quiet environment provided for activities. While PLAR may be of benefit to some gifted students, it is not intended to be used as a replacement for or as an alternative to enriched programs or special education programs for gifted students.

Locally Developed Courses

School boards may develop two kinds of courses locally in Grades 9 to 12: compulsory credit courses and optional credit courses. School boards may develop locally one compulsory credit course in English, one in mathematics, and/or one in science. All locally developed courses, with the exception of religious education courses developed by Roman Catholic district school boards, must be approved by the Ministry of Education. (*Note: You may wish to refer to the *Guide to Locally Developed Courses, Grades 9 to 12: Approval Requirements and Procedures, 2000* for approval requirements.*)

The Ontario Curriculum, Grades 9 to 12: Program Planning and Assessment, 2000

The Ontario Curriculum, Grades 9 to 12: Program Planning and Assessment, 2000 provides essential information on aspects of policy relating to program planning and the assessment, evaluation, and reporting of student achievement that pertain to all disciplines in the Ontario secondary school curriculum. It is a companion document to the curriculum policy documents for the individual disciplines, which identify the knowledge and skills students are expected to acquire in their secondary school courses. It provides teachers and others interested in secondary education in Ontario with a summary and discussion of relevant policies set out in *Ontario Secondary Schools, Grades 9 to 12: Program and Diploma Requirements, 1999*.

Choices Into Action: Guidance and Career Education Program Policy for Ontario Elementary and Secondary Schools, 1999

Choices Into Action describes the purpose and importance of Ontario's guidance and career education program, its content, and its unique approach to teaching and learning. It describes the approaches that principals and teachers are expected to take when teaching students how to develop their learning skills, interpersonal skills, and knowledge and skills in the area of career planning. It also outlines program-planning strategies, accountability measures, and the roles and responsibilities of all involved – principals, teachers, students, parents, and community partners.

The policies outlined in this document complement related provincial policies outlined in *Ontario Secondary Schools, Grades 9 to 12: Program and Diploma Requirements, 1999* and in the elementary and secondary school curriculum policy documents.

ADVISORY COMMITTEES ON SPECIAL EDUCATION

The Minister's Advisory Council on Special Education

This council, established by Order-in-Council, advises the Minister of Education on any matter related to the establishment and provision of special education programs and special education services for exceptional pupils, including the identification and provision of early intervention programs for students with special needs.

In particular, the council:

- responds to proposals or positions of the Ministry of Education or other ministries, as submitted to the council from time to time;
- identifies concerns in the delivery of special education programs and services for exceptional pupils and provides information, advice, and recommendations for ministry consideration.

The council meets up to three times a year for a maximum of four and a half days and submits an annual report that includes the following:

- the council's priorities and a plan for achieving them;
- an analysis of the achievement of the previous year's priorities;
- recommendations to the minister.

The council consists of the following members:

- a) a minimum of 9 and a maximum of 12 voting members representing exceptionalities recognized by the Ministry of Education (autism, developmental disability, low vision, giftedness, physical disability) and the support professions (medical practitioners, psychologists, social workers, speech-language pathologists);
- b) 9 voting members representing educator groups (supervisory officers, principals, teachers, educational assistants,⁵ trustees);
- c) one voting member representing students/youth;
- d) one voting member representing Native persons.

The council has positions for up to 24 voting members plus one non-voting member from each of: the Ministry of Health and Long-Term Care; the Ministry of Community and Social Services; the Ministry of Training, Colleges and Universities; and the Integrated Services for Children Division. Roman Catholic and Franco-Ontarian representation are also mandated. These representatives are selected from the existing members. The chair and vice-chair are appointed by the minister from among the voting members. All members are appointed by the minister.

5. In this guide, the terms *educational assistant*, *teaching assistant*, and *teacher assistant* are used interchangeably.

The full council meets three times annually. The council also establishes ad hoc committees as required and has a number of active subcommittees that explore and respond to specific issues throughout the year. These committees bring recommendations to the council at its regular meetings. The chair of the council meets regularly with ministry staff.

Further information about the Advisory Council (e.g., membership, annual report) is available on the Ministry of Education website (<http://www.edu.gov.on.ca>) and in Appendix 1 of this document.

Special Education Advisory Committees (Regulation 464/97)

Subsection 57.1(1) of the Education Act requires every district school board to establish a Special Education Advisory Committee (SEAC). Regulation 464/97 requires that each school authority establish a SEAC. The composition and duties of this committee at both district school boards and school authorities are set out in Regulation 464/97, as are most of the procedural matters related to its operation. (This regulation is provided in Appendix 10.)

The members of the committee include representatives of local associations (defined in the regulation), members of the school board, and Native representatives, and may include additional members who do not belong to any of these groups. The SEAC's responsibilities are:

- to make recommendations to the board in respect of any matter affecting the establishment, development, and delivery of special education programs and services for exceptional pupils of the board;
- to participate in the board's annual review of its special education plan;
- to participate in the board's annual budget process as it relates to special education;
- to review the financial statements of the board as they relate to special education.

The following are some guidelines (not in the regulation) that school boards may find useful.

- 1) The SEAC seats for representatives of local associations should be used to bring to the committee the perspective of parents of children with a wide range of exceptionalities. Note that the ministry provides school boards with definitions of exceptionalities for use in the identification, placement, and review process. As many as possible of these exceptionalities should be represented on the SEAC.
- 2) Representatives of local associations should be persons who can express the concerns of the parents of the exceptional pupils of the board.
- 3) Representatives of local associations should bring the perspective and resources of a provincial or a national association that is incorporated and that operates throughout Ontario to further the interests of one or more groups of exceptional pupils.

- 4) The representative of the local association nominated by the association is normally the person appointed by the board.

As long as the association selects as its representative a member who lives within the jurisdiction of the board, the actual address of the "branch" of the association should not be significant.

SEAC members (except those appointed to represent Native pupils) must be qualified to vote for members of the board and must be resident within the area of jurisdiction of the board. To be qualified to vote for school board members, a person must be:

- a Canadian citizen;
- at least eighteen years old;
- in the case of a public school board, a public school elector;
- in the case of a separate school board, a separate school elector;
- in the case of a French-language district school board, a person with section 23 Charter rights.

Employees of a school board are not eligible for membership on the SEAC of the board that employs them. However, employees of one school board may be members of the SEAC of another school board, subject to their eligibility to vote for members of the school board that appoints them.

In order to assist the SEACs in making informed recommendations, boards should provide orientation sessions and may arrange for knowledgeable persons to provide in-service training sessions for members during regular SEAC meetings. These in-service training sessions might focus on:

- sections of the Education Act relating to special education;
- regulations regarding special education;
- Ministry of Education memoranda;
- *Special Education: A Guide for Educators*;
- the board policies regarding special education;
- the board special education plan;
- the roles and responsibilities of the SEAC;
- the funding of special education.

A sample agenda for such a training session is provided in the *Handbook for Members of Special Education Advisory Committees* mentioned in the following section.

Information about membership on the SEAC, procedures to be followed in the event of vacancies, and other matters relating to SEACs are outlined in Regulation 464/97.

Provincial Parent Association Advisory Committee on Special Education Advisory Committees (PAAC on SEAC)

The Provincial Parent Association Advisory Committee on Special Education Advisory Committees (PAAC on SEAC) was established in 1983 to provide a forum for sharing ideas and strategies and addressing common concerns related to SEACs throughout the province. It may include any association/organization that is provincial and has SEAC representation. (A list of organizations involved with special education is provided in Appendix 2.) The mission statement of the PAAC on SEAC is "to provide support to and sharing of opportunities among the parent associations and to promote successful practices for Special Education Advisory Committees".

An extremely valuable resource for SEAC members is the *Handbook for Members of Special Education Advisory Committees*, developed by the PAAC on SEAC. Its purpose is to assist and guide members of SEACs to fulfil their roles effectively. The handbook provides:

- models of successful practices in many areas;
- procedures for appointing alternative SEAC representatives (prepared prior to the requirements for appointing alternative members set out in Regulation 464/97);
- details of the annual review of special education plans;
- a sample SEAC agenda;
- a sample parent association report;
- parliamentary procedures at a glance;
- a preparation checklist for SEAC meetings;
- a list of skills that will improve the effectiveness of SEAC members;
- an index of reference and resource materials.

Additional information about the PAAC on SEAC and the handbook may be obtained by contacting the chair of the PAAC on SEAC. Contact information is available from the local district office of the Ministry of Education (see Appendix 3).

RELATED LEGISLATION

In addition to the Education Act, there is other legislation that affects school boards. Acts that are directly relevant to the education of students with special needs are discussed briefly below.

The Ontario College of Teachers Act, 1996

The Ontario College of Teachers is a professional body responsible for governing the teaching profession in Ontario and was established under the Ontario College of Teachers Act in 1996.

The mandate of the college includes:

- regulating the profession of teaching and governing its members;
- establishing teaching qualifications, setting membership criteria, and creating a provincial register of teachers;
- establishing professional standards and ethical standards for the teaching profession;
- accrediting pre-service and in-service teacher-education programs;
- receiving and investigating complaints against members of the college and dealing with issues of discipline and fitness to practise.

Membership in the college is mandatory for anyone employed in English- or French-language publicly funded schools whose job requires teaching qualifications.

Regulation 184/97 – Teachers Qualifications, which is made under the Ontario College of Teachers Act, states the requirements for becoming certified as a teacher in Ontario, including those for teaching exceptional pupils. This regulation specifies the process for obtaining teaching qualifications for teaching the deaf and those with developmental disabilities. It identifies the additional qualifications that can be acquired for teaching special education, the blind, the deaf, the deaf-blind, and children with language difficulties/aphasia.

Freedom of Information Legislation

The Freedom of Information and Protection of Privacy Act (FIPPA) governs the collection, use, and disclosure of personal information at the Provincial Schools for the deaf, blind, and deaf-blind and the Demonstration Schools for children who have severe learning disabilities.

The Municipal Freedom of Information and Protection of Privacy Act (MFIPPA) governs the collection, use, and disclosure of personal information at publicly funded school boards and schools.

The Education Act and the Municipal Freedom of Information and Protection of Privacy Act in the case of school boards (the Freedom of Information and Protection of Privacy Act in the case of Provincial and Demonstration Schools) contain requirements related to the collection, use, and release of personal information.

Principals and teachers should consult with their board's freedom-of-information coordinators about the steps required to obtain access to personal information about the student that is not contained in the student's OSR (for example, from other professionals who work with the student) and about providing information contained in the student's OSR to other professionals.

Under both acts, any personal information received by an "institution" (as defined in the legislation) is considered to be a "collection" of information for the purposes of the act. The information collected may be either oral or written.

When personal information is collected from an individual, the individual must be informed, by means of a "collection statement" printed on the form on which the personal information is to be provided, of:

- the legal authority for the collection;
- the principal purposes for which it is intended to be used;
- the title, business address, and business telephone number of an officer or employee of the institution who can answer the person's questions about the collection.

This type of collection statement is generally included on forms such as application forms or registration forms and is found on several of the Ontario Student Record (OSR) documents. The collection statement is an important part of compliance with the legislation, because it indicates to the individuals from whom personal information is collected the uses to which the information will be put.

If the personal information collected is written, it becomes a "record" under both acts. The acts do not dictate to school boards how many or what types of files to keep or what to include in them. This is up to the board/school. Most boards will have policies about records retention as well as policies about various other types of files (e.g., discipline files, guidance files) kept by schools. The acts do outline requirements related to the use and disclosure of personal information by school boards.

The Regulated Health Professions Act, 1991

Many health professionals work with students. Some of them train and minimally supervise school staff to carry out certain health-related tasks. Such activities are regulated by the Regulated Health Professions Act (RHPA), proclaimed in 1991. The act provides for the regulation of twenty-one health care professions in Ontario. It specifies thirteen controlled acts in health care that may be performed by a member authorized by the act, or by a person delegated by such a member. One such controlled act is :

Communicating to the individual or his or her personal representative a diagnosis identifying a disease or disorder as the cause of symptoms of an individual in circumstances in which it is reasonably foreseeable that the individual or his or her personal representative will rely on the diagnosis.

The Regulated Health Professions Act is a law that describes what members of specific professions do. It sets up colleges for the various professions that govern the activities of members of those professions and adjudicate any complaints made about members.

The Psychology Act, 1991

The Psychology Act established the College of Psychologists of Ontario to regulate the practice of psychology in the province. The college sets the standards of practice for the profession and is responsible to the public and the profession for maintaining the quality of practice, for regulating the qualifications for registration, and for investigating complaints involving members. There are two levels of college membership: a psychologist is a practitioner with doctoral-level training and registration with the college, and a psychological associate is a practitioner with master's-level training and registration with the college.

According to the Psychology Act:

In the course of engaging in the practice of psychology, a member is authorized, subject to the terms, conditions and limitations imposed on his or her certificate of registration, to communicate a diagnosis identifying, as the cause of a person's symptoms, a neuropsychological disorder or a psychologically based psychotic, neurotic or personality disorder.

The Audiology and Speech-Language Pathology Act, 1991

The Audiology and Speech-Language Pathology Act authorizes a regulation which:

- includes the requirement that informed consent must be obtained before service is initiated;
- includes the stipulation that only certified members of the college can call themselves speech-language pathologists or therapists; and
- deals with the availability of records and reports.

Part B.
Funding for
Special Education

DETAILED CONTENTS

PART B. FUNDING FOR SPECIAL EDUCATION

Introduction	B2
The Special Education Per Pupil Amount (SEPPA)	B3
The Intensive Support Amount (ISA)	B4
The Special Incidence Portion (SIP)	B6
Portability	B7

INTRODUCTION

Funding for special education is provided in layers.

School boards receive a Foundation Grant for every student enrolled, whether or not the student is an exceptional pupil. This is the base, which is intended to cover the basic costs of providing a classroom education for all students. It includes such things as the cost of teachers, teaching assistants, paraprofessionals, and learning materials.

The next layer is the Special Education Grant, a two-part grant and one of the nine special-purpose grants that recognize the different circumstances of students and boards. This funding is provided in addition to the Foundation Grant.

One component of the Special Education Grant is the Special Education Per Pupil Amount (SEPPA), which is based on a school board's enrolment (counting all students, not just students who have been identified as requiring a special education program). This funding is used for special education programs and services that address the full range of exceptionalities.

The other component is the Intensive Support Amount (ISA), which is related to the number of high-needs exceptional pupils in a board (that is, students who require specialized high-cost assistance for intensive staffing supports). While boards receive ISA funding in proportion to their incidence of high-needs students, they have the flexibility to use their ISA funding across the special education system. Therefore, the ISA submission process is not related to the determination of individual students' programs and services. Boards are expected to use this flexibility to provide all of their exceptional pupils with the special education programs and services they need, in accordance with the Education Act and as outlined in students' IEPs.

THE SPECIAL EDUCATION PER PUPIL AMOUNT (SEPPA)

The SEPPA is the first layer provided, in addition to the Foundation Grant, to support students with special needs. It is generated on the basis of total student enrolment – that is, it is determined on the basis of how many students are enrolled by the board. The per-pupil allocation of the SEPPA funding provides boards with the flexibility to respond to local needs using a range of special education programs and services.

SEPPA funds support the costs of student assessments and services prior to any formal designation of exceptionality. SEPPA funds assist boards in hiring most of the support personnel needed by exceptional pupils, including psychologists, social workers, occupational and physical therapists, speech-language pathologists, teaching assistants, and behavioural support staff, as well as other types of staff. SEPPA funds also support smaller class sizes for some exceptional pupils. Funds for most special education teachers are provided through a combination of the SEPPA and the Foundation Grant.

THE INTENSIVE SUPPORT AMOUNT (ISA)

It is important to remember that Intensive Support Amount (ISA) funding is for school boards to support the needs of students who require high-cost specialized equipment, programs, and classroom supports; it is not funding for individual students. Boards receive funding in proportion to their incidence of high-needs students, and have the flexibility to use their ISA funding across the special education system.

School boards are responsible for meeting the needs of all of their students. Decisions about providing particular student supports, such as teaching assistants, are made by the school board. A number of factors may affect such decisions, including the size and composition of the class, the range of supports already assigned, and other local considerations. The needs of each student are documented in the student's Individual Education Plan (IEP), which should be developed in consultation with parents as well as with other education professionals, as appropriate.

There are five levels of ISA funding:

- ISA 1,¹ based on special individualized equipment needs;
- ISA 2 and ISA 3, based on the incidence of students with high needs;
- ISA 4, based on the number of educational programs offered in care, treatment, custodial, or correctional facilities (see Part F, pages F4–5). Because ISA 4 programs are funded through a program-approval process administered by Ministry of Education district offices, in cooperation with other ministries, school boards apply for these funds through a separate process;
- the Special Incidence Portion (SIP), for students with extraordinarily high health and safety needs.

In addition to the Special Education Grant, other grants may also be used to support special education students, as appropriate. For example, the Language Grant supports language programming for all students; the Learning Opportunities Grant provides funding for students who are at risk of experiencing academic difficulties; the Pupil Accommodation Grant supports building-related expenses, such as wheelchair ramps; the Transportation Grant supports the cost of transportation for students to their special education programs; and the School Board Administration and Governance Grant supports some costs of administering special education programs and services. See Figure B.1 for a visual representation of special education funding.

1. ISA Level 1 functions as an additional layer for equipment needs. It may be used for students whose special needs are supported through any combination of grants – Foundation + SEPPA, or ISA Levels 2 or 3.

Figure B.1: Overview of Layered Funding

THE SPECIAL INCIDENCE PORTION (SIP)

School boards may apply to their district office for a Special Incidence Portion (SIP) in addition to other grants provided on behalf of students. To qualify, boards will typically require more than two full-time staff on a per-student basis in order to ensure the student's health and safety and/or the safety of others.

PORTABILITY

When high-needs exceptional students move from one school board to another, adjustments will be made in ISA funding to accommodate the resulting change in a board's funding needs.*

Boards receive adjustments in ISA funding according to the net increase or decrease in their number of ISA claimants. This measure is designed to assist boards that experience an overall increase in the number of high-needs students who move into the board during the school year. Where a board has a net increase or decrease of students, appropriate adjustments will be made in the board's ISA claim funding.

For the 2001–02 school year, school boards are required to report the number of students (for whom an ISA claim was made) who either moved into or transferred out of their board as of October 31, 2001. The ministry will provide a standard form for boards to complete. (In the event of a delay in issuing the forms, boards are normally granted additional time to gather the necessary information.)

Details regarding special education funding are provided by the Ministry of Education in the annual *Resource Manual for the Special Education Grant Intensive Support Amount (ISA): Guidelines for School Boards*, which is available on the ministry's website, at <http://www.edu.gov.on.ca>.

*Note that personalized special education equipment purchased for a student is considered portable. Therefore, it moves with the student, unless the equipment can be used by another child in the school board. In such cases, the equipment will not be moved and new equipment will be purchased for the student who is moving.

INTRODUCTION

All students, including exceptional pupils, in schools across Ontario “require consistent, challenging programs that will capture their interest and prepare them for a lifetime of learning. They require knowledge and skills that will help them compete in a global economy and allow them to lead lives of integrity and satisfaction, both as citizens and as individuals.”¹

This section of the guide outlines the steps normally taken to ensure effective program planning for students who require special education programs and services.

1. Ontario, Ministry of Education and Training, *The Ontario Curriculum, Grades 1–8: Language* (Toronto: Ministry of Education and Training, Ontario, 1997), p. 3.

PRESCHOOL IDENTIFICATION

Often, early identification of children with special needs is done by agencies of other ministries – perhaps through a daycare program or a public health or medical clinic – before the child enters school. A number of current initiatives are designed to facilitate such early identification and the provision of appropriate services. These include:

- the program "Healthy Babies, Healthy Children", a prevention/early intervention initiative designed to encourage healthy baby and child development. A joint project of the Ministry of Health and Long-Term Care and the Ministry of Community and Social Services under the direction of the Integrated Services for Children Division, "Healthy Babies, Healthy Children" is intended to augment and strengthen existing community services for families and children;
- the Preschool Speech and Language Initiative, which began in 1996 and is administered by the Ministry of Health and Long-Term Care. Thirty-two regional service delivery programs exist for providers of speech and language services for children, from birth to entry into Senior Kindergarten. Services include public awareness/prevention, early identification, assessment, and a full range of treatment options, from parent training to one-on-one or group therapy with a speech-language pathologist. A transition-to-school plan is provided for every child who has been receiving speech and language services and will require ongoing support once in school;
- the Intensive Early Intervention Program for Children with Autism, which is administered by the Ministry of Community and Social Services and provides intensive behavioural intervention services to children aged 5 and under and their families, and assistance in accessing the range of other services that may also be needed. Children who are not identified until they are 5 or 6 years old are eligible for twelve months in the program if, based on an assessment, these services would help their transition to school. Each child will have his or her own transition-to-school plan.

Where early identification of a child with special needs has been made and preschool services are being provided, services may need to continue when the child is enrolled in a school to ensure a smooth transition to school. For example, providers of speech and language services to a preschool child may need to continue their involvement with the child when he or she enters school. To ensure that this step is successful, schools should have in place a good transition protocol. The question of the continuation of existing support may be considered when the parents first discuss their child's enrolment with the principal.² Parents and community resource persons should be encouraged to contact the principal at an early stage prior to enrolment, in order to give him or her time to consult with appropriate board personnel about resources and programming.

2. See Ministry of Education and Training, Ontario, "Interministerial Guidelines for the Provision of Speech and Language Services" (Toronto: Ministry of Education and Training, Ontario, 1988), p. 1.

ENROLLING A CHILD WITH SPECIAL NEEDS

Education is the shared responsibility of the principal, classroom and special education teachers, support staff, parents, and student. Ongoing communication and close cooperation among these partners is particularly important for success in helping the student to achieve.

All children, including those with special needs, have the right to attend school at the beginning of the school year following registration. (For further information, refer to Part A, page A11 of this guide, "Enrol All Pupils Who Have the Right to Attend".)

Parents and school board personnel should work together to ensure that the necessary supports are in place to provide a successful school-entry experience for the child. Through the early identification process there should be a planned transition. This planned transition to school will help to prepare for the child's future success. Such a process might include:

- identifying persons who have worked with the child in the past and those who will play a role in supporting the child in the new school environment;
- identifying the support staff who will continue to work with school board staff to ensure a successful transition to school (e.g., Community Care Access Centre staff);
- establishing the appropriate program, supports, and services to meet the student's needs once in school.

Once a child with special needs has been registered, the school and parents should continue the process of collecting and reviewing information related to the child's needs and should maintain regular communication about the student's progress. Early documentation will be useful in establishing records against which to measure future achievement.

Some children may need individualized or modified programs or assessment methods to achieve the Kindergarten expectations to the best of their ability. It is the responsibility of the teachers and other school board staff to meet the needs of children in the Kindergarten years, making modifications where necessary for children who are having difficulty as well as for those who need more challenging learning experiences. In addition to their own observations and the information provided by parents, teachers can use the information available through the early identification process to determine individual children's level of development, learning abilities, and needs. This identification procedure is part of an ongoing assessment process that boards are required to initiate when a child first enters school.

EARLY AND ONGOING IDENTIFICATION

The early identification of the learning abilities and needs of students has been a long-time priority in Ontario schools. See the Education Act, clause 8(3)(a) and Policy/Program Memorandum No. 11, 1982, "Early Identification of Children's Learning Needs".

Policy/Program Memorandum No. 11 requires school boards to identify all students' strengths and needs when they are first enrolled and to reassess them on a regular basis. Although these procedures are not strictly considered to be part of special education, children identified may receive a variety of support services. Documentation of these support services and monitoring of ongoing school progress should be an integral part of any later recommendations for special education assistance, since the identification of a student's needs is crucial to the provision of special education programs and special education services.

Early identification may serve to:

- establish a clear understanding of any visual, hearing, or other medical conditions that may affect learning;
- identify students who may face academic, cognitive, motor, or social challenges, so that interventions or more in-depth assessments can be initiated;
- identify students who are not developing speech and language skills within normal ranges, so that remediation or treatment can be initiated;
- enable school teams to plan proactively to provide experiences and programs that will maximize students' strengths and meet any special needs they may have from the time they enter school.

A learning problem may be suspected on the basis of observable behaviours, health or medical issues, and current development levels. It is the combined responsibility of school personnel, other professionals, and parents to gather this information and share it so that appropriate programming and monitoring can be put in place at the school.

THE IN-SCHOOL TEAM AND OTHER SUPPORT MEASURES

The In-School Team

Establishing a student support team is an important first step in creating conditions that will enable a student who is experiencing difficulty to succeed in the learning environment. Many school boards have school-based "teams" that suggest teaching strategies to classroom teachers who have students with special needs and that recommend formal and informal assessments. School teams play a significant role in helping classroom teachers address difficulties that a student may be experiencing in the classroom prior to, and after, formal assessment and identification.

The school team is made up of people with various types of expertise who work together to:

- support the student, the parent, and each other;
- collaborate, consult, and share information and knowledge to identify strategies that may increase the student's learning success.

School boards do not have a legislated responsibility to establish an in-school team, but many boards find that such teams can provide interventions and support that effectively meet the student's needs.

There are no formal rules about the composition of the student support team. Teams are designed to suit the specific needs within the school, using the individual resources and skills of the school staff responding to local conditions. Formal guidelines for the team's membership, meeting times, and procedures for recording and reporting on its activities may be established.

In most schools, the core members of the team would include:

- the principal or vice-principal;
- the school special education resource teacher (if available);
- a guidance teacher-counsellor (especially at the secondary level), and possibly the teacher-adviser;
- the student's current teacher and/or the "referring" teacher.

The team may also include board staff and professionals in the community who have expertise with the various exceptionalities and in such areas as speech and language development, psychology, physical and occupational therapy, social work, curriculum modification, and ESL/ELD.

As circumstances require, the team may also seek assistance from outside resource people such as:

- parents and other family members;
- community associations/agencies;

The collection, use, and disclosure of personal information must comply with the requirements of freedom of information legislation.

- service providers from the Ministry of Health and Long-Term Care (e.g., Community Care Access Centres, which coordinate service providers such as occupational therapists and hospital personnel);
- service providers from the Ministry of Community and Social Services (e.g., representatives from treatment centres).

The active involvement of parents enhances the effectiveness of the school team. Parents and students have important information to share with members of the school team and should be invited to meet with the team when necessary and appropriate. The support of parents has positive and pervasive effects on the child's success in school, and parents should be encouraged to feel that their contribution is a valuable part of the school-team process.

Stages in the In-School Team Process

Stage 1. Classroom Screening and Intervention

Apart from the parent, the classroom teacher is usually the first person to recognize that a student is experiencing difficulty in learning. Generally, the teacher initiates the problem-solving process at the classroom level. The teacher should discuss the concerns with a previous teacher, review information in the student's Ontario Student Record (OSR), and make some initial program adjustments. The teacher should also contact the student's parents to discuss the matter and the planned program adjustments. During this process, the teacher is able to form his or her own judgements about the student's strengths and needs. The teacher and principal then determine what resources, support personnel, and strategies are available to meet those needs.

If the student continues to have difficulty, a referral is usually made to the in-school team. Ongoing communication with the parents can elicit valuable information about the student and is encouraged.

Stage 2. Referral to the In-School Team

At the request of the student's teacher or the principal, the in-school team will allocate time at a regularly scheduled team meeting for discussion of the student's problems with learning. Some school boards have a practice of notifying the parents prior to the meeting about the issues to be discussed. Problems may be academic (either underachievement or the need for enrichment), behavioural, social, or a combination of these, or may involve such things as poor attendance, medical issues, or a variety of other circumstances that are adversely affecting the student's learning.

In addition to regular members of the team and at the invitation of the team leader/chair, the team may include additional persons who have information or expertise to share. The selection of additional members depends on the needs of the student and the personnel resources available to the school team. Team members may include the teacher-adviser, teachers who work with the student, paraprofessionals who work with the student, and service providers from community agencies who may have relevant information to

share. Where a number of teachers are involved (as in secondary school), some information may be presented through reports collected from teachers. However, it is important for those most closely involved with the student to be present.

The meeting should be structured to establish a welcoming atmosphere and to ensure that all participants feel that their opinions are valued and respected. Attention to details such as choice of room, seating arrangements, and introductions can contribute to a productive meeting. (Refer to Appendix 4 for a sample agenda checklist.)

The referral to the in-school team may result in one or a combination of the following actions:

- a determination of the interventions or accommodations needed;
- program interventions in the regular class;
- the addition of specific supports in the classroom or the withdrawal of the student from the classroom for limited periods of time (e.g., for remediation or enrichment);
- referral to other specialized services, including itinerant hearing, vision, and/or speech and language services, psychological services, and social services or medical support;
- referral for assessment, which may or may not lead to an IPRC referral;
- ongoing monitoring leading to review after several weeks.

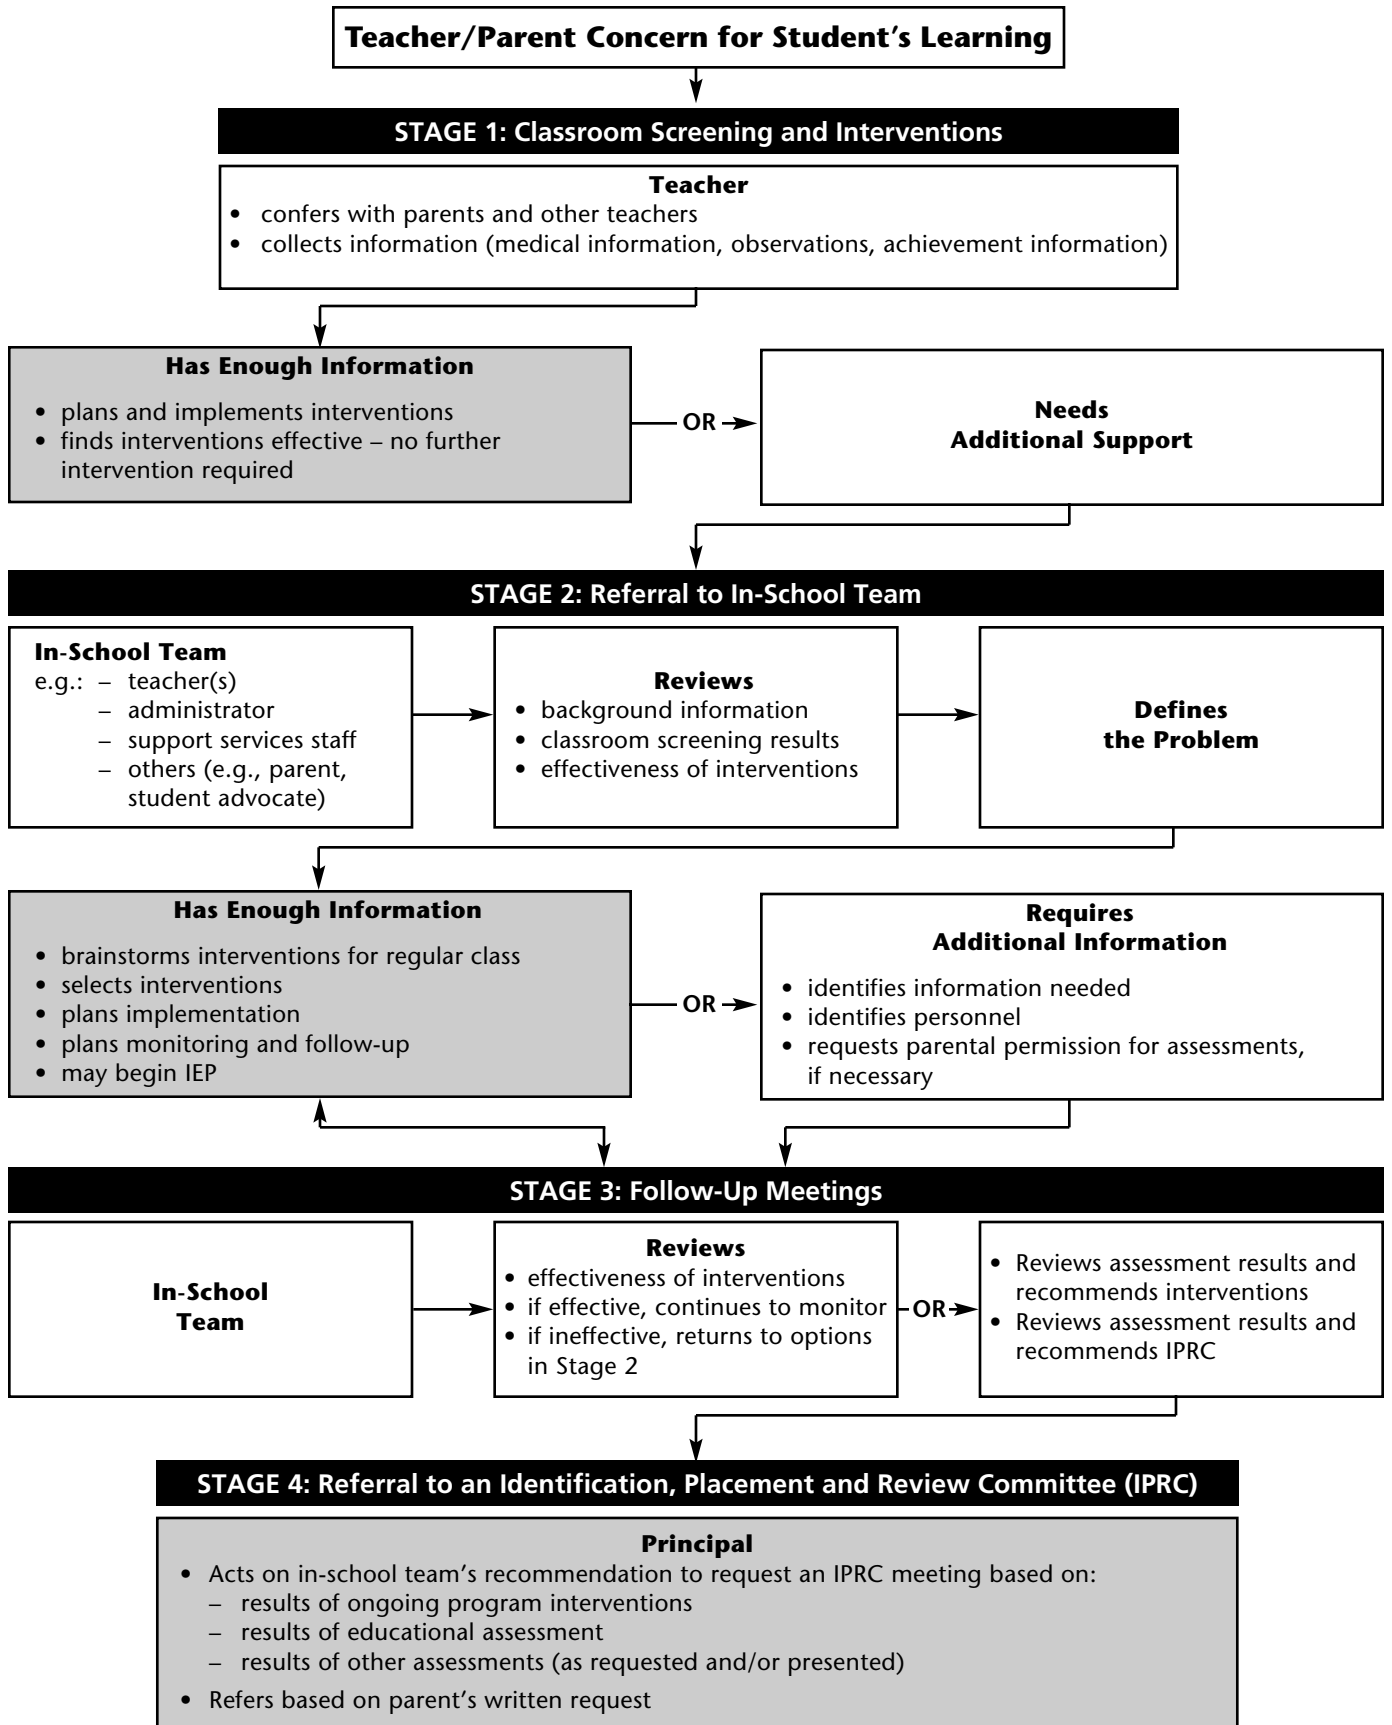

The overall goal of the program-planning process is to enable the student to learn successfully. Decisions about interventions and accommodations to the learning environment are best made at the in-school team meeting. The needs of the individual student, the resources available, and parent and student preferences must all be considered in determining the nature and extent of the interventions and accommodations recommended and provided. The in-school team uses the expertise of its members to make decisions about how to assist the student to achieve to the best of his or her ability. Follow-up monitoring permits the team to build on the student's success and to change the interventions that are not effective.

Stage 3. Follow-Up Meetings of the In-School Team

A student's case may be discussed once or over several meetings of the in-school team, depending upon the student's ongoing or changing needs, the success of school-based problem-solving efforts, and the need for additional information from specialized services.

Usually, a referral is made to an IPRC only after the actions agreed to at the in-school team meeting(s) have been tried and found insufficient. (For further information regarding the school-team support process refer to Figure C.1.) In some cases, however, it may be obvious at the outset that the needs of a child will be best met through an IPRC.

Figure C.1: Stages of the In-School Team Process

Stage 4. Referral to an Identification, Placement and Review Committee (IPRC)

Referral to an IPRC is made by the school principal, usually following a recommendation from the in-school team. A principal must also make a referral on receipt of a written request by a parent.

The in-school team's recommendation is based on:

- the results of ongoing and continuous program interventions;
- an educational assessment;
- additional assessments as requested by the team. (For further information on assessment, refer to pages C16–20 of this guide.)

If a parent submits a written request for referral to an IPRC, the principal must arrange for an IPRC meeting to be set up. (For further information about the IPRC process, refer to Part D of this guide.)

SCHOOL BOARD SUPPORTS

The following types of services may be provided by school board staff:

- educational services;
- other professional services (e.g., speech-language pathologist, psychologist, social worker);
- paraprofessional services (e.g., child/youth worker, developmental assistant).

Educational Services

Educational services may be provided by resource teachers (including special education resource teachers, special education department heads, and itinerant teachers); guidance counsellors; teacher-advisers; school board resource teachers and consultants; and administrators.

School Special Education Resource Teachers

A teacher who has concerns about the results of classroom observations and formal and informal assessments of a student may raise those concerns with the school resource teacher or through the in-school team. Many boards include a special education resource teacher in their staffing model for individual schools. When school boards do provide this support service, special education resource teachers have varied responsibilities, which may include:

- providing support in the regular classroom;
- coordinating referrals to the in-school team;
- assisting the regular classroom teacher in modifying the expectations and providing appropriate accommodations to meet the needs of students;
- conducting educational assessments and observations to identify students' strengths and needs;
- collaborating in the development, implementation, and review of the IEP;
- providing academic support on a withdrawal basis;
- assisting the regular classroom teacher in reporting achievement;
- acting as a liaison with parents and community resources;
- planning additional support with educational (instructional) assistants.

Guidance Counsellors

The ministry document *Choices Into Action: Guidance and Career Education Program Policy for Ontario Elementary and Secondary Schools, 1999* outlines what schools in Ontario are expected to do to help students in Grades 1 to 12 prepare for their adult and working life. It describes some issues exceptional pupils may encounter and the role of the guidance counsellor in helping to meet students' needs.

The guidance counsellor:

- helps to correlate the Individual Education Plan (IEP) (including the transition plan) and the annual education plan (starting in Grade 7) for exceptional students;
- works collaboratively with regular classroom teachers and special education teachers to plan ways of meeting the needs of exceptional pupils;
- establishes and maintains links between elementary and secondary schools and with community partners to coordinate their involvement with the guidance and career education program;
- assists students with the transition to postsecondary education, training, and the workplace.

Teacher-Advisers

The teacher-adviser's role is to help students, including exceptional pupils, to make the transition from elementary to secondary school and to assist them and their parents in making decisions about secondary school courses and future goals. The teacher-adviser program is provided for all students in Grades 7 to 12.

The teacher-adviser:

- helps students to complete and review their annual education plans (AEPs);
- monitors students' academic progress and their progress towards achieving their goals, as outlined in their AEPs;
- helps students to consider their Individual Education Plans in developing their annual education plans;
- encourages students to develop the skills they need to set goals, investigate educational and career opportunities, and monitor their own progress.

If a student needs additional assistance in order to succeed in secondary school or in developing short-term or long-term goals, the teacher-adviser will refer him or her to a guidance counsellor and/or other appropriate staff.

School Board Resource Teachers and Consultants

Some school boards have centrally assigned resource teachers, including itinerant teachers and/or consultants, who are available to assist teachers with assessment and program development and with putting appropriate accommodations in place.

Itinerant resource teachers who provide service to students who are deaf or hard of hearing or blind or who have low vision may also assist classroom teachers with program and classroom accommodations, such as preferential seating and lighting arrangements, and with assessments of students with special needs.

Resource personnel at the Provincial Schools and Demonstration Schools may be a valuable source of information about assessment and programming for teachers with students in their classrooms who are blind, deaf, or deaf-blind, or who have severe learning disabilities. (For further information, refer to Part F, pages F9-12.)

Other Professional Services

The school may sometimes request the assistance of other professionals, such as psychologists, psychological associates, behavioural consultants, social workers, occupational therapists or physiotherapists, speech-language pathologists, and auditory-verbal therapists.

These professionals may assist the teacher and in-school team with:

- observing and interpreting student classroom behaviour;
- assessing students' strengths and needs;
- understanding assessment data and developing appropriate programs;
- providing ongoing direct intervention in the classroom for students in regular or special education settings;
- referring students to outside specialists and agencies when appropriate;
- recommending appropriate medical and community resources to families;
- recommending augmentative communication systems when appropriate.

Such professionals may also provide additional specific information to help identify a student's learning strengths and needs for an Identification, Placement and Review Committee.

Specially trained support services personnel for students who are blind, deaf, or deaf-blind include interpreters, interveners, orientation and mobility instructors, and transcribers. These personnel work with students who require support to develop their communication, academic, and/or vocational skills as fully as possible.

Interpreters

Interpreters are graduates of a college or university interpreter-training program, or the equivalent, who hold, or will obtain within three years, certification by the Association of Visual Language Interpreters of Canada. They are assigned to one or more deaf students for a portion of the time that the students are not receiving direct instruction from a specialist teacher of the deaf. The interpreter may be either an oral interpreter or a sign-language interpreter.

Interveners

Interveners are trained by a specialist teacher of the deaf-blind to communicate with deaf-blind students. They work with a deaf-blind student for the whole of the student's school day to deliver a program designed to meet the individual student's needs. The program is developed by the W. Ross Macdonald School or the Centre Jules-Léger, or by a specialist teacher

employed by the school board who designs the program in consultation with one or both of these schools. Interveners address the implications of combined vision and hearing loss when delivering the student's educational program and support the classroom teacher in delivering the education program.

Orientation and Mobility Instructors

Orientation and mobility instructors hold certification to provide instruction in orientation and mobility to students who are legally blind and can benefit from this type of training. The instructor:

- assesses the needs, skill level, level of conceptual understanding, and competencies of the student;
- prepares an individualized program to meet the student's identified orientation and mobility needs;
- helps the student to develop basic pre-cane skills and sensory skills;
- helps the student to develop safe-travel skills, including:
 - cane techniques;
 - environmental awareness;
 - techniques for using specialized aids;
 - problem-solving skills.

Transcribers

Transcribers may be hired by a school board to transcribe assignments from the classroom teacher and/or specialist teacher of the blind into Braille for the day-to-day educational use of the student.

Paraprofessional Services

Some school boards hire paraprofessionals to work under the supervision of qualified professionals. Paraprofessionals may be hired as teaching assistants, child and youth workers, health care assistants, and so on, to provide a variety of services under the direction and supervision of the teacher and school principal. These services may include:

- assisting the student with personal care;
- providing behaviour-management support;
- providing support for instructional programming.

Volunteers

With appropriate training and effective supervision, volunteers can also make an important contribution in supporting students with special needs. Volunteers take their instructions from, and are responsible to, the principal of the school.

Parents

Responsibility for student learning is shared among the student, the parents, and the teacher. The interest and participation of parents can significantly enhance the student's motivation and ability to succeed. Parents are encouraged to request a meeting with school staff to discuss their child's progress.

The insights and observations of the parents may help the teacher to assess the student's educational skills and identify his or her interests. The student's insights into his or her own strengths and needs are often helpful, as well. Parents may already have had assessments completed by other professionals. Parents are encouraged to share such information with the in-school team, as it may be relevant to discussions about possible educational interventions to help the student.

ASSESSING A STUDENT'S STRENGTHS AND NEEDS

All information gathered about a pupil must be carefully documented and stored in a secure place to ensure that confidentiality is maintained. School board policies regarding the implications of the Municipal Freedom of Information and Protection of Privacy Act must be followed.

Teacher Observation and Data Gathering

Teachers observe the children in their classes every day. They often know when a child is learning or achieving differently from the rest of the class, even in the earliest grades. As soon as a teacher or a parent has a concern regarding a particular student's progress or behaviour, it is important to begin a data-gathering process. This information will be important should the teacher require the assistance of the in-school team.

Assessment is a continuous, complex process that is an integral part of teaching. It is something the teacher does every day, in a variety of informal and formal ways. An assessment provides information about:

- a student's achievement;
- the level of the student's understanding;
- the effectiveness of a particular teaching technique.

Data from this type of assessment are collected primarily for use in program planning. These data help teachers to improve student learning and develop programs appropriate to each student's strengths, interests, needs, and level of functioning. It is as important to identify a student's strengths as it is to determine needs. A teacher can use a student's interest in sports, or love of music, or visual memory to help the student overcome weaknesses or insecurities. For example, a student who loves baseball may find it easier to understand some mathematical concepts if they are presented as examples from baseball (e.g., batting averages).

When teachers observe students, they record many different aspects of a student's behaviour and achievement. In observing the student, teachers may watch for such things as:

- how the student responds to text and non-print alternatives, approaches new tasks, persists with tasks, interacts with others, organizes time and materials, uses language, performs individually and in group activities, and responds to cues (including auditory, visual, and direct and indirect verbal cues);
- how the student responds to the number of people in the immediate area and the behaviour of teachers and support staff, interacts with peers, and responds to authority;
- how the student's learning is affected by environmental variables such as lighting, sound, temperature, the physical arrangement of the classroom, the time of day, and routines and schedules.

Teachers can gain valuable additional information from parents and others who have worked with the student.

If the teacher requires assistance in programming to meet the student's needs, he or she may make a referral to the in-school team or request the support of other professionals. Referring a student for further assessment does not necessarily mean that the student has a special need but may simply indicate that there are areas in which the student might benefit from short-term assistance or in which the teacher might need further programming ideas.

Assessing Students for Whom English Is a Second Language

Because so much depends on a student's fluency in the language of instruction, students who do not speak standard English at home may have difficulty with their work, routines, and social interaction at school. Caution is needed in determining the cause of the student's difficulty. Many school boards employ teachers who provide extra help in English as a second language (ESL) and English literacy development (ELD). Rates of language acquisition vary; for some students it can take considerably longer than for others. Students who are not fluent in standard English should be given English-language experience and support before they can be considered able to manage their schoolwork, routines, and social interaction on their own.

In assessing students for whom English is not a first language and who have possible exceptional needs, such as learning difficulties or gifted abilities, teachers should take the following factors into consideration:

- educational background (e.g., previous school experiences, attendance patterns, languages spoken);
- medical history (e.g., need for hearing or vision testing).

After taking these factors into account, observers may conclude that a student's problems are not due to lack of language fluency and that special education intervention is required.

Educational Assessment

An educational assessment may consist of formal and informal testing. The assessment may include diagnostic and achievement tests that focus on specific areas of academic achievement. Where school staff are concerned about a student's achievement, the teacher should inform the student's parent before such assessments are undertaken. (Depending on the type of assessment, parental consent in writing may be required.)

An educational assessment is required by an IPRC in order to make a decision about identification of a pupil as exceptional or placement of a pupil in a special education program.

Achievement tests provide information about:

- a student's skills;
- a student's skills in comparison to his or her peers;
- the need for a change in the student's program.

Diagnostic tests give information about:

- a student's skills;
- a student's strengths and needs;
- specific areas in the student's program that require adjustment.

After an educational assessment has been completed, the information can be used to make an evaluation, which is a judgement based on the assessment data. **Results from province-wide testing alone should not be used as the basis for a referral to an IPRC.**

Other types of assessments may also be requested by and/or presented to the IPRC in order to assist with decision making. These may include speech and language, health, and psychological assessments. These are described in greater detail below. When such assessments are requested, informed consent must be obtained before the assessments can be done.

Speech and Language Assessment

A speech and language assessment, also known as a communication assessment, is conducted by a speech-language pathologist and may be included as a part of the assessment package for a referral to an IPRC.

A speech and language assessment will:

- provide a professional opinion about the student's communicative ability;
- determine the existence and severity of a communication difficulty and how the difficulty interferes with the educational process;
- determine if communication programming would be appropriate;
- assist in determining an appropriate placement;
- provide screening for referral to an outside agency;
- determine whether a more in-depth assessment is necessary.

The person doing the assessment may:

- administer standardized tests;
- use non-standardized tests (e.g., informal measures such as observation);
- use curriculum/classroom-based procedures;
- confer with parents, outside agencies, and resource teams;
- review materials in the OSR;
- provide and/or obtain professional opinions;
- engage in preventive intervention, when appropriate;
- analyse, interpret, and synthesize information;
- prepare oral and written reports;
- communicate the results to parents and the in-school team.

Health Assessment

A health assessment must be administered by a legally qualified medical practitioner (such as a family doctor) or a medical specialist (such as an audiologist or ophthalmologist). Consent must be obtained before an assessment is carried out.

Psychological Assessment

Under the Regulated Health Professions Act, 1991, and the Psychology Act, 1991, psychological assessments must be conducted by a member of the College of Psychologists (a psychologist or a psychological associate). Most boards employ or have access to psychological services staff who can provide or supervise psychological assessments. When a psychological assessment is requested by either the IPRC or the principal, consent must be obtained before the assessment can be done.

A psychological assessment could include information from a number of sources, including the school staff, the student, and the student's parents, in order to understand the student's characteristics as a learner. Other information that may assist in the analysis includes the results from interviews, consultations, and individual psychological tests. A psychological assessment typically evaluates the student's functioning in the following areas:

- thinking and reasoning;
- perception;
- memory;
- attention;
- social/emotional development; and sometimes
- academic achievement.

A profile of learning strengths and needs is developed from this information and can then be used to guide the formulation of appropriate program adjustments for the learner. A diagnosis is provided where applicable.

Only a registered psychologist or registered psychological associate can provide a diagnosis. When the IPRC identifies the student as exceptional and applies the ministry's definition to describe the exceptionality, it is not diagnosing a condition but merely indicating an educational category. The IPRC identification should not be interpreted as a diagnosis.

Health Care Consent

The Health Care Consent Act (HCCA), 1996, sets out the elements of a valid consent to treatment. These include the following:

- Consent must relate to the treatment.
- Consent must be informed.
- Consent must be given voluntarily.
- Consent must not be obtained through misrepresentation or fraud.

Assessment Information and Confidentiality

School personnel involved in administering specialized assessments must do so in accordance with requirements for protecting confidentiality. For a discussion of legislation regarding confidentiality of information, see Part A, pages A30–32 of this guide.

In the case of certain specialized assessment information that is required to assist in the understanding of the student's profile, the raw data may be determined to be confidential information with restricted access. Several pieces of legislation, including the Copyright Act, the Regulated Health Professions Act (RHPA), and the Municipal Freedom of Information and Protection of Privacy Act (MFIPPA), may limit access to test protocols from educational and psychological tests.

Release of Confidential Information

When a parent obtains a psychological or health or speech and language assessment from an outside institution, agency, or practitioner, he or she may wish to provide this information to the school board. In order for the school board to obtain this information directly from the institution, agency, or practitioner, the parent must sign a consent permitting the institution to release the confidential information to the school. Different institutions may have their own specific forms regarding consent to release information.

When information is sought from an outside agency that falls within the definition of a psychiatric facility under the Mental Health Act, a Form 14 may be required to release this information. Parents need to be aware that the Form 14 will allow disclosure to the school board of the "clinical record" compiled in such a facility. **Because Form 14 was devised for this very specific purpose, it should not be used as a school board consent form for the release of a student's personal/educational information from the student's OSR.** School boards are often asked to release personal information about students, and the expectation is that they should design a form or forms suitable for their purposes. School board forms for consent to release personal information should specify the type of information to be released, to whom it will be released, and the length of time for which the consent is valid. (For examples of such forms, see Appendix 6.)

PROGRAM PLANNING FOR STUDENTS WITH SPECIAL NEEDS

Recognizing the special needs of students and providing programs for them are important aspects of implementing the curriculum. For some students, the appropriate choice of instructional methods and settings will allow them to achieve the expectations. For others, some or all of the expectations will need to be modified. To achieve at their highest possible level, some exceptional pupils may need to participate in special programs.

Curriculum implementation for these students requires:

- careful and perceptive adaptation of courses and programs developed from curriculum guidelines;
- a constant awareness of standards and expectations;
- flexible organizational structures;
- selection of the strategies, resources, activities, and assessment procedures most appropriate to the student's needs;
- accommodation for individual differences;
- an Individual Education Plan (IEP).

For most exceptional pupils, the learning expectations will be the same as or similar to the expectations outlined in the relevant curriculum policy documents. Accommodations such as specialized supports and services may be provided to help the student achieve the expectations. For some exceptional pupils, the curriculum expectations will be modified to meet the student's needs, and a small number of students may require alternative expectations that are not derived from the curriculum expectations. In either case, accommodations to facilitate learning may also be provided. The assessment of student achievement of modified and alternative expectations is discussed in *Ontario Secondary Schools, Grades 9 to 12: Program and Diploma Requirements, 1999* and in *Individual Education Plans: Standards for Development, Program Planning, and Implementation, 2000*.

Steps should be taken by the special education staff to ensure that teachers know where to find information on meeting the needs of exceptional pupils in specific subject areas. In planning instruction and activities and developing course materials, teachers must take into account the strengths, needs, learning expectations, and accommodations identified in the student's IEP. Teachers may find it necessary to make changes in their style of presentation, their methods of organization, the amount and type of material covered, their use of technology and multimedia, and their assessment and evaluation strategies (for example, some students may need to be given additional time to complete tests or the opportunity to take tests orally or in other forms). The assistance of professional and paraprofessional staff and the use of specialized equipment may also be required to accommodate the exceptional pupil's needs.

For students who are receiving special education programs and services and who have an IEP:

- The IEP must identify the student's learning expectations. (Regulation 181/98, subsection 6[3]; *Ontario Secondary Schools, Grades 9 to 12* [OSS]; Ontario curriculum policy documents; and the IEP standards document)
- The IEP will outline how the school will address the student's learning expectations through an appropriate special education program and services and will identify the methods by which the student's progress will be reviewed. The IEPs of students with disabilities who are 14 years of age or older will also contain a plan to help them make the transition to postsecondary education, the workplace, or community living. (Regulation 181/98, subsection 6[4]; OSS; Ontario curriculum policy documents; and the IEP standards document)
- In developing the student's IEP, consideration shall be given to any recommendations made by the IPRC concerning special education programs and services for meeting the student's needs. Also, there shall be consultation with the parents and with the student who is 16 years of age or older. Once the IEP is developed, the parents and the student who is 16 years of age or older must be provided with a copy. (Regulation 181/98, subsections 6[6]–[8]; OSS; Ontario curriculum policy documents; and the IEP standards document)
- Exceptional pupils and students not identified as exceptional but who have an IEP and who are receiving special education programs and services should be given every opportunity to achieve the curriculum expectations set out in the Ontario curriculum policy documents. For most students with an IEP, the curriculum expectations for a course or subject will be the same as the course expectations outlined in the appropriate provincial curriculum document, except that accommodations such as supports or services will be provided to help the student achieve the expectations. Student achievement of these curriculum expectations will be assessed in accordance with the provincial achievement levels and with course-specific assessment information, as described in provincial curriculum policy documents. (OSS)
- For some students with an IEP, curriculum expectations may be modified – that is, they may be derived from the expectations outlined in the curriculum policy document for a grade level, or levels, above or below the student's age-appropriate grade level. At the secondary school level, the principal will determine whether achievement of the modified expectations will indicate successful completion of the course and will decide whether the student is eligible to receive a credit for the course. The principal will communicate this determination to the parents and the student. (OSS)
- A few students may require alternative expectations that are not derived from provincial curriculum policy documents. Student achievement of these alternative expectations is assessed not according to the levels of

achievement in the provincial curriculum policy documents but in relation to the expectations set out in the student's IEP. At the secondary school level, the student will not be granted a credit for the successful completion of a course that consists of alternative expectations. (OSS)

- Assignments and activities must take into account the strengths, needs, goals, learning expectations, and accommodations identified in the student's IEP. Exceptional pupils may require an individual program that differs in content, process, and evaluation strategies from the program of most other students. Accommodations may include reducing the workload, simplifying tasks and materials, and providing more time for learning and the completion of activities. The assistance of professional and paraprofessional staff and the use of personalized equipment may also be required to accommodate the student's needs.

REPORTING ACHIEVEMENT

The Assessment and Evaluation of Student Achievement

The assessment and evaluation of student achievement is intended to improve learning for each student. Teachers should ensure that their assessment and evaluation strategies and procedures are designed to measure how and what students learn, that they are varied in nature and administered over a period of time, and that they are communicated clearly to students and parents. Teachers should also provide accommodations to assessment and evaluation strategies to meet the needs of exceptional pupils. The Individual Education Plan (IEP) of a student with special needs must include a statement of the student's learning expectations and the methods by which the student's progress will be reviewed.

Classroom assessments are designed to gather information related to the student's learning expectations and other goals set out in their IEP. Where the expectations are the same as or modified from those in the curriculum policy documents (e.g., are those of a lower grade or are modified in some other way from the regular expectations), the student's achievement is assessed in accordance with the assessment policies given in the curriculum policy documents. When the learning expectations are not derived from the curriculum documents, the student's achievement is measured in relation to the expectations in the IEP. Both qualitative and quantitative approaches should be used in assessing student achievement. Teachers may use such strategies as oral questioning, tests, and examinations and may review student products, performances, work samples, audiotapes, videotapes, and portfolios to determine how well an individual student is doing. Assessment and evaluation of student achievement provide teachers with an opportunity to think critically about their methods of instruction and the overall effectiveness of their program. Teachers will report on student achievement based on the data collected in the process of assessment.

The Reporting of Student Achievement

The Provincial Report Card is only one among several means used by teachers for reporting student achievement to parents. Communication with parents about the student's progress should be continuous throughout the school year and may include, in addition to the report card, parent-student-teacher conferences, interviews, phone calls, and informal reports. Samples of student work can be used as the basis for discussions with parents about student progress.

The student's achievement of the goals and expectations identified in the IEP must be reflected in his or her report card. Reporting progress for students who are identified as exceptional or who have special needs and are receiving special education programs and services will be done in accordance with the procedures outlined in the *Guide to the Provincial Report Card, Grades 1-8, 1998* and the *Guide to the Provincial Report Card, Grades 9-12, 1999*.

Guide to the Provincial Report Card, Grades 1–8, 1998

For students in Grades 1 to 8, if the student has an IEP that applies to a particular strand/subject, teachers should check the IEP box for that subject. If the expectations in the IEP are based on *The Ontario Curriculum, Grades 1–8* but vary from the expectations of the regular program for the grade, teachers must include the following statement in the "Strengths/Weaknesses/Next Steps" section: **"The (grade/mark) for (strand/subject) is based on achievement of the expectations in the IEP, which vary from the Grade ___ expectations."**

Teachers are not required to check the IEP boxes for students requiring only accommodations.

In very few instances, where none of the expectations in *The Ontario Curriculum, Grades 1–8* form the basis of the student's program, an alternative format may be used to report achievement (e.g., the evaluation section of the IEP). Teachers should indicate the student's achievement relative to the expectations identified in the IEP and should comment on strengths, weaknesses, and next steps. Page 3 of the report card is recommended for student use wherever possible.

Guide to the Provincial Report Card, Grades 9–12, 1999

For students in Grades 9 to 12, if the student has an IEP, teachers should check the IEP box for every course to which the plan applies. Teachers are not required to check the IEP boxes for students requiring only accommodations.

If some of the student's learning expectations for a course are modified from the curriculum expectations but the student is working towards a credit for the course, it is sufficient simply to check the IEP box. If, however, the student's learning expectations are modified to such an extent that the principal deems that a credit will not be granted for the course (see section 7.12 of *Ontario Secondary Schools, Grades 9 to 12: Program and Diploma Requirements, 1999*) or if the expectations are alternatives to the curriculum expectations, teachers must include the following statement in the "Comments" section (along with comments about the student's achievement): **"This percentage grade is based on achievement of the expectations specified in the IEP, which differ significantly from the curriculum expectations for the course."**

If the student is not working towards a credit in the course, teachers should enter a zero (0) in the "Credit Earned" column.

In the very few instances where none of the student's learning expectations are derived from the curriculum expectations, an alternative format may be used to record achievement (e.g., the evaluation section of the IEP). When using such a format, teachers should indicate the student's achievement relative to the expectations set out in the IEP and comment on strengths, areas for improvement, and next steps.

Wherever possible, students should be encouraged to complete the "Response Form". (See *Guide to the Provincial Report Card, Grades 9–12, 1999*.)

Parents of students who have an IEP should have a clear understanding of the learning expectations that make up the student's program. Although parents must receive a copy of the IEP when it is first developed and should receive copies of modified versions, boards may also choose to attach a copy to the student's report card.

Provincial Assessment

The Education Quality and Accountability Office (EQAO) expects all students in publicly funded schools to participate in provincial assessments of reading, writing, and mathematics in Grades 3, 6, and 9.

Students who entered Grade 9 in 2000–2001 or subsequent years and who are working towards an Ontario Secondary School Diploma (OSSD) under *Ontario Secondary Schools, Grades 9 to 12: Program and Diploma Requirements, 1999* (OSS) must successfully complete the Ontario Secondary School Literacy Test (OSSLT) in order to earn the OSSD.

Students working towards the OSSD will normally take the literacy test in Grade 10. Students who do not take the test in the year following the year in which they entered Grade 9 will require a deferral or an exemption, in accordance with Ministry of Education Policy/Program Memorandum (PPM) No. 127.

For more information on the tests and on possible accommodations, deferrals, and exemptions, see PPM No. 127 and visit the EQAO website, at www.eqao.com.

Accommodating Students With Special Needs

An underlying principle in education in Ontario is that students with special needs are to be accommodated. Teachers and principals must make every effort to enable students with special needs to participate with their peers in all aspects of a provincial assessment in order to demonstrate the full extent of their learning. In rare cases, a student may require an exemption from a specific portion of the assessment or from the entire assessment unit.

A student who has been identified through an Identification, Placement and Review Committee (IPRC) process – or even one who has not been formally identified but who is receiving special education programs and services – may be considered for accommodations. The accommodations permitted are, with some exceptions, generally the same as those set out in the student's IEP.

Deferrals from the Secondary School Literacy Test

At the secondary level, the principal, in consultation with the parents, adult student, and appropriate school staff, may decide to have the student defer writing the provincial secondary school literacy test.

Exempting Students With Special Needs

An exemption may be considered if the full range of permitted accommodations has been considered and it is determined that the student still would not be able to provide evidence of learning under these conditions. The decision about any exemption must always be made on an individual basis.

Please see the annual EQAO instructions regarding the exemption policy.

TRANSITIONS: IDEAS FOR SUCCESSFUL PRACTICE

Introduction

Transitions from home to school, from one grade or level of schooling to another, from one school to another, and from school to work can be difficult and confusing for exceptional pupils and their families. A coordinated plan that forms part of the student's IEP and is implemented well before any anticipated move can ensure that the student has supports in place to lessen apprehension about the transition.

The key transition periods in a student's schooling are:

- entry to school;
- a change from one division or school to another;
- the move from elementary to secondary school;
- the transition from secondary school to postsecondary activities.

Information about planning for a child's initial entry to school may be found on pages C3–4. Information about the transition to secondary school and from secondary school to postsecondary education or work forms part of the student's annual education plan (see *Choices Into Action*).

Preschool-to-School Transitions

Because children arrive at school with different backgrounds and experiences and at different stages of development, planning for transition to school should begin early to ensure that each child can make as smooth a transition as possible. As part of the transition process, the learning needs of all children should be identified initially through the board's early identification procedures. These procedures, which are part of a continuous assessment and program planning process, ensure that educational programs are designed to accommodate each child's learning needs and to facilitate his or her growth and development.

A successful transition to school depends on the ability of all those involved to communicate effectively and to share information about the child. Teachers, early childhood educators, members of the community, and families must work together to provide constructive and consistent learning experiences that will build students' confidence, encourage them to continue to see learning as both enjoyable and useful, and provide a strong foundation for their future intellectual, physical, and social development. Any exchange of information must be in accordance with freedom of information legislation and appropriate regard for confidentiality.

School-to-School Transitions

Because of program considerations or relocation of the family, many students change schools. Whether the move is within the same school board or to another board, the transition can be made smoother with advance planning. Planning for a smooth transition is particularly important with exceptional pupils. To the extent allowed under the Municipal Freedom of Information and Protection of Privacy Act and *The Ontario Student Record (OSR): Guideline, 2000*, all pertinent information about the student should be shared with the receiving school prior to the student's arrival so that appropriate supports are in place. Boards should use any assessments available from the originating board. Doing so may make it easier to achieve consistency of programming across the province.

The IEP should be stored in the OSR for transfer to the new school. In this way, any relevant medical information and details of special education services and of the student's strengths, needs, and specific learning expectations are immediately available at the new school for use in planning the student's program.

Transition to School From Care and Treatment Facilities and Correctional Facilities

Where the staff in the facility agree and ongoing assessment indicates the readiness of the child/youth, admission to a school of a board may be appropriate. The facility and the school board providing the educational program are strongly encouraged to work together with community agencies and the receiving school to create a plan for the successful transition of the student. Until the end of the transition period (usually a few weeks to a few months), the child/youth should remain on the facility register. A child/youth must not be included on the register of a facility and the register of a day school at the same time.

Various educational alternatives may need to be considered to facilitate the integration of a student into a new educational setting. The plan may provide for:

- gradual integration;
- sharing of documentation and records and regular communication with parents;
- adjustment of the education program and, in the case of secondary students, opportunities to gain partial credits.

Suggested procedures for transfer from a facility to a local school should be specified as part of the agreement between the school board and the facility.

Upon the student's enrolment in the school, especially if a referral is made to an IPRC, the facility staff should participate in discussions about placement.

(For further information, see *Guidelines for Regional Office Approval of Educational Programs Provided in Government-Approved Care, Treatment, Custodial and Correctional Facilities, 1995* and the accompanying [2000] memorandum, COGA97-4.)

Transition to School Following Prolonged Medical Absence

Depending on the medical condition, advance preparation with staff and students could be helpful in terms of awareness and sensitivity to the student's needs. It will be essential to discuss the transition with parents and, after proper consent is obtained, with medical personnel who have been involved with the child/youth. Organizations that support persons with the particular medical condition may be able to provide useful in-service training for teachers and other school staff.

The focus should be on meeting the needs of the student. The following strategies may be helpful:

- arranging for remedial sessions for the student after initial assessments of level of functioning are completed;
- setting up a buddy system to ease the student's adjustment to school life;
- shortening the school day, at least initially, for the benefit of the student. In some cases where endurance is a problem, and if the student has been identified as exceptional, this may be helpful. Shortening the instructional day for an exceptional pupil is authorized by R.R.O. 1990, Regulation 298, subsection 3(3). This option should be exercised only when it is in the student's best interest to do so.

Transition From Elementary to Secondary School

It is expected that, as a general rule, exceptional pupils will proceed to secondary school within two years of the average age for entering secondary school. However, it is recognized that there may be some exceptional pupils who will need additional time at the elementary school level to prepare for secondary school. There may also be some school boards that do not yet have secondary school programs that are suitably modified to meet the needs of all exceptional pupils. School boards should have plans to develop appropriate secondary school programs that will meet the needs of their exceptional pupils. (See *Ontario Secondary Schools, Grades 9 to 12: Program and Diploma Requirements, 1999*.)

Transition From Secondary to Postsecondary Education

In accordance with Regulation 181/98, where the exceptional pupil is 14 years of age or older (except for gifted students, unless they have other exceptionalities), the IEP must include a plan for transition to appropriate postsecondary activities, such as work, further education, and/or community

living. In developing a transition plan, the principal must consult with the parent or the student, if the student is age 16 or older, and with such community agencies as the principal considers appropriate. The plan should reflect the student's needs and goals for the future. It should assist the student to obtain the support(s) necessary to achieve educational and vocational goals by ensuring the coordination and sharing of information between the school and postsecondary educational institutions.

The transition plan may also identify additional successful instructional strategies and appropriate resources and settings that should be provided for the student. A carefully developed transition plan will specify the supports and services necessary to enable the student to be successful. Once the student is 14 years of age, his or her annual education plan should be coordinated with the transition plan. While boards may develop transition plans for gifted students, it is expected that the career planning needs of these students will be sufficiently addressed through the development of their annual education plans.

Guidance counsellors in secondary schools are knowledgeable about postsecondary institutions and the services they offer to exceptional pupils. The student and his or her parents should work with the secondary school guidance office to ensure that the most appropriate choices are made. Valuable links can be established with the college or university before the student arrives at the institution. In fact, with the consent of the student, many guidance offices telephone ahead about particular students to inform the postsecondary institution about special needs, in order to ensure as smooth a start as possible. In disclosing such information, guidance counsellors must be aware of legal requirements with respect to consent. Some students may prefer not to disclose information about their special needs.

The secondary school guidance office staff can play a role in modelling behaviours the student will find useful. For instance, when contact is made with the postsecondary institution, the guidance counsellor might make the calls with the student present, after having drawn up a list of required information in collaboration with the student. The student will also find it useful to do research on the skills that are necessary for particular courses.

It is important to establish a link for the student with someone who can provide help with a variety of "settling in" activities. For instance, in the early stages, the student may need assistance in dealing with the Ontario Student Assistance Program (OSAP) or performing a variety of necessary tasks (such as buying texts, finding living accommodation, and sorting out a new timetable) within a short period of time.

It is at this stage that the student's skills in self-advocacy are especially important. Often at the intake interviews, questions are asked about previous special education assistance and/or special assessments that have been done. If the student has collected a profile of information, this would be a good time to share it. An example of such a profile, the Learning and

Employment Assessment Profile (LEAP), is available for use with groups, through the Learning Disabilities Association. A facilitators' manual is also available.

Community colleges offer special programs for exceptional pupils. For instance, the Toronto area has an AIMS (Academic Improvement and Monitoring Service) program through which students can receive early assistance. The program is primarily for at-risk students, but is open to all.

Transition From Secondary School to the World of Work

In many cases, strategies used to smooth transitions from secondary school to other destinations are also effective for the transition to work. The new employer may use strategies suggested by a teacher or guidance office staff to assist the new employee in making a good transition. In particular, the assignment of another employee to act as a buddy/orientation guide can ease the adjustment.

The student services department/guidance office of the secondary school should provide students with information about job search and job application strategies, interview skills, and post-interview follow-up procedures.

The student should accept responsibility for acquiring the knowledge and skills required in the new setting and adapting his or her skills to the requirements of the job. If some skills are underdeveloped and the student is still interested in the position, he or she should have a plan for gaining the missing knowledge or skills through such things as additional courses, reading, or job-shadowing.

A good mentor can be a valuable asset to a student making the adjustment to a work setting.

Self-advocacy is very important, as well. The student should be able to suggest strategies that will address potential problems, perhaps indicating accommodations that have been effective in the past.

INTRODUCTION

This part of the guide outlines the steps taken by an Identification, Placement and Review Committee (IPRC) during the process of identifying a student as exceptional and deciding the student's placement. It also outlines the procedures for appealing decisions, sets out the regulatory requirements for the IPRC, and provides advice that is intended to help school board personnel and parents during the IPRC process.

Where applicable, the relevant sections of Regulation 181/98 have been reproduced in the lefthand margin of this part. The regulation is reproduced in its entirety in Appendix 10 of this guide.

THE IDENTIFICATION AND PLACEMENT OF EXCEPTIONAL PUPILS

Regulation 181/98,* section 10 and subsections 11 (1) and (2)

10. Each board shall, in accordance with section 11, establish one or more committees for the identification and placement of exceptional pupils, determine the jurisdiction of each committee and establish the manner of selecting the chair of each committee.
11. (1) A board shall appoint three or more persons to each committee that it establishes.
- (2) The board shall appoint, as one of the members of each committee,
- (a) a principal employed by the board;
 - (b) a supervisory officer employed by the board under Part XI of the Act; or
 - (c) a supervisory officer whose services are used by the board under Part XI of the Act.

*** Unless otherwise noted, all sections, subsections, and clauses printed in the margins of this part of the guide are from Regulation 181/98 and, where indicated, Regulation 137/01.**

The IPRC

Regulation 181/98 requires that all school boards establish one or more Identification, Placement and Review Committees (IPRCs). The IPRC meets and decides if a student should be identified as an exceptional pupil and, if so, the placement that will best meet the student's needs. An IPRC is composed of at least three persons, one of whom must be a principal or supervisory officer of the board. A school board trustee may not be on the IPRC.

All the details pertaining to the IPRC must be contained in the school board's special education plan (see pages A8 and A14 of this guide).

The Role of the IPRC

The IPRC will:

- invite the parents and the student (if 16 years of age or older) to attend the meeting;
- review relevant information about the student;
- describe the student's strengths and needs;
- decide whether or not the student should be identified as an exceptional pupil;
- identify the area(s) of the student's exceptionality(ies), according to the categories and definitions of exceptionality provided by the Ministry of Education;
- decide an appropriate placement for the student;
- provide reasons for placement if deciding for placement in a special class;
- discuss proposals for special education programs and services if the parent or the student age 16 or over requests it;
- review the identification and placement at least once in each school year, unless the parent gives written notice dispensing with the review.

Any student enrolled at a school has the right to an IPRC, irrespective of the grade the child is in (including Junior Kindergarten and Kindergarten). Once the child is enrolled, the parents have the right to request a meeting with the IPRC.

Subsection 14(1)

14. (1) The principal of the school at which a pupil is enrolled,
- (a) may on written notice to a parent of the pupil; and
 - (b) shall at the written request of a parent of the pupil,
- refer the pupil to a committee established by the board, for a decision as to whether the pupil should be identified as an exceptional pupil and, if so, what the placement of the pupil should be.

Section 4

4. A person or body required by this Regulation to communicate in writing to a parent or pupil shall, at the request of the parent or pupil, use a braille, large print or audio-cassette format for the communication.

Subsection 5(5)

5. (5) At least 10 days in advance of a meeting of a committee or special education appeal board, the chair of the committee or board shall give written notice of the time and place of the meeting to a parent of the pupil and, where the pupil is 16 years of age or older, the pupil.

Requesting an IPRC Meeting

The principal of the student's school:

- must refer the student to an IPRC, upon receiving a written request from the parent;
- may, with written notice to the parent, refer the student to an IPRC (for example, if the principal and the student's teacher[s] believe that the student may have needs that require the provision of a special education program and/or services).

This means that, if a parent makes a written request for an IPRC, the principal must follow the board procedure in arranging for the IPRC meeting. Neither the board nor the principal can deny this request.

The regulation states that within 15 days of receiving a written request, or giving the parent notice, the principal must provide to the parent:

- an acknowledgement of the parent's request (if the IPRC is being convened at parental request);
- a copy of the board's Parents' Guide (see pages D6-7) to special education;
- a written statement indicating approximately when the IPRC will meet.

Communication with the parent or student about the IPRC meeting and its results must be provided through Braille, large print, or audio-cassette formats upon request.

Notice of the IPRC Meeting

Each school board has its own procedures for inviting parents to attend the IPRC meeting. Many boards find it helpful to contact parents by telephone and follow up with a letter of invitation.

At least 10 days before the meeting, the chair of the IPRC must send the parent written notification of the meeting. This letter will provide information about the date, time, and place of the meeting, and should ask the parent to indicate whether he or she will attend. Parents should be encouraged to attend. They should also be informed that they have the right to:

- be present at and participate in all committee discussions about the pupil;
- be present when the committee makes its decision about identification and placement;
- have a representative present to speak on their behalf or otherwise support them.

Subsection 15 (8)

15. (8) As soon as possible after the chair of the committee obtains any information relating to the pupil, the chair shall provide the information to,
- (a) a parent of the pupil; and
 - (b) the pupil, where the pupil is 16 years of age or older.

Subsections 13 (1) and (2)

13. (1) Each board shall prepare a guide for the use and information of parents and pupils that,
- (a) explains the function of a committee on a referral under Part IV and on a review under Part V;
 - (b) outlines the procedures set out in this Regulation or established under section 12 that a committee must follow in identifying a pupil as exceptional and in deciding the pupil's placement;
 - (c) explains the committee's duty to describe the pupil's strengths and needs and to include, in its statement of decision, the categories and definitions of any exceptionalities it identifies;
 - (d) explains the function of a special education appeal board under Part VI and the right of parents to appeal committee decisions to it;
 - (e) lists the parent organizations that are, to the best of the board's knowledge, local associations of the board, within the meaning of Ontario Regulation 464/97;
 - (f) includes the names, addresses and telephone numbers of the provincial and demonstration schools in Ontario;
 - (g) indicates the extent to which the board provides special education programs and special education services and the extent to which it purchases those programs and services from another board;

Every effort should be made to accommodate the parents' schedule. If no reply to the notice of the meeting is received by two or three days before the established date, the principal should contact the parents directly by telephone. At this time, the principal may also wish to verify whether the parents have received, read, and understood the Parents' Guide (see Appendix 7).

The parent (or student 16 years or older) must receive the same information about the student that the chair of the IPRC has received. This is to be sent out as soon as possible after the chair has received it.

The Parents' Guide

Once an IPRC has been requested, parents must be provided with a Parents' Guide so that they are informed about the IPRC and the decision-making process.

Regulation 181/98 requires each school board to prepare a Parents' Guide to special education. This guide will provide information concerning:

- the function of the IPRC and the IPRC review;
- the procedure for identifying a student as exceptional and for deciding the student's placement;
- the IPRC's duty to describe the student's strengths and needs;
- the IPRC's duty to include the student's exceptionality and the category and definition of that exceptionality in its statement of decision;
- the function of a special education appeal board and the parent's right to appeal the decision of the IPRC to such a board;
- the names, addresses, and telephone numbers of the Provincial and Demonstration Schools;
- whether and to what extent the school board purchases special education programs from another school board;
- a list of local parents' organizations eligible to be on a Special Education Advisory Committee (SEAC);
- the information that an IPRC placement decision cannot be implemented unless a parent has consented to the decision or has not filed a notice of appeal within the required time limit.

All parents should be informed by means of an item in the school newsletter, or by other appropriate means, at least once each year, of the availability of the school board's Par-

- (h) explains that no committee placement decision can be implemented unless,
 - (i) a parent has consented to the decision, or
 - (ii) the time limit for filing a notice of appeal in respect of the decision has expired and no such notice has been filed.
- (2) The board shall ensure that copies of the guide are available at each school in the board's jurisdiction and at the board's head office and shall provide a copy to the appropriate district office of the Ministry.

Section 9

- 9. (1) In accordance with requirements under the *Education Act*, no pupil is to be denied an education program pending a meeting or decision under this Regulation.
- (2) Where an education program is provided to a pupil pending a meeting or decision under this Regulation,
 - (a) the program must be appropriate to the pupil's apparent strengths and needs;
 - (b) the placement for the program must be consistent with the principles underlying section 17; and
 - (c) appropriate education services must be provided to meet the pupil's apparent needs.

Subsection 5(1)

- 5. (1) A parent of a pupil and, where the pupil is 16 years of age or older, the pupil, are entitled,
 - (a) to be present at and participate in all committee discussions about the pupil; and
 - (b) to be present when the committee's identification and placement decisions are made.

Subsections 5 (3) and (4)

- 5. (3) A person who has a right under subsection (1) or (2) to participate in a discussion also has the right to have a representative present at the discussion, to speak on behalf of the person or otherwise support the person.

ents' Guide to the IPRC process. At the same time, parents should also be informed of their right to request that their child be referred to an IPRC.

The Parents' Guide must be made available in Braille, large print, or audio-cassette format upon request of the parent or student. Copies of the Parents' Guide must be available at every school, head office of the school board, and local district office of the ministry.

A sample Parents' Guide is provided in Appendix 7.

A Delayed IPRC Meeting

No student is to be denied any special education program pending an IPRC meeting or decision. If there is a delay in holding the IPRC meeting or in determining identification and placement, a special education program and special education services appropriate to the student's apparent strengths and needs must be provided for the student in the interim. For example, where a parent registers a child in the spring for first-time attendance at school in the fall, the IPRC would be held after the student has started school in the fall. Where the parents and board staff agree that the student could benefit from a special education program and/or services, a case conference with the appropriate people present could be held in the spring to discuss the child's programming and service needs. These can be provided to the child in September prior to an IPRC meeting.

Attending the IPRC Meeting

Regulation 181/98 entitles parents and students 16 years of age or older to be present at and participate in all committee discussions about the student and to be present when the committee's identification and placement decision is made.

In addition to the three people that constitute an IPRC, other people may attend the IPRC meeting, including:

- the principal of the student's school (if not already a member of the IPRC);
- resource people such as the student's teacher, special education staff, board support staff, or other professionals who may be needed to provide further information or clarification;
- a representative of the parent or the student 16 years of age or older – that is, a person who may provide support for or speak on behalf of the parent or student;

(4) A person who has a right under clause (1) (b) to be present also has the right to have a representative present to support the person.

- an interpreter (including a sign-language interpreter), if one is required;
- other individuals whose presence is requested by either the parent or the principal of the student's school (subject to the agreement of the IPRC chair).

Recording the IPRC Meeting

The IPRC chair, members, parents, and the student may make notes during the IPRC meeting. The board may want to keep a formal record of the meeting for possible future use at an appeal.

There is no requirement in Regulation 181/98 for a transcript or any other record of an IPRC meeting to be prepared. If anyone wishes to arrange for some form of record of the meeting, this should be discussed at the earliest opportunity with the IPRC chair and the other people attending the meeting.

Prior to the IPRC Meeting

Some time prior to the IPRC meeting, it is advisable that a staff member arrange to meet with the parents for a preliminary discussion in order to:

- make sure parents understand their rights concerning the IPRC, as explained in the Parents' Guide;
- review the results of educational and other assessments that were conducted with the student;
- outline the agenda for the IPRC meeting;
- explain the recommendations that will be made by the school staff;
- discuss the possible decisions the IPRC might make;
- answer any questions.

The IPRC Meeting

It is the responsibility of IPRC members to set an informal and welcoming tone for the meeting. It is good practice for the IPRC chair to:

- introduce all those attending the meeting and explain their reason for being present;
- explain the purpose of the meeting;
- ensure that all participants feel that their contributions are valued.

Teachers are likely to be asked questions about the student's achievement, progress, behaviour, assessment results, and potential response to a change in placement.

Subsections 15 (1) to (7)

15. (1) A committee that has received a referral under section 14 shall obtain and consider an educational assessment of the pupil.

(2) Subject to the *Health Care Consent Act, 1996*, the committee shall also obtain and consider a health assessment of the pupil by a qualified medical practitioner if the committee determines that the assessment is required to enable it to make a correct identification or placement decision.

(3) Subject to the *Health Care Consent Act, 1996*, the committee shall also obtain and consider a psychological assessment of the pupil if the committee determines that the assessment is required to enable it to make a correct identification or placement decision.

(4) Where the committee determines that it would be useful to do so and the pupil is less than 16 years of age, the committee shall, with the consent of a parent, interview the pupil.

(5) A parent of the pupil has a right to be present at the interview.

(6) The committee shall also consider any information about the pupil submitted to it by a parent of the pupil and, where the pupil is 16 years of age or older, the pupil.

(7) In addition to complying with this section, the committee shall consider any information submitted to it that it considers relevant.

Subsections 16 (1) and (2)

16. (1) The committee may discuss any proposal for special education services or special education programs and shall do so at the request of a parent or a pupil who is 16 years of age or older.

(2) The committee may make recommendations regarding special education programs and special education services.

Parents, and students aged 16 or over, must be given the opportunity to have a representative with them if they wish, and to offer information and ask questions.

The IPRC will review all available information about the student. The committee will:

- consider an educational assessment;
- obtain, subject to the provisions of the *Health Care Consent Act, 1996*, and consider a health or psychological assessment, if it is believed that such an assessment is required to make a correct identification or placement decision;
- interview the student, with the parent's permission, if the child is less than 16 years of age and the committee members feel it would be useful to do so;
- consider any information about the student submitted by the parent, or by the student where he or she is 16 years of age or older.

The committee may discuss and make recommendations regarding special education programs and services for the student. Committee members will discuss any such proposal at the parent's request, or at the request of a student who is 16 years of age or older.

Parents and students should be encouraged to ask questions and participate in the discussion.

Section 17

17. (1) When making a placement decision on a referral under section 14, the committee shall, before considering the option of placement in a special education class, consider whether placement in a regular class, with appropriate special education services,
- (a) would meet the pupil's needs; and
 - (b) is consistent with parental preferences.
- (2) If, after considering all of the information obtained by it or submitted to it under section 15 that it considers relevant, the committee is satisfied that placement in a regular class would meet the pupil's needs and is consistent with parental preferences, the committee shall decide in favour of placement in a regular class.

In the Supreme Court of Canada decision *Eaton v Brant County Board of Education* (Oct. 9, 1996), the court concluded as follows:

- Integration is to be considered the norm.
- The existing IPRC process is confirmed.
- There is to be no presumption of integration.
- The test to be used to decide placement is whether the placement is in “the best interests of the child”.
- The child's individual needs must be examined.
- The child's needs must be accommodated.

Other factors to be considered are:

- the child's views
- the parents' views

Clause 18(2)(c)

18. (2) (c) where the committee has decided that the pupil should be placed in a special education class, [it must] state the reasons for that decision.

In a memorandum dated June 9, 1994, to directors of education, superintendents of special education, and principals, the ministry stated that:

The Ministry of Education and Training remains committed to the principle that the integration of exceptional pupils should be the normal practice in Ontario, when such a placement meets the pupil's needs and is in accordance with parental wishes. A range of options including placement in a special class or Provincial or Demonstration School will continue to be available for pupils whose needs cannot be met within the regular classroom.

The IPRC Placement Decision

Before the IPRC considers placement of the student in a special education class, Regulation 181/98 requires it to consider placement in a regular class with appropriate special education services. If, after considering all of the information presented to it, the IPRC is satisfied that placement in a regular class would meet the student's needs and is consistent with parental preferences, the committee will decide in favour of placement in a regular class with appropriate special education services.

If the committee decides that the student should be placed in a special education class, it must give reasons in its written statement of decision.

In making its placement decision, the IPRC may consider a range of options, such as:

- ***A regular class with indirect support.*** The student is placed in a regular class for the entire day, and the teacher receives specialized consultative services.
- ***A regular class with resource assistance.*** The student is placed in the regular class for most or all of the day and receives specialized instruction, individually or in a small group, within the regular classroom from a qualified special education teacher.

- ***A regular class with withdrawal assistance.*** The student is placed in the regular class and receives instruction outside of the classroom for less than 50 per cent of the school day, from a qualified special education teacher.
- ***A special education class with partial integration.*** The student is placed by the IPRC in a special education class where the student-teacher ratio conforms to Regulation 298, section 31, for at least 50 per cent of the school day, but is integrated with a regular class for at least one instructional period daily.
- ***A special education class full time.*** The student is placed by the IPRC in a special education class, where the student-teacher ratio conforms to Regulation 298, section 31, for the entire school day.

Other options than these exist to meet the student's needs, and parents and board staff are encouraged to explore them. For example, there may be a need to apply for admission to:

- a Provincial School for students who are blind, deaf, or deaf-blind or a provincial Demonstration School for students who have severe learning disabilities;
- a facility that provides the necessary care or treatment appropriate to the student's condition.

Applications to Provincial Schools and provincial Demonstration Schools are coordinated and submitted by the school board. Applications to care and treatment facilities are made by the parent directly to the facility, although school board staff may be able to assist in gathering the appropriate documentation.

The IPRC Statement of Decision

After all the information has been presented, considered, and discussed, the committee will make its decision about identification and placement. The committee need not make its determination at the IPRC meeting. It may reserve its decision (for example, pending the receipt of further information). However, parents (and students aged 16 or over) are entitled to be present whenever the IPRC makes its decision.

Subsection 18(2)

18. (2) In the case of a referral by a principal under subsection 14 (1), the statement of decision shall,
- (a) state whether the committee has identified the pupil as an exceptional pupil;
 - (b) where the committee has identified the pupil as an exceptional pupil, include,
 - (i) the committee's description of the pupil's strengths and needs,
 - (ii) the categories and definitions of any exceptionalities identified by the committee,
 - (iii) the committee's placement decision, and
 - (iv) the committee's recommendation under subsection 16 (2), if any; and
 - (c) where the committee has decided that the pupil should be placed in a special education class, state the reasons for that decision.

Section 20

20. (1) A board shall implement a placement decision made by a committee under this Part when one of the following two events occurs:
1. A parent of the pupil consents in writing to the placement.
 2. The time period provided in subsection 26 (2) for filing a notice of appeal from the decision expires without a notice of appeal being filed.
- (2) The board shall implement a placement decision made by a committee under this Part as soon as possible after an event described in paragraph 1 or 2 of subsection (1) occurs.
- (3) A board that, without the written consent of a parent of the pupil, implements a placement decision made by a committee under this Part shall give written notice of the implementation to a parent of the pupil.

The IPRC's written statement of decision will:

- state whether the IPRC has identified the student as exceptional;
- where the IPRC has identified the student as exceptional, include:
 - the categories and definitions of any exceptionalities identified;
 - the IPRC's description of the student's strengths and needs;
 - the IPRC's placement decision;
 - the IPRC's recommendations regarding a special education program and special education services, if any; and
- give reasons for placing the student in a special education class, where that is the IPRC's decision.

Many boards find it helpful to develop a form to record the decision of the meeting. This form may become the statement of decision, as long as it contains the information listed above. It also usually lists:

- the names of the committee members present;
- the names of other persons present;
- the titles of the documents considered;
- the process available to parents if they do not agree with the IPRC's decision.

Parental Consent

The board will implement the placement decision either after the parent consents to it or, if the parent does not consent but does not wish to appeal the decision, after the time limit for an appeal has expired.

Although the regulation requires that the consent be written, it does not specify the form of consent. Many school boards have a policy of asking the parent to sign his or her name to the statement of decision to indicate agreement with the committee's identification and placement decision. The statement of decision may be signed at the IPRC meeting or taken home and returned. Parents should be encouraged to give serious consideration to their child's identification and placement prior to signing the IPRC form.

Subsection 18(1)

18. (1) As soon as possible after making its decisions on a referral under section 14, the chair of the committee shall send a written statement of decision to,
- (a) a parent of the pupil;
 - (b) the pupil, where the pupil is 16 years of age or older;
 - (c) the principal who made the referral, where the referral was made by a principal; and
 - (d) the designated representative of the board that established the committee.

Section 19

19. (1) A parent who receives a statement of decision under section 18 may, by written notice delivered to the person specified in subsection (2) within 15 days of receipt of the statement of decision, request a meeting with the committee.
- (2) The notice under subsection (1) shall be delivered to the principal in the case of a referral under subsection 14 (1) and to the designated representative in the case of a referral under subsection 14 (3).
- (3) On receiving the request, the principal or designated representative, as the case may be, shall arrange for the committee to meet as soon as possible with the parent and, where the pupil is 16 years of age or older and wishes to attend, the pupil, to discuss the statement of decision.
- (4) As soon as possible following a meeting under this section, the chair of the committee shall send a written notice to each of the persons described in subsection 18 (1), stating whether any changes in its decisions were made as a result of the meeting.
- (5) If changes in the committee's decisions were made as a result of the meeting, the notice under subsection (4) shall be accompanied by a revised statement of decision, together with written reasons for the changes.

In any case, the chair of the IPRC must send a copy of the decision to:

- the parent;
- the student, if over the age of 16;
- the school principal;
- the director of the school board.

If the student's parent did not attend the IPRC meeting, the statement of decision and a consent form should be mailed to the home to be signed and returned to the school principal.

If the parent does not sign the consent form and does not appeal the decision within the time limit, the board will implement the IPRC decision and give written notice to the parent.

After the IPRC Decision

A follow-up meeting of the IPRC may be held at the parent's request whether or not the parent agrees with the IPRC decision. The parent has 15 days after receiving the statement of decision to make a written request to the student's current school principal for a follow-up meeting with the IPRC. The principal will arrange for the meeting to be held as soon as possible. As soon as possible after the meeting, the IPRC chair will inform the necessary people if any changes were made to the IPRC decision and, if so, will provide a revised statement of decision and written reasons for the changes. The parent will be asked to consent to the revised identification or placement decision.

Subsection 6(2)

6. (2) The board shall promptly notify the principal of the school at which the special education program is to be provided of the need to develop an individual education plan for the pupil in consultation with the parent and, where the pupil is 16 years of age or older, the pupil.

Subsections 14 (2), (3), and (4)

14. (2) Where a decision is made that a pupil is to leave a demonstration school and enter a school of a board, the superintendent of the demonstration school shall so notify the designated representative of the board.
 - (3) On receiving the notice under subsection (2), the designated representative of the board shall ensure that the pupil is referred to a committee established by the board, for a decision as to what the placement of the pupil should be.
 - (4) The superintendent of the demonstration school acting under subsection (2) and the designated representative of the board acting under subsection (3) shall use their best efforts to ensure that the committee meets as soon as possible after the decision is made to move the pupil from the demonstration school to the school of the board.

Agreement With the IPRC Decision

Once the IPRC has identified the student as an exceptional pupil and the parent has agreed with the IPRC identification and placement decision, the board will promptly notify the principal of the school at which the special education program is to be provided of the need to develop an IEP for the student. See Part E of this guide for more information about the IEP.

Disagreement With the IPRC Decision

If the parent disagrees with the revised decision, he or she may:

- within 30 days of receipt of the initial IPRC decision, file a notice of appeal with the secretary of the board;
- within 15 days of the receipt of the decision of the second meeting, file a notice of appeal with the secretary of the board.

(See "The IPRC Appeal", page D19, for more information.)

Note that if the parent does not supply written consent to the IPRC decision and also does not appeal the decision within the time limit for appealing, the board will instruct the principal to implement the IPRC decision.

Students Moving From a Provincial Demonstration School to a School of a Board

The superintendent of the Demonstration School must notify the school board that the student is leaving the Demonstration School and coming to a school in the school board. The IPRC should meet as soon as possible after the decision is made to move the student from the Demonstration School to a school of the board.

THE IPRC TIMELINE

IPRC MEETING REQUESTED

(within 15 days of request)

- principal sends parent:
 - acknowledgement of request (if appropriate)
 - Parents' Guide
 - approximate date for IPRC meeting

(at least 10 days before meeting)

- IPRC chair sends parent (and student if 16 or over):
 - notification of IPRC meeting
 - details of the meeting (date, time, place)

(before the meeting and as soon as possible after receipt of information)

- IPRC chair sends parent (and student if 16 or over) information about student received by IPRC

IPRC MEETING

- student's strengths and needs documented
- decision about identification and placement made
- categories and definitions of exceptionalities identified
- recommendations made about program and services
- as soon as possible after decision, statement of decision sent to relevant parties

AFTER IPRC DECISION

Parent may:

- agree and sign consent form
- make no response
- request further discussion, or
- disagree and file appeal with special education appeal board

If parent agrees or makes no response:

(within 30 school days of placement being implemented)

- school completes IEP; parents get copy

If parent wishes further discussion:

(within 15 days of receipt of decision)

- request for second meeting

If parent disagrees:

(within 30 days of receipt of initial IPRC decision)

- parent files notice of appeal with secretary of board

SECOND IPRC MEETING

- as soon as possible after the meeting, notice of results sent to relevant persons, along with reasons for changes if there is a revised decision

AFTER SECOND IPRC MEETING

Parent may:

- sign consent form, or
- make no response (board then implements placement; develops IEP)

If parent disagrees:

(within 15 days of receipt of decision of second meeting)

- parent files notice of appeal with secretary of board

THE IPRC REVIEW

Regulation 181/98, Section 21

21. (1) The principal of the school at which a pupil's special education program is being provided,
- (a) may on written notice to a parent of the pupil;
 - (b) shall at the written request of a parent of the pupil; and
 - (c) shall, at the written request of the designated representative of the board that is providing the special education program to the pupil,
- refer the pupil to a committee established by the board that is providing the special education program to the pupil, for a review of the identification or placement of the pupil.
- (2) A request by a parent under clause (1) (b) may be made at any time after a placement has been in effect for three months but may not be made more often than once in every three month period.
- (3) Subject to subsection (4), the designated representative shall make a request under clause (1) (c) when in his or her opinion it is necessary to do so in order to ensure that a review in respect of the pupil is held under this Part at least once in each school year.
- (4) Subsection (3) does not apply where,
- (a) a committee proceeding with respect to the pupil was held under Part IV during the school year; or
 - (b) a parent of the pupil gives a written notice dispensing with the annual review to the principal of the school at which the special education program is being provided.
- (5) Within 15 days of giving a notice under clause (1) (a) or receiving a request under clause (1) (b) or (c), the principal shall provide the parent with a written statement of the approximate time when the review meeting will take place.

Request for a Review

At any time *after* a placement has been in effect for three months, a request for an IPRC review may be made by:

- the school principal with written notice to the parent;
- the parent in a written request to the principal; or
- the director of education of the educating board (in purchase-of-service situations).

A request by a person for an IPRC review cannot be made more often than once in every three-month period. An IPRC review meeting must be held once within each school year, unless the principal of the school at which the special education program is being provided receives written notice from the parent dispensing with the annual review.

Timelines for the IPRC Review

The IPRC review operates under the same timelines as the original IPRC process. Within 15 days of notice of the parent's request for a review, the school principal must let the parent know, in writing, approximately when the IPRC review will take place.

Subsections 23 (2) and (3)

23. (2) With the written permission of a parent of the pupil, a committee conducting a review under this Part shall consider the pupil's progress with reference to the pupil's individual education plan.
- (3) As soon as possible after a committee engaged in a review under this Part decides that it is satisfied with the identification and placement of a pupil, the chair of the committee shall send a written statement of decision confirming the identification and placement to,
- (a) a parent of the pupil;
 - (b) the pupil, where the pupil is 16 years of age or older;
 - (c) the principal of the school at which the pupil's special education program is being provided;
 - (d) the designated representative of the board that is providing the special education program to the pupil; and
 - (e) in the circumstances described in subsection 22 (2), the designated representative of the board that is purchasing the special education program.

Attendance at the IPRC Review

The same people may attend the IPRC review as attended the original IPRC. If a special education program and/or service has been purchased from another school board, a representative of the purchasing board may be present.

The IPRC Review Decision

The IPRC will review the placement and identification decisions and decide whether they should be continued or whether a different decision should now be made. The IPRC review considers the same type of information that was originally considered at the initial IPRC. With the parent's written permission, the IPRC conducting the review will consider the progress the student has made in relation to the IEP.

After the IPRC Review Decision

As soon as possible after the review, a written statement confirming or changing the student's placement should be sent by the chair of the committee to:

- the parent;
- the student, where the student is 16 years of age or older;
- the school principal;
- the director of the school board;
- the representative of the purchasing board (if appropriate).

Subsections 23 (4) and (5)

23. (4) As soon as possible after a committee engaged in a review under this Part decides that the identification or placement or both should be changed, the chair of the committee shall send a written statement of decision to the persons described in subsection (3).
- (5) A statement of decision under subsection (4) shall state,
- (a) the reasons for the committee's decision that the pupil's identification or placement or both should be changed;
 - (b) whether the committee considers that the pupil should continue to be identified as an exceptional pupil;
 - (c) where the committee considers that the pupil should continue to be identified as an exceptional pupil,
 - (i) the committee's placement decision,
 - (ii) the committee's description of the pupil's strengths and needs, and
 - (iii) the categories and definitions of any exceptionalities identified by the committee; and
 - (d) where the committee considers that the pupil should be placed in a special education class, the reasons for that decision.

Section 25

25. (1) A board shall implement a change in placement as a result of a decision made by a committee under this Part when one of the following two events occurs:
1. A parent of the pupil consents in writing to the placement.
 2. The time period provided in subsection 26 (3) for filing a notice of appeal from the decision expires without a notice of appeal being filed.
- (2) The board shall implement a change in placement as a result of a decision made by a committee under this Part as soon as possible after an event described in paragraph 1 or 2 of subsection (1) occurs.
- (3) A board that, without the written consent of a parent of the pupil, implements a change in placement as a result of a decision made by a committee under this Part shall give written notice of the implementation to a parent of the pupil.

This written statement will be similar to the written statement of the original IPRC, but will note any changes that have been made to the identification or placement. As in an initial IPRC, the committee must consider placement in a regular class with appropriate special education services before it considers placement in a special education class. If the committee decides that the student should be placed, or should continue to be placed, in a special education class, it must provide the reason(s) for that decision in its statement of decision. After receiving the statement of decision resulting from a review, the parent may request a follow-up meeting, as discussed on page D13.

If the parent disagrees with the decision, he or she may:

- within 30 days of receipt of the IPRC decision, file a notice of appeal with the secretary of the board;
- within 15 days of the receipt of decision of the second meeting, file a notice of appeal with the secretary of the board.

If the parent does not supply written consent to the identification or placement, but also does not appeal, the school board may implement the placement decision. In this case, the school board notifies the parent of the action taken and the school principal is notified to review the IEP and to add a transition plan, if necessary.

THE IPRC APPEAL

Regulation 181/98, subsections 26 (1) and (4)

26. (1) A parent of a pupil may, by filing a notice of appeal in accordance with subsection (2) or (3), require a hearing by a special education appeal board in respect of,
- (a) a committee decision under Part IV or V that the pupil is an exceptional pupil;
 - (b) a committee decision under Part IV or V that the pupil is not an exceptional pupil; or
 - (c) a committee decision under Part IV or V on placement of the pupil.
- (4) A notice of appeal shall indicate which of the decisions referred to in subsection (1) the parent disagrees with and shall include a statement that sets out the nature of the disagreement.

Subsection 26(5)

26. (5) The special education appeal board shall not reject or refuse to deal with an appeal by reason of any actual or alleged deficiency in the statement referred to in subsection (4) or by reason of the failure of the parent, in the opinion of the special education appeal board, to accurately indicate in the notice of appeal the subject of the disagreement.

The IPRC Appeal Process

A parent who disagrees with the original or the review IPRC decision may appeal:

- the decision that the student is an exceptional pupil;
- the decision that the student is not an exceptional pupil; and/or
- the placement decision.

The notice of appeal must be sent to the secretary of the board (who is usually the director of education) and must:

- indicate the decision with which the parent disagrees;
- include a statement that sets out the nature of the disagreement.

No parent will lose the right to appeal an IPRC or review decision because the notice of appeal is incorrectly written or does not accurately describe the area of disagreement. In most cases, it will likely be sufficient for parents to indicate their reasons for disagreeing and the result they would prefer.

Appeal Timelines

The request for an appeal must be filed with the secretary of the board within the following specific time limits:

- within 30 days of receiving the IPRC's statement of decision; or
- within 15 days of receiving the IPRC's statement of decision arising out of a follow-up meeting with the IPRC.

The same timelines apply to appeals from an IPRC review.

Subsections 26 (2) and (3)

26. (2) A notice of appeal in respect of a committee decision under Part IV shall be filed with the secretary of the board,
- (a) if no meeting is held under section 19, within 30 days of receipt of the statement of decision under section 18 by the parent who is seeking to appeal; or
 - (b) if a meeting is held under section 19, within 15 days of receipt of the notice under subsection 19 (4) by the parent who is seeking to appeal.
- (3) A notice of appeal in respect of a committee decision under Part V shall be filed with the secretary of the board,
- (a) if no meeting is held under section 24, within 30 days of receipt of the confirmation under subsection 23 (3) or the statement of decision under subsection 23 (4) by the parent who is seeking to appeal; or
 - (b) if a meeting is held under section 24, within 15 days of receipt of the notice under subsection 24 (3) by the parent who is seeking to appeal.

Subsections 27 (1), (4), and (5)

27. (1) The special education appeal board shall be composed of,
- (a) one member selected by the board in which the pupil is placed;
 - (b) one member selected by a parent of the pupil; and
 - (c) a chair, selected jointly by the members selected under clauses (a) and (b) or, where those members cannot agree, by the appropriate district manager of the Ministry.
- (4) No member or employee of the board providing or purchasing the special education program and no employee of the Ministry may be selected under subsection (1).
- (5) No person who has had any prior involvement with the matter under appeal may be selected under subsection (1).

Where a parent files a notice of appeal, the IPRC placement being appealed is not implemented, pending the results of the appeal. However, there is nothing to prevent the parents and the board from agreeing to the terms of a temporary placement pending the results of the appeal.

The School Board Response to Receiving a Notice of Appeal

After receiving the request for an appeal, the school board sets the appeal process in motion. It is suggested that the board assign one or more staff members who are not involved in the appeal to handle the arrangements for setting up the appeal board.

Selection of Appeal Board Members

Within 15 days of the board's receiving the notice of appeal:

- the board selects one person to be a member of the appeal board; and
- the parent selects one person to be a member of the appeal board.

Though parents will often request that a local association recommend one of its members as their selection for the appeal board, they are not limited to this choice. Where the parent is unfamiliar with the local associations operating within the jurisdiction of the board, the school board should be prepared to provide the parent with the list of SEAC members and/or the list of local associations eligible for membership on SEAC.

Within 15 days of the selections of the parent and school board representatives, the two appeal board members will select a chair. It may be helpful for a school board, in advance of any requests for appeal board meetings, to compile a list of people who they believe are suitable and willing to act as chair. The list may include people from other boards, retired educators, or SEAC members from other boards. A prepared list, with résumés, may help the two members to select the chair.

If the appeal board members cannot agree on an appeal board chair, the manager of the district office of the ministry may be asked to select the chair.

No appeal board member should have had any prior involvement with the matter under appeal, and should not be a member or employee of the school board or an employee of the Ministry of Education.

Subsection 27(7)

27. (7) The board shall provide the special education appeal board with the secretarial and administrative services it requires and shall, in accordance with the rules and policies that apply to members of the board under section 191.2 of the Act, pay the travelling and other expenses incurred by the members of the special education appeal board while engaged in their duties.

Before the Meeting of the Appeal Board

The school board will:

- provide the appeal board with secretarial and administrative services for such activities as making telephone calls, typing correspondence, photocopying and distributing material, and typing the appeal board's recommendations;
- in accordance with board policy with respect to board members, pay the travelling and other expenses of the members of the appeal board while they are engaged in their duties.

The school board contact person should, as soon as possible after receiving the request for the appeal, contact the parties to identify when they will be available for the appeal board meeting and whom they have selected as their appeal board member.

In addition, the contact person should:

- inform all parties to the appeal how he or she may be contacted. Questions or concerns about the process should be directed to the contact person rather than to the appeal board members;
- make preparations for the meeting, including finding a facility in which to hold the meeting. The meeting should be held in a neutral location, preferably reasonably close to the parent's home, such as a school that is not involved in the matter, a government office, or a hotel;
- inform both the parent and the board that any information regarding the student's needs and strengths that was brought up at the IPRC meeting(s) may be submitted to the appeal board for consideration. Although the regulation does not indicate when this information should be sent to the appeal board members, it would be a good idea to ensure that it is submitted in sufficient time to permit the members and the other party to read it carefully. Good practice suggests that the parties be asked to send their information to the school board contact person 10 calendar days prior to the appeal board meeting. The contact person should have copies made of the information for the appeal board members and the other party and distribute them at least 5 calendar days before the meeting;
- ensure that the parent is aware of his/her right, and the student's right if the student is 16 years of age or older, to have a representative present at the meeting;
- send a notice to the parent, the student who is 16 years of age or older, the board, and presenters within a reasonable period of time (but at least 10 days before the meeting) to inform them of the date, time, and location of the appeal board meeting. These factors should have been worked out in consultation with both

parties and the appeal board members. Although appeal boards tend to be scheduled for one day, there may be circumstances in which everyone agrees that more time is necessary;

- request that the parent and board each submit a list of the persons whom they wish to bring to the meeting, with an approximate indication of how long they expect these persons to speak. If time permits, this list should be distributed to the parties. If the lists are extensive or the appeal board members believe that certain persons are missing and should be invited, then the chair may convene a conference call with the parties to try to work out any difficulties. There may be a need for flexibility in scheduling to accommodate the schedules of the persons invited to provide information to the appeal board. If the appeal board members intend to request material that has not already been submitted by either of the parties, then a request to this effect should be made in writing by the school board contact person.

The school board provides the appeal board with the record of the IPRC proceedings, including the statement of decision and any reports, assessments, or other documents considered by the IPRC.

Subsection 27(6)

27. (6) The chair of the committee the decision of which is being appealed shall provide the special education appeal board with the record of the committee proceedings, including the statement of decision and any reports, assessments or other documents considered by the committee.

Subsections 28 (1), (2), and (3)

28. (1) The chair of the special education appeal board shall arrange for a meeting of the members of the special education appeal board to discuss the matters under appeal and shall give notice of the meeting, in accordance with subsection 5 (5), to a parent of the pupil and, where the pupil is 16 years of age or older, the pupil.
- (2) The meeting shall be arranged to take place at a convenient place and at a time that is no more than 30 days after the day on which the chair is selected and shall be conducted in an informal manner.
- (3) Despite subsection (2), with the written consent of the parents of the pupil and the designated representative of the board, the meeting may be scheduled for a time that is more than 30 days after the day on which the chair is selected.

The chair of the appeal board will arrange a meeting to take place at a convenient time and place, but no later than 30 days after he or she has been selected, unless the parent and the board both provide written consent to a later date.

Subsection 5(3)

5. (3) A person who has the right under subsection (1) or (2) to participate in a discussion also has the right to have a representative present at the discussion, to speak on behalf of the person or otherwise support the person.

Subsection 28(4)

28. (4) Any person who in the opinion of the chair of the special education appeal board may be able to contribute information with respect to the matters under appeal shall be invited to attend the meeting.

The Appeal Board Meeting

In addition to the committee members, the following people are entitled to be present:

- the parent, and student, where the student is 16 years of age or older, are entitled to be present at, and to participate in, all discussions;
- the parent and student are permitted to have representatives present to speak on their behalf or otherwise support them. If the parent and/or the board representative wish to have additional persons with them to assist with note taking, they should raise the matter with the chair of the appeal board either at or in advance of the meeting;
- any person who in the opinion of the appeal board chair may be able to contribute information with respect to the matters under appeal may be invited to attend;
- the parent and the board may, with the agreement of the appeal board, bring other persons to the meeting to speak about various matters relevant to the appeal;
- if a special education program and/or service has been purchased from another school board, the representative of the board offering the service may be present.

The appeal board chair may prepare an agenda for the meeting that provides an overview of the scheduled proceedings. If possible, this agenda should be mailed to the parties in advance of the meeting.

The agenda might include:

1. A call to order;
2. An introductory statement by the chair of the appeal board, including:
 - introduction of the appeal board members;
 - introduction of the participants;
 - a statement of the purpose of the meeting;
 - a description of the procedures to be followed (e.g., order of presentations);
3. The presentations, including:
 - an opening statement by the parent;
 - an opening statement by the school board;
 - presentation of information by persons invited by the parent;
 - presentation of information by persons invited by the school board;
 - presentation of written information, if any, by parent and school board;
 - a summary by the parent;
 - a summary by the school board;

4. A closing statement by the appeal board chair. This statement should provide information about:
 - the decision date;
 - the powers of the appeal board;
 - the role of the school board following the decision.

The appeal board meeting is to be conducted "in an informal manner". The goal of the meeting is to provide the appeal board members with the information they require in order to make their recommendations.

Subsection 28(6)

28. (6) Where the special education appeal board is satisfied that the opinions, views, and information that bear on the appeal have been sufficiently presented to it, the special education appeal board shall end the meeting and, within three days of ending the meeting, shall,
- (a) agree with the committee and recommend that its decisions be implemented; or
 - (b) disagree with the committee and make a recommendation to the board about the student's identification or placement or both.

Section 29

29. (1) The special education appeal board shall send a written statement of its recommendations under section 28 to,
- (a) a parent of the pupil;
 - (b) where the pupil is 16 years of age or older, the pupil;
 - (c) the chair of the committee;
 - (d) the principal of the school in which the pupil is placed;
 - (e) the designated representative of the board in which the pupil is placed; and
 - (f) in the circumstances described in subsection 28 (5), the designated representative of the board that is purchasing the special education program.
- (2) The written statement shall be accompanied by written reasons for recommendations.

After the Appeal Board Meeting

The appeal board must make its recommendations to the school board within 3 days of the end of the meeting.

The appeal board recommendations may:

- agree with the IPRC and recommend that its decisions be implemented; or
- disagree with the IPRC and make a recommendation to the board regarding the student's identification or placement or both.

The appeal board will report its recommendations in writing, providing the reasons for its recommendations. This written statement will be sent to:

- the parent;
- the student, if 16 years of age or older;
- the chair of the IPRC being appealed;
- the principal of the school;
- the director of the school board;
- the representative of the purchasing board, if appropriate.

The appeal board may report its decision in whatever written form it finds appropriate. The following elements might be included:

- identifying personal information (e.g., the student's name and age; the parent's name and address; the name and address of the school);
- the date, time, and place of the meeting;
- the issue and purpose of the meeting;
- the names of the parties and the guests whom they brought;
- a summary of the facts of the case;

The record of the Appeal Board is in the custody or under the control of the board, and therefore it is subject to the privacy and access requirements of the Municipal Freedom of Information and Protection of Privacy Act.

Section 30

30. (1) Within 30 days of receiving the special education appeal board's written statement, the board shall consider the special education appeal board's recommendations, shall decide what action to take with respect to the pupil and shall give notice in writing of the decision to each of the persons described in subsection 29 (1).

(2) In deciding what action to take with respect to a pupil, the board is not limited to the action that the special education appeal board recommended or could have recommended.

(3) Notice to a parent under subsection (1) shall include an explanation of the further right of appeal provided by section 57 of the Act.

- a summary of the positions of the parties;
- a list of the factors that played a role in the formulation of the recommendations;
- the recommendation of the appeal board on the issue.

Although the regulation does not require it, it is good practice for the board contact person to prepare an official file including:

- the written communications between the appeal board and the parties;
- the information submitted to the appeal board, including documents, assessments, videos, or other material (unless the parent requests that some of these be returned);
- the appeal board recommendations;
- the school board decision.

This record should be preserved for future reference, and for forwarding to a tribunal if required.

After the Appeal Board Decision

Within 30 days of receiving the appeal board's written statement, the school board will:

- consider the appeal board's recommendations;
- decide what action it will take with respect to the student;
- send a written statement of decision to everyone who received the written recommendations from the appeal board and include an explanation of the parent's right to appeal to a Special Education Tribunal (SET).

In deciding what action to take, the school board is not limited to the actions recommended by the appeal board.

If the parent is not satisfied with the school board decision, the parent has a further right to appeal to a Special Education Tribunal (SET) (see page D37).

Section 31

- 31. (1) The board shall implement a decision under subsection 30 (1) when one of the following events occurs:**
- 1. A parent of the pupil consents in writing to the decision.**
 - 2. Thirty days have elapsed from receipt of the notice under subsection 30 (1) by a parent of the pupil and no appeal has been commenced in respect of the decision under section 57 of the Act.**
 - 3. An appeal under section 57 of the Act from the decision is dismissed or abandoned.**
- (2) In accordance with an agreement between the board and a parent of the pupil, the board may change a decision made by it under section 30,**
- (a) while an appeal under section 57 of the Act is pending; or**
 - (b) before the end of the period referred to in paragraph 2 of subsection (1).**
- (3) Where the board changes a decision under subsection (2), the board shall give notice in writing of the change in decision to each of the persons described in subsection 29 (1).**
- (4) Subsections 30 (2) and (3) apply with necessary modifications in respect of a change in decision under subsection (2).**

The board decision may be implemented when:

- the parent consents in writing;
- there is no appeal to the SET within 30 days of the parent's receiving notice of the decision; or
- the appeal to the SET has been dismissed or abandoned.

Nothing prevents the school board and the parent from coming to an agreement that differs from the original school board decision. If so, the school board must give notice of the new decision to the same people to whom it sent the original statement of decision.

THE IPRC APPEAL TIMELINE

NOTICE OF APPEAL

(within 15 days of notice being received by secretary of board)

- school board and parent each select one member of appeal board

(within 15 days of the selections being made)

- the two members select a chair

(within 30 days of selection of chair)

- appeal board meeting (unless parents and board consent in writing to a later date)

MEETING

(within 3 days)

- appeal board recommendations sent to relevant parties

(within 30 days of receipt of recommendations)

- school board considers recommendations; sends statement of decision to relevant parties

BOARD'S DECISION

(within 30 days of receipt)

- parents appeal to Special Education Tribunal

OR

(after 30 days and without an appeal by parents)

- board implements its decision

STEPS IN IPRC PROCESS

IMPLICATIONS FOR PARENTS AND STUDENTS

IMPLICATIONS FOR SCHOOL PRINCIPAL

• Parent or student (16+) may request a discussion about special education programs and services and be present for and participate in the discussion.

The school principal:

- The IPRC:
 - decides whether student is exceptional or not;
 - applies, for exceptional pupils, the category and definition of the identified exceptionalities in accordance with the ministry list of categories and definitions of exceptionality;
 - describes the strengths and needs of student;
 - decides the placement of student and must recommend placement in a regular class if satisfied that such a placement meets student's needs and is consistent with parental preferences. If recommending placement in a special education class, IPRC must set out the reasons for this recommendation in its decision.

- Chair of IPRC sends a written statement of decision to:
 - parent;
 - student (if 16+);
 - principal who made the referral;
 - director.

- understands the elements of the statement of decision
- appreciates the difference between recommendations and decisions made by IPRC
- may begin work on IEP
- may review decision with parent and student (16+)

- A second meeting of IPRC is convened as soon as possible if parent so requests.

- Parents may, within 15 days of receiving the statement of decision, request a second meeting with IPRC to discuss the decision further; or, within 30 days of receiving the statement of decision, file a notice of appeal with the board.

- arranges for a follow-up meeting with IPRC as soon as possible, on request

- Following the second meeting of IPRC, IPRC may:
 - uphold its original decision and notify all relevant parties of this decision; or
 - change its original decision and notify all relevant parties of this decision and the reasons for the revised decision.

- Parent who does not agree with the upheld or revised decisions of the follow-up meeting may request to have the matter referred to a special education appeal board within 15 days of receipt of the statement of decision of the second meeting of IPRC.

Parent may agree in writing to dispense with the annual review. 	<ul style="list-style-type: none"> may initiate IPRC review with notice to parent if review is held, follows procedure similar to that for IPRC initial meeting

MEDIATION

The Education Act, subsection 57(3)

- 57. (3) Right of appeal.** –
Where a parent or guardian of a pupil has exhausted all rights of appeal under the regulations in respect of the identification or placement of the pupil as an exceptional pupil and is dissatisfied with the decision in respect of the identification or placement, the parent or guardian may appeal to a Special Education Tribunal for a hearing in respect of the identification or placement.

Introduction

Under subsection 57(3) of the Education Act, a parent who has exhausted all rights of appeal under the regulations with respect to the identification or placement of the pupil may appeal to a Special Education Tribunal for a hearing. However, *prior to* a hearing before the Ontario Special Education Tribunal, mediation may be used as an alternative means of resolving disputes between parents and a school board about the identification and/or placement of a student. The process described here has evolved over a number of years and is now current practice in Ontario.

Note: While mediation is discussed here in a very specific context, it is by no means limited to resolving identification/placement disputes at the tribunal stage. Parents and school boards may use mediation at any time to help resolve disputes about any issue, as long as both the parent and the board wish it and can agree on a person who will serve as mediator. Where such agreement is difficult, a third party such as a parent association, community agency, or another school board may be able to assist the parent and school board in selecting a mediator and initiating the mediation process. Usually, the board agrees to pay the mediator's expenses and any fees charged by the mediator.

Definition

Mediation is a cooperative dispute resolution process in which an impartial third party (the mediator) assists parents and school board personnel to achieve a solution that they jointly believe best meets the needs of the student.

Initiating the Mediation Process

Parents who disagree with the decision about the identification and/or placement of their child by the school board following a hearing before an Identification, Placement and Review Committee (IPRC) and a subsequent meeting with an appeal board have the right to request a hearing by the Ontario Special Education Tribunal. A request for a tribunal hearing is made in writing to the secretary of the tribunal at the Ministry of Education (see address, page D37).

Before a tribunal hearing is requested, parents and school board officials may wish to discuss the possibility of mediation as an alternative method of dispute resolution.

Alternatively, when a parent writes to the ministry to request a hearing before the Ontario Special Education Tribunal, the secretary to the tribunal will ask the parent and school board officials if they have considered mediation. The secretary will explain the mediation process and, if requested, will send the parent and the board a copy of this explanation of the procedure.

If both parties agree to mediation, the secretary may be able to assist them in identifying possible mediators. The parent and school board may agree on any person to act as mediator.

Once the parent and school board have identified a mediator acceptable to both parties, the secretary of the tribunal may (at their request) contact the mediator to ask that he or she participate and to make arrangements for a mediation session. Alternatively, these arrangements may be made by the school board and/or the parent.

Mediation is **not** mandatory. If either the parent or the school board rejects mediation, the secretary will proceed to arrange a tribunal hearing. Furthermore, if the mediation is unsuccessful at resolving the dispute, the parent retains the right to proceed with the tribunal hearing. In addition, in cases in which both parties agree to mediation, the secretary will make every effort to ensure that the tribunal hearing is not unduly delayed by a mediation session.

Mediation Versus a Tribunal Hearing

In considering whether to attempt mediation or to proceed directly to a tribunal hearing, parents and school board officials may wish to consider the following comparison of the two processes.

MEDIATION

- A cooperative method designed to encourage mutual problem solving.
- The structure and conditions of the process are agreed between the parties and the mediator before mediation starts, and the parties may or may not be represented by a lawyer or advocate.
- A private process.
- A mutually agreed-upon resolution.
- Usually proceeds more quickly than a tribunal.
- The board pays the cost of the mediator (fee plus expenses).

TRIBUNAL

- An adversarial method where an impartial panel makes the decision.
- A formal legal process, governed by the Statutory Powers Procedure Act (see Appendix 8). In such a process:
 - the parties are often represented by a lawyer or advocate;
 - rules of evidence are followed;
 - evidence is given under oath;
 - witnesses are called and cross-examined;
 - a court transcript is kept;
 - the tribunal has the power to subpoena witnesses.
- Normally a public process.
- The decision of the tribunal is final and binding on the parties.
- Depending upon the complexity of the issues, the full process may take from three months to a year.
- The province pays the cost of tribunal members, secretary, and their expenses.
- The board and parents pay their own expenses, including the cost of a lawyer or advocate, the expenses of witnesses, and the cost of copies of documents submitted in evidence.

The tribunal secretary will advise parents and school board officials that he or she can assist them with arranging for mediation *or* with preparation for a tribunal hearing but not with both tasks at the same time.

Choosing mediation will likely cause a delay of a few weeks to a month in the scheduling of a tribunal hearing. However, the delay may be worthwhile because of the potential benefits of resolving the dispute. Even if the dispute is not resolved, the mediation may assist the parties to clarify the issues in dispute.

Participants

The parent or guardian participates on behalf of the child. Board staff participate on behalf of the school board. The participants must have the authority to make decisions on behalf of the people they represent. Although children rarely attend the mediation, where a parent believes that it would be in the child's interest to be present, such a request may be discussed with the mediator.

The parties and the mediator may agree to have other persons present as well. For example, each party may have someone to assist or represent him or her. No witnesses are examined, however, and, in the interests of comfort and openness, the number of additional individuals present is normally kept to a minimum.

Selection of a Mediator

Either the parent or the school board or both may suggest persons who could mediate the dispute, or they may seek names from someone else. The mediator should be knowledgeable in the field of special education and acceptable to both sides. A nominee's prior involvement on one side or the other of the dispute would usually (though not necessarily) eliminate him or her from consideration. Any such involvement should be disclosed to the parties before they make a final decision on the choice of mediator.

In deciding on the suitability of a person as mediator, parents and school board officials may wish to speak with the person by telephone and to obtain and contact references provided by the potential mediator.

There is no single standard approach or style for mediation. Individual mediators have individual approaches. If parents or the school board have concerns about the mediation process or some particular requirements (for example, relating to the structure of the mediation session or the number of persons who will be present), it would be appropriate to raise these with the potential mediators before making a final selection.

Who Pays?

In past mediations organized by the secretary of the tribunal, the school board has paid for the mediation. The fact that the mediator is selected by both parties guards against the possibility of a bias in favour of the board.

Preparation for Mediation

The amount and type of material that the mediator wishes to receive prior to the hearing will depend upon the mediator. Submission of materials will be subject to agreement among the mediator and the parties.

In some cases, the mediator may ask the parties to enter into a written contract with him or her before the start of mediation. This agreement may contain the parties' statements of the issues. The agreement may also require the parties not to use the results of the mediation in any future litigation, and not to call the mediator as a witness in any future litigation.

The following suggestions are offered as a guide to help parents and school board officials to prepare for the mediation session:

- Recognize that mediation is not a win/lose situation. Its success requires both parties to attempt in good faith to reach a mutually satisfactory conclusion. A willingness to consider other points of view, to compromise, and to focus on the critical issues are the hallmarks of successful mediation. Even if the mediation does not achieve agreement on the critical issues, it may have succeeded in clarifying the outstanding problems and the parties' positions on those problems.
- Focus on the child's needs, not on finding fault, blaming, making accusations, or dwelling on past conflicts.
- Clearly outline your position or view of the issues in dispute. Where possible, try to isolate the various issues and determine which of those issues are most important to you and in which areas you can be somewhat flexible.
- Determine what you want to propose to the other party. Develop a list of alternatives or options that could be offered to settle the dispute. Decide the order of importance of these alternatives or options.
- Be willing to consider both short-term and long-term solutions. Some matters may be addressed on a short-term or even experimental basis. An agreement to meet at a later date to evaluate and modify the results may be necessary.
- Prepare for the mediation by asking others to review your position, objectives, and possible solutions. Consider whether it would be easier for you to undertake mediation if you have an adviser or representative with you.

The Mediation Session

The parties, together with the mediator, work out the process. However, in general, a session will proceed as follows:

- The parties meet the mediator at a designated time and place. After the brief introduction and statement about the purpose of the mediation, the mediator gives each party the opportunity to explain, without interruption, his or her position and desired outcome. When both parties have finished, the mediator usually meets with each party separately, engaging in a form of "shuttle diplomacy" between the parties. When appropriate, the mediator will bring the parties together again.
- If the parties reach an agreement, they meet and the mediator writes up an account of their agreement. The wording of the agreement should be sufficiently clear and unambiguous to ensure that both sides have similar perceptions of the nature of the agreement. However, there should also be sufficient flexibility to accommodate the types of changes that normally occur over time in the operation of schools (e.g., changes in personnel, student enrolment, and facilities).
- Both parties will be asked to sign the agreement, and both will either be given copies of it, with the mediator keeping the original, or everyone will receive originals. It is suggested that the school board approve the result of the mediation so that the agreement becomes the school board's decision.
- There is no recorder at the mediation and no transcript is made. The mediator may take notes but will keep the substance and results of the mediation confidential.

Normally, the mediation process described above will take place in a single day. For some complex matters, a second day may be necessary. In circumstances where critical information is missing or where the involvement or agreement of other parties is discovered to be necessary to the successful implementation of the mediation agreement, it may be necessary to schedule a second follow-up meeting to ensure that all pieces of the agreement come together successfully.

There is nothing to prevent the parties from agreeing to a temporary solution to be reviewed at a later date, with or without the mediator.

If mediation is successful, written confirmation of this fact will be requested by the secretary, and the parent's request for a hearing will be considered to have been withdrawn.

If Mediation Fails

If mediation fails to resolve the dispute, the tribunal hearing may still go ahead. In this case the tribunal secretary should be notified as soon as possible. It should be remembered that, even though no mutually acceptable resolution has been reached, the process is not necessarily a complete failure. Certain issues may have been resolved so that the tribunal hearing is more focused. In fact, some mediations are held for the purpose of resolving only some of the outstanding issues, while leaving the remainder for litigation. In addition, there might have been some trust built between the parties if the lines of communication were re-established and the parties could both focus on the needs of the child.

A TRIBUNAL HEARING

The Education Act, subsections 57 (3), (4), and (5)

57. (3) **Right of appeal.** – Where a parent or guardian of a pupil has exhausted all rights of appeal under the regulations in respect of the identification or placement of the pupil as an exceptional pupil and is dissatisfied with the decision in respect of the identification or placement, the parent or guardian may appeal to a Special Education Tribunal for a hearing in respect of the identification or placement.

(4) **Hearing by Special Education Tribunal.** – The Special Education Tribunal shall hear the appeal and may,

- (a) dismiss the appeal; or
- (b) grant the appeal and make such order as it considers necessary with respect to the identification or placement.

(5) **Decision final.** – The decision of the Special Education Tribunal is final and binding on the parties to the decision.

Regulation 181/98, section 31(1)

31. (1) The board shall implement a decision under subsection 30 (1) when one of the following events occurs:

- 1. A parent of the pupil consents in writing to the decision.
- 2. Thirty days have elapsed from receipt of the notice under subsection 30 (1) by a parent of the pupil and no appeal has been commenced in respect of the decision under section 57 of the Act.
- 3. An appeal under section 57 of the Act from the decision is dismissed or abandoned.

Written Request for a Tribunal Hearing

Parents who disagree with the identification and/or placement decision made by the school board following a meeting of an Identification, Placement and Review Committee (IPRC), and a subsequent meeting with an appeal board, have the right to request a hearing by the Ontario Special Education Tribunal. A request for a tribunal hearing is made in writing to the secretary of the tribunal at the Ministry of Education. The request should include the name of the parent and the name and age of the child, the child's school board, and a very brief description of the nature of the appeal (e.g., appeal of an identification that a child is or is not exceptional; appeal of a placement). The letter should include information about the parent's mailing address, telephone numbers (day and evening), and fax number and/or e-mail address, if available.

In addition, the letter may name an advocate, agent, or lawyer who will act on behalf of the parent. In this case, the tribunal secretary will communicate with this person rather than with the parent. The letter should also give information on how the agent, advocate, or lawyer may be contacted. There is no obligation to have a lawyer or advocate, and in many tribunals, parents have acted on their own behalf.

Correspondence should be addressed to:

Secretary, Ontario Special Education Tribunal
Ministry of Education
Special Education Policy and Program Unit
2 Carlton Street, Suite 710
Toronto, Ontario
M5B 1J3

Preliminary Discussion With Tribunal Secretary

Upon receipt of a written request from the parent, the tribunal secretary will forward a copy of it to the school board, informing the board of the request for the tribunal and requesting the name of a contact person.

The secretary will contact both the parent and the designated school board official by telephone or in writing to determine whether they have considered and/or attempted any alternative means, such as mediation, for resolving the dispute. If either the parent or the board is interested in pursuing mediation, the secretary may provide information about the mediation process and/or assistance in initiating mediation. If the parent and school board agree to mediation, the tribunal preparations are suspended by the secretary, pending the outcome of the mediation. If mediation fails, the tribunal request will be reactivated. The mediation process is described in the preceding section.

Once it is determined that the parties will be proceeding to a tribunal hearing, the secretary will contact the tribunal members to determine a number of possible dates. The parent and the school board will then be contacted to determine which dates are most convenient. For the convenience of the participants, the hearing is usually held within the geographic jurisdiction of the school board. Generally, a site that is not on school board property is selected – for example, a government office or a hotel. Depending on the complexity of the case, two, three, or more days are reserved for the hearing. At least one month's advance notice is required to allow for the preparation and exchange of documents, as described below. Preparation time of more than one month may be required if there are difficulties in finding suitable dates or the parent and/or the school board require extra time to prepare their cases.

Both the parent and the school board may decide to present the case themselves or to be represented by an agent, advocate, or lawyer. Because a tribunal hearing is a quasi-judicial process in which the formal rules of evidence apply and in which witnesses are called and cross-examined, representation by a lawyer or by an experienced agent or advocate can be of assistance to the parties. Also, experience has shown that professional representation at the hearing increases the likelihood that all material aspects of the case will be presented clearly to the tribunal and helps the hearing to proceed in an orderly fashion.

On the other hand, the cost of a lawyer or advocate can be a deterrent to a parent or a school board. Parent associations (many of which are represented on the school board's SEAC) may be able to provide some assistance for their members and for parents whose children's disabilities fall within their mandate. They may also be able to recommend lawyers or advocates to assist parents in preparing for the hearing.

Exchange or Disclosure of Information

In order to ensure an effective and efficient hearing, both parent and school board are requested to disclose certain information concerning their cases in advance of the hearing. **To ensure the impartiality of the tribunal members, all communication in preparation for the tribunal hearing must be through the tribunal secretary.**

Once the dates and place for the hearing have been set, the secretary will advise both the parent (or his or her representative) and the board (or its representative), at the same time and in writing, of the times, dates, and place of the hearing. The following information will be requested from the parent:

- a statement of the grounds for the appeal (i.e., What aspects of the school board's decision on identification and/or placement is the parent objecting to?);
- a statement of the remedy sought (i.e., What does the parent want the tribunal to order the school board to do?);
- notice of whether the parent intends to call witnesses and, if so, how many;
- an estimate of how long it will take to present the parent's case;
- a list of any preliminary issues the parent intends to raise at the start of the hearing.

The tribunal secretary's letter will also give the parent a date (not later than two weeks before the commencement of the hearing) by which this information should be received by the tribunal secretary.

Upon receipt of the requested information from the parent, the tribunal secretary will forward copies to the school board or its representative and to the tribunal members. The covering letter to the school board will request the following material in response to the parent's disclosure information:

- a response to the parent's statement of grounds;
- a response to the parent's remedy sought and the remedy offered by the board;
- notice of whether the board intends to call witnesses and, if so, how many;
- an estimate of how long it will take to present the board's case;
- a list of any preliminary issues the board intends to raise at the start of the hearing.

The letter will also give the board a date (not later than one week before the commencement of the hearing) by which this information should be received by the tribunal secretary. On receipt of this information from the board, the secretary will forward a copy to the parent or his/her representative, and to the tribunal members.

If a party has reason to believe that a chosen witness might not appear, he or she may ask the chair of the tribunal (preferably before the hearing, through the tribunal secretary) to summon the person to appear as a witness, and/or to produce documents or other materials needed in evidence.

The Hearing Panel

Each tribunal panel is made up of three members. Usually, the chair of the tribunal selects two other members to sit with him or her to hear the dispute. All tribunal members are appointed by Order-in-Council and generally serve three-year terms. The composition of the panels may vary, as the chair may select different tribunal members for each hearing.

The Hearing Procedure

The following briefly outlines the order of business at a tribunal hearing. The tribunal follows the rules of the Statutory Powers Procedure Act (SPPA), a copy of which is sent to each party. In addition, the tribunal has discretion to alter the process somewhat to meet the needs of the parties.

1) Introductory Statement by Chair of Tribunal

- Call to order.
- Introduction of tribunal members, secretary, and court reporter.
- Introduction of participants.
- Procedural matters. The chair of the tribunal reviews the times scheduled for recesses and adjournment.
- The chair briefly outlines the procedures to be used to present evidence and testimony, and the role of the tribunal members.

2) Preliminary Issues

The chair will ask whether there are any preliminary matters to be dealt with before the hearing begins. Examples of preliminary issues are:

- request for disclosure of additional material;
- request that the hearing be closed to the public.

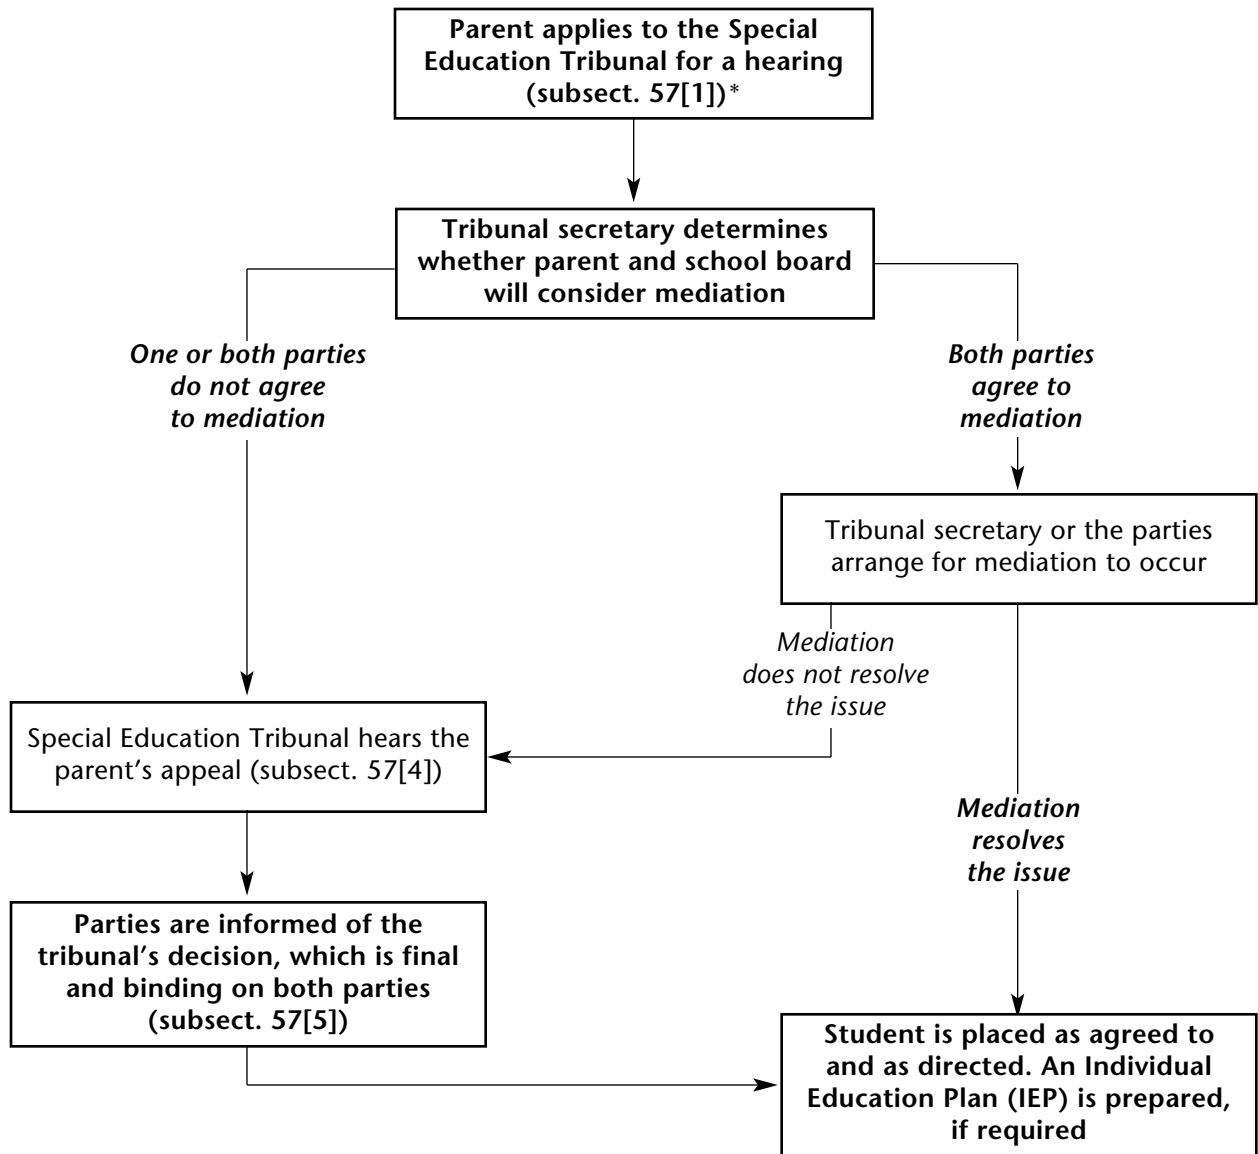

If a preliminary issue is raised, the tribunal will hear the party raising the issue, the response of the other party, and the requester's reply to the response, if any. The chair may then call a recess for the tribunal members to confer and come to a decision regarding the preliminary matter.

3) Participants' Opening Statements

The chair asks the parent and the school board for opening statements to summarize the issues as each sees them.

After the opening statement, the parties begin the process of introducing evidence to support their arguments. Generally, the evidence is introduced through witnesses whose testimony supports the position of the

Figure D.2: Special Education Tribunal Process

* Legal references are to the Education Act.

party presenting the witness. There is no set number of witnesses that a party must bring to the hearing. However, if the number is large, and the other party objects, the tribunal may limit the number of witnesses.

4) Testimony of Witnesses

The parent begins.

- a) Testimony by witnesses for the parent. As each witness is called, the chair indicates where the witness is to sit and the witness is sworn in. The chair asks the witness to state his or her name and occupation.
 - (i) The chair then requests the parent or his or her representative to proceed with the examination (i.e., questioning) of the witness.
 - (ii) At the completion of questioning, the chair asks if the school board representative wishes to cross-examine the witness.
 - (iii) The chair asks the parent if he or she wishes to re-examine the witness in light of the cross-examination.
 - (iv) The members of the tribunal may ask the witness questions for clarification.
- b) Testimony by witnesses for the board.

Steps (i) to (iv) under (a) above are repeated, with the roles of parent and board reversed.

5) Documentary (Written) Evidence

Documents and other items submitted in evidence are usually introduced through the testimony of a witness who establishes the authenticity of the document or item and who may be asked questions about it. If parties wish to introduce documentary evidence directly, without a witness, it is up to the tribunal to decide whether such evidence should be included. Copies of documents should be provided to the other party, the tribunal members, the secretary, and the court reporter. When accepted in evidence, a document is given an exhibit number by the secretary, who keeps a list of all the exhibits submitted by each party. The exhibits become part of the permanent tribunal record.

6) Summary Statements

The chair asks the parents and the school board to summarize their positions. The parent may reply to the board's summary. (Note that no new evidence or testimony may be introduced at this time.)

7) Closing Statement by the Chair

The chair will indicate whether additional written information is to be submitted and, if so, when. The chair will also inform the parties when the decision is likely to be released.

INTRODUCTION

In Regulation 181/98, "Identification and Placement of Exceptional Pupils", principals are required to ensure that an Individual Education Plan (IEP) is developed for each student who has been identified as exceptional by an Identification, Placement and Review Committee (IPRC) within 30 school days, as amended by Ontario Regulation 137/01, of the student's placement in a special education program.

For the convenience of those using this guide, several key sections of Regulation 181/98 are cited below and repeated at relevant points throughout the text. However, principals and others who work with exceptional pupils are advised to refer to the regulation for a full description of responsibilities related to IEPs.

Regulation 181/98, Sections 6 (2)–(8) and 8

6. (2) The board shall promptly notify the principal of the school at which the special education program is to be provided of the need to develop an individual education plan for the pupil in consultation with the parent and, where the pupil is 16 years of age or older, the pupil.

- (3) The individual education plan must include,
- (a) specific educational expectations for the pupil;
 - (b) an outline of the special education program and services to be received by the pupil; and
 - (c) a statement of the methods by which the pupil's progress will be reviewed.

(4) Where the pupil is 14 years of age or older, the individual education plan must also include a plan for transition to appropriate post-secondary school activities, such as work, further education, and community living.

(5) Subsection (4) does not apply in respect of a pupil identified as exceptional solely on the basis of giftedness.

(6) In developing the individual education plan, the principal shall,

- (a) consult with the parent and, where the pupil is 16 years of age or older, the pupil; and

- (b) take into consideration any recommendations made by the committee [IPRC] or the Special Education Tribunal, as the case may be, regarding special education programs or special education services.

(7) In developing a transition plan under subsection (4), the principal shall consult with such community agencies and post-secondary educational institutions as he or she considers appropriate.

(8) Within 30 school days* after placement of the pupil in the program, the principal shall ensure that the plan is completed and a copy of it sent to a parent of the pupil and, where the pupil is 16 years of age or older, the pupil.

8. The principal shall ensure that the individual education plan for a pupil is included in the record kept in respect of the pupil under clause 265(d) of the Act, unless a parent of the pupil has objected in writing.

*As amended by Ontario Regulation 137/01. See note on page H34 in Appendix 10.

IEPs may also be prepared for students who are receiving special education programs and services but who have not been formally identified as exceptional.

Parents must be consulted in the development of the IEP and must receive a copy on its completion. Parents must also be consulted about any significant revisions that may be necessary and receive a copy of the revised IEP.

In the policy document *Individual Education Plans: Standards for Development, Program Planning, and Implementation, 2000*, the ministry has outlined requirements for the development and review of IEPs to ensure that this work is carried out in a manner that is consistent with Regulation 181/98.

This part of the guide is provided as a resource and contains advice and tips intended to help teachers and others working with exceptional pupils to develop, implement, and monitor high-quality IEPs. A five-step process, based on a team approach, is recommended. Suggestions and sample forms are provided, but teachers may adapt them to suit individual circumstances.

WHAT IS AN IEP?

An IEP is a written plan. It is a working document that describes the strengths and needs of an individual exceptional pupil, the special education program and services established to meet that student's needs, and how the program and services will be delivered. It also describes the student's progress.

An IEP should be based on a thorough assessment of the student's strengths, interests, and needs. It should identify specific goals and expectations for the student, and should explain how the special education program will help the student achieve the goals and expectations set out in the plan. The special education program and services the IEP describes should be modified as necessary by the results of continuous assessment and evaluation.

A student's IEP should be developed, implemented, and monitored in a collaborative manner. The educational growth of a student is best accomplished through the mutual efforts of, and close communication among, the student, the student's parent, the school, the community, and other professionals involved with the student. The IEP provides an opportunity for all those involved with the student to work together to provide a program that will foster student achievement and success.

An IEP is...

- a summary of the student's strengths, interests, and needs and of the expectations for a student's learning during a school year that differ from the expectations defined in the appropriate grade level of the Ontario curriculum;
- a written plan of action prepared for a student who requires modifications of the regular school program or accommodations;
- a tool to help teachers monitor and communicate the student's growth;
- a plan developed, implemented, and monitored by school staff;
- a flexible, working document that can be adjusted as necessary;
- an accountability tool for the student, his or her parents, and everyone who has responsibilities under the plan for helping the student meet his or her goals and expectations;
- an ongoing record that ensures continuity in programming;
- a document to be used in conjunction with the provincial report card.

An IEP is not...

- a description of everything that will be taught to the student;
- an educational program or set of expectations for all students;
- a means to monitor the effectiveness of teachers;
- a daily plan.

Figure E.1 is a sample checklist, listing the information that should be included in an IEP.

Figure E.1: Sample Checklist

Important Information to Be Included in an IEP

- Student's strengths and needs as recorded on the statement of decision received from the IPRC
- Relevant medical/health information
- Relevant formal (standardized) assessment data
- Student's current level of educational achievement in each program area
- Goals and specific expectations for the student
- Program modifications (changes to the grade-level expectations in the Ontario curriculum)
- Accommodations required (supports or services that will help the student gain access to the curriculum and demonstrate learning)
- Special education and related services provided to the student
- Assessment strategies for reviewing the student's achievements and progress
- Regular updates, showing dates, results, and recommendations
- Transition plan (if required)

THE IEP PROCESS

Regulation 181/98, subsection 6(8), as amended by Ontario Regulation 137/01, requires the principal, within 30 school days after placement of the pupil in the program, to ensure that the plan is completed and a copy of it sent to a parent of the pupil and, where the pupil is 16 years of age or older, the pupil.

Under Regulation 181/98, the principal is responsible for ensuring that an IEP is developed for each exceptional pupil. However, although the principal is responsible for ensuring the development of the IEP, he or she may delegate many tasks related to the IEP to teachers.

Once a student has been identified as exceptional and placed in a special education program, the principal should assign to one teacher the primary responsibility for coordinating the development, implementation, and monitoring of the student's IEP.

A *team approach* should underlie the IEP process, and the process should be *goal-oriented*; that is, it should always keep the goals and expectations for the student in mind.

The IEP process involves the following five phases:

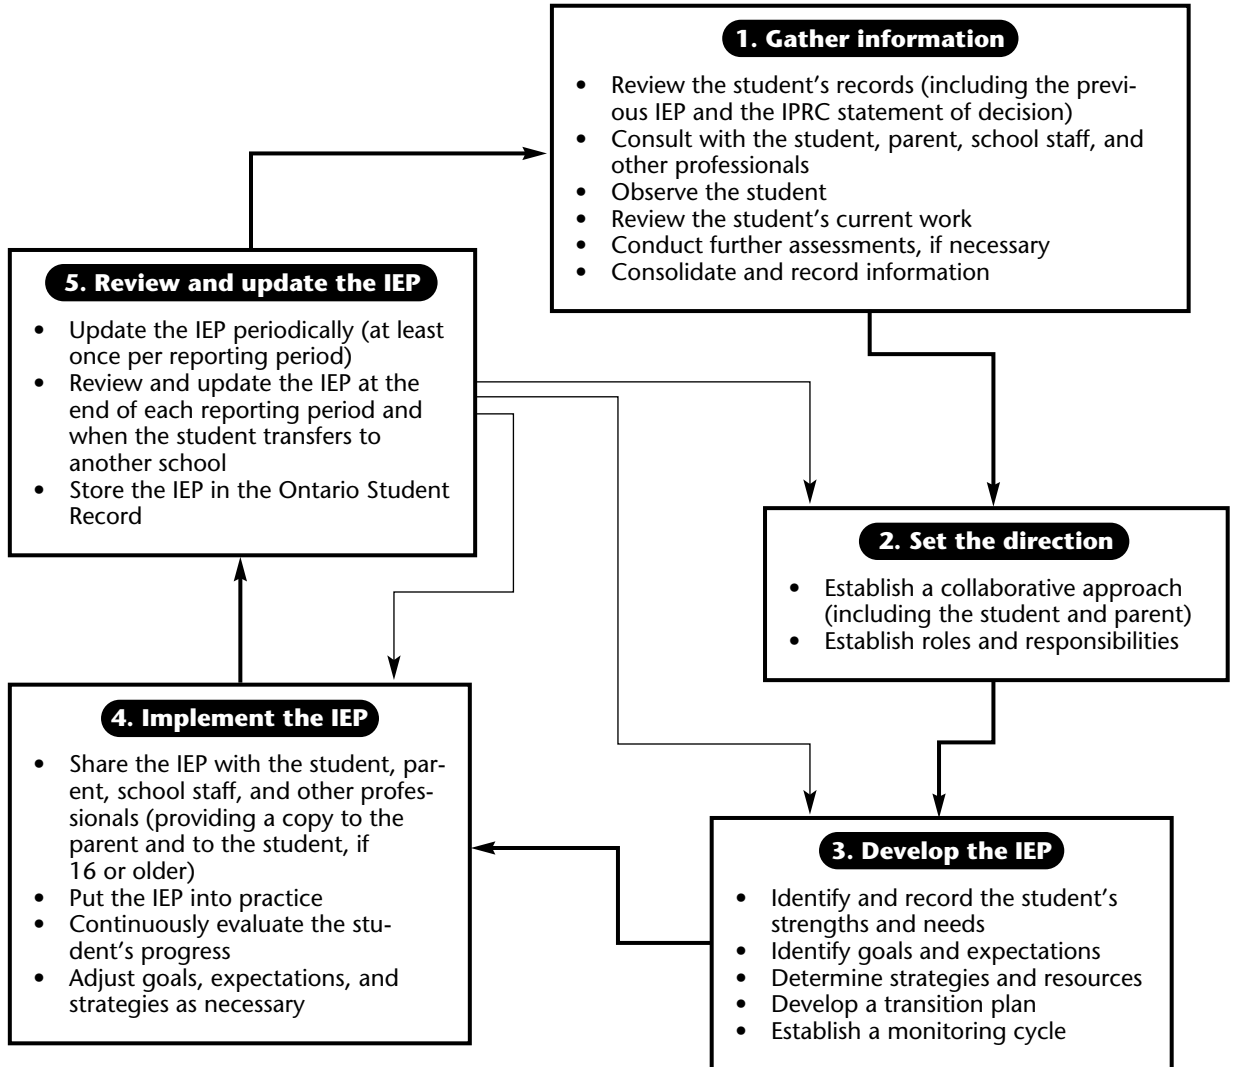

1. Gather information
2. Set the direction
3. Develop the IEP
4. Implement the IEP
5. Review and update the IEP

Figure E.2 presents an overview of the five phases. Members of the student's IEP team may vary the emphasis to meet the student's individual needs, and they may work on more than one phase simultaneously. The circular pattern shown in the figure indicates that the IEP process is continuous, involving ongoing review, evaluation, and adjustments. The arrows extending from the "review and update" box indicate that the review phase involves references back to all earlier phases. Each phase in the process is discussed in detail in the pages that follow Figure E.2.

Figure E.2: Overview of the IEP Process

The IEP Process

The principal assigns to one teacher primary responsibility for coordinating the development, implementation, and monitoring of the student's IEP.

PHASE 1: GATHER INFORMATION

Regulation 181/98, clause 6(6)(b), requires the principal, in developing the individual education plan, to take into consideration any recommendations made by the committee (IPRC) or the Special Education Tribunal, as the case may be, regarding special education programs or services.

Much of the information described below may be in the student's previous IEP, which should be located in the student's Ontario Student Record (OSR). To save time and effort, the OSR should be checked first.

Information may be gathered about the student's academic achievements, attendance, school behaviour, communication skills, likes, dislikes, talents, problem-solving skills, social skills, learning style, self-concept, mobility, and personalized equipment requirements. This kind of information will help those working with the student to refine their understanding of the student, and will provide a sound basis for developing an appropriate IEP.

Sources of information include the following: the IPRC's statement of the student's strengths and needs and its recommendations for a program and services (from either an initial or a review IPRC); the student's OSR and previous IEP; the student's current work; consultations with the parent, teachers, and others who know the student; observations of the student; and, for students in Grade 7 and beyond, the student's annual education plan. Several of these sources are discussed in detail below.

Review the Student's Records

The student's OSR should be examined for the following information:

- the student's registration form (languages spoken, last school attended, enrolment history);
- relevant medical information;
- the IPRC's decision, including its statement of the student's strengths and needs and any recommendations it may have made respecting programs and services for the student;
- assessment reports from staff consultants and outside agencies, summaries of tests, and interpretive reports;
- the student's previous IEP;
- the student's previous report cards.

Regulation 181/98, clause 6(6)(a), requires the principal, in developing the individual education plan, to consult with the parent and, where the pupil is age 16 or older, the pupil.

The Education Act and the Municipal Freedom of Information and Protection of Privacy Act in the case of school boards (the Freedom of Information and Protection of Privacy Act in the case of Provincial Schools) contain requirements related to the collection, use, and release of personal information.

Principals and teachers should consult with their board's freedom-of-information coordinators about the steps required to obtain access to personal information about the student that is not contained in the student's OSR (for example, from other professionals who work with the student), and about providing information contained in the student's OSR to other professionals.

Consult With the Student, Parent, School Staff, and Other Professionals

Information should be obtained from a variety of sources and shared among team members so that the planning team can develop a comprehensive view of the student's learning profile and programming needs. Consultation should be a continuous process, involving the student and his or her parent, in-school staff, support personnel, and representatives of outside agencies or services. Some sources who should be consulted are discussed below.

Parents

Parents can provide an invaluable perspective on their child's personality, development, and learning. Open communication and cooperation between home and school will also ensure that the approach and expectations of both are consistent.

Students

As far as possible, all students for whom an IEP is developed should be involved in the IEP process. At the information-gathering phase, they should be encouraged to share their perceptions of their learning strengths, needs, talents, and interests. This information may be gathered through interviews, discussions, and interest inventories.

Previous Teachers

Previous teachers can provide information about a student's strengths and needs and about programs, services, resources, and strategies that have worked well in the past.

Other Professionals

The following people should be consulted for information as necessary and appropriate:

- school administrators
- counsellors
- teacher-advisers
- educational assistants
- resource teachers
- consultants
- occupational therapists
- physiotherapists
- other medical professionals
- social workers
- speech-language pathologists
- psychologists and psycho-educational consultants
- service providers from appropriate community agencies

Observe the Student

By observing the student, teachers may learn:

- how the student responds to text and non-print alternatives, approaches new tasks, persists with tasks, interacts with others, organizes time and materials, uses language, performs individually and in group activities, and responds to cues (including auditory, visual, and direct and indirect verbal cues);
- how the student responds to the number of people in the immediate area and the behaviour of teachers and support staff, interacts with peers, and responds to authority;
- how the student's learning is affected by environmental variables such as lighting, sound, temperature, the physical arrangement of the classroom, the time of day, and routines and schedules.

Teachers may wish to record their observations of students in a variety of ways – for example, notes made about classroom events; checklists; frequency data on specific behaviours; audio and video recordings; interview transcripts; notes reflecting formal and informal observations made by the student's family members, school staff, and support personnel (keeping in mind the privacy requirements cited above); and notes reflecting the student's self-evaluations.

Review the Student's Current Work

Samples of the student's work are good sources of information. They may include journals, selected pages from notebooks, writing samples, art samples and portfolios, audio and video recordings, assignments, unit tests, diagnostic tests, and peer evaluations.

Conduct Further Assessments, If Necessary

Once information has been gathered from the above sources, it should be reviewed to determine if it is sufficient to enable the teacher to plan and implement a program. If it is sufficient, no further assessments may be necessary. If the information is insufficient, additional assessments should be conducted to fill in the gaps.

Additional assessments may include the following: additional observations and work samples; diagnostic tests; teacher-created tests; developmental assessments; medical assessments; psychological assessments; communication assessments; educational assessments; living/vocational skills assessments; and observations of the student in the context of daily routines.

The decision to conduct further assessments should be made in consultation with the student's parent. It is important to inform parents about assessments and help them to understand the nature of the assessments – the

process their child will go through – as well as the benefits and possible outcomes. This will ensure that they can make informed decisions about whether to consent to the assessments. See also the earlier note about privacy requirements.

Consolidate and Record Information

The information gathered should be consolidated and examined for details about the student's strengths, interests, and needs, and for indications of consistent patterns. Assessments should be checked against information gathered from other sources to determine whether the other information supports the patterns revealed by the assessments. Discrepancies should also be examined.

Information about the student's current level of achievement, strengths, and interests, as well as the results of standardized tests, should be recorded in the IEP. The information recorded about the student's current level of achievement should reflect as closely as possible the grade level, range, or performance level for each program area being developed, so that it can serve as a baseline against which the student's progress and achievements in each area can be monitored and evaluated.

PHASE 2: SET THE DIRECTION

Establish a Collaborative Approach

The IEP should be developed collaboratively by those who know the student best and those who will be working directly with the student. Where many individuals are involved in contributing to the development of the IEP and monitoring the effectiveness of selected strategies and resources, a team approach is recommended.

Part C of this guide contains information about in-school teams. This model would be ideal for IEP teams and is recommended wherever feasible. But even where a school is unable to follow the student-support-team model, collaboration among those involved with the exceptional pupil is vital.

The membership of an IEP team can and should vary according to the needs of the individual student. Members may include the student, the student's parents, the student's teachers and teacher-adviser, the guidance counsellor, the principal, and appropriate special education staff and support personnel. If the IEP is subject-specific — as at the secondary level — the team's membership should be modified to reflect this situation.

Collaboration is important to ensure that each member of the team has a common understanding of the student's strengths, interests, and needs. Each team member understands the student in a different way and can lend a different perspective. By bringing these perspectives together, the team can develop a common understanding of the student and a successful strategy for meeting the student's needs.

A team approach enables all those who have an interest in and responsibility for meeting the student's needs to:

- develop a thorough understanding of the student's strengths, interests, and needs;
- share information and observations about the student's behaviour and learning in a variety of settings;
- reach consensus about educational expectations for the student's learning at school, at home, and in the community, with the support of the student's family;
- reach consensus about the type and level of support required from related support services personnel;
- suggest appropriate educational methods and interventions;
- contribute to decisions about integrating support services into the classroom.

Responsibilities that are mandated by Regulation 181/98 are marked with an asterisk (*).

Establish Roles and Responsibilities

Although the principal should assign to one teacher the primary responsibility for coordinating the development of the IEP, all team members have important roles and responsibilities in the IEP process.

The roles and responsibilities of various team members in the development, implementation, and monitoring of IEPs are outlined below. The lists attempt to cover all aspects of an IEP, but responsibilities and tasks will vary with the individual student. They may not all be required in each situation.

The Principal

- assigns to one teacher the primary responsibility for the student's IEP;
- facilitates collaborative planning, evaluating, and updating;
- ensures that IEPs are completed within 30 school days¹ of a student's placement in the program;*
- ensures that IEPs are implemented, evaluated, and updated at least once per reporting period;
- ensures that all school personnel who work with the student understand their responsibilities regarding the implementation of the IEP;
- ensures that the recommendations of the IPRC (with respect to a special education program and services such as support personnel, resources, and equipment) are taken into account in developing the IEP;*
- ensures that parents and the student, if age 16 or older, are consulted in the development of the IEP;*
- in preparing a transition plan, consults with such community agencies and postsecondary institutions as he or she considers appropriate;*
- ensures that a copy of the IEP is provided to the parents and to the student, if age 16 or older;*
- ensures that the updated IEP is stored in the OSR, unless a parent of the student objects in writing.*

The Classroom Teacher

- collaborates in the IEP process;
- contributes to the information-gathering stage (background information, assessment information, work samples, observations, etc.);
- demonstrates awareness of the parents' expectations for their child's program;
- plans and carries out instructional programs for the student;
- modifies or differentiates the expectations for the student's learning as required by the IEP;
- implements accommodations required by the student to achieve the learning expectations;

1. As amended by Ontario Regulation 137/01. See note on page H34 in Appendix 10.

- develops strategies for assessing and communicating the student's progress;
- maintains ongoing communication with the student's parents, other teachers, and other professionals involved with the student.

The Special Education Teacher

- collaborates in the IEP process;
- provides diagnostic assessments as appropriate to determine the student's strengths and needs, if required;
- generates ideas and suggestions for program modification or differentiation or accommodations;
- provides advice about materials and resources;
- provides support to the student's classroom teachers as appropriate;
- plans and carries out instructional programs for the student;
- develops strategies for assessing and communicating the student's progress;
- maintains ongoing communication with the student's parents and other teachers.

The Educational Assistant

- collaborates in the IEP process;
- helps the student with learning activities under the direction of the teacher;
- assists with appropriate modifications and accommodations as described in the IEP;
- monitors and records the student's achievements and progress relative to the expectations described in the IEP, under the direction of the teacher;
- maintains ongoing communication with the student's teachers.

Support Services Personnel

- participate in the IEP process and serve on the IEP team, if requested;
- help determine the student's learning strengths and needs;
- develop strategies for incorporating into classroom routines the learning and therapy that meet the student's needs;
- train staff to implement strategies;
- provide advice about materials and resources;
- provide technical assistance;
- act as a resource for and support to the student's family;
- maintain ongoing communication with the student's teacher and the IEP team;
- conduct assessments as necessary, with informed consent.

As noted earlier, principals and teachers should consult with their board's freedom-of-information coordinators about the steps required to obtain access to personal information about the student that is not contained in the student's OSR (for example, from other professionals who work with the student) and about providing information contained in the student's OSR to other professionals.

Regulation 181/98, clause 6(6)(a), requires the principal, in developing the Individual Education Plan, to consult with the parent and the pupil, if age 16 or older. Subsection 6(8), as amended by Ontario Regulation 137/01, requires the principal, within 30 school days after placement of the pupil in the program, to ensure that the plan is completed and a copy of it sent to a parent of the pupil and the pupil, if age 16 or older.

The Student

- identifies and explains his or her goals, priorities, and preferences;
- demonstrates an understanding of the IEP and works actively to achieve goals and expectations;
- monitors progress towards goals;
- considers his or her IEP when developing and reviewing an annual education plan (students in Grade 7 and beyond).

The nature and degree of a student's involvement in the IEP process will vary. However, members of the IEP team should ensure that students understand the purpose of their IEP and how the goals and expectations in the plan are individually tailored, evaluated, reviewed, and updated. They should also ensure that students know that they can participate in the IEP process and how: that is, by becoming, where appropriate, members of the team and attending team meetings; by revealing their learning priorities and preferences; by helping to set their own learning goals and expectations; and by monitoring their own progress. Students should understand how important it is for them to take an active role in their own learning. As part of the self-assessment process, students should, where possible, fill in page 3 of the provincial report card.

The Parents

- collaborate in the IEP process;
- advocate for their child's best interest;
- provide up-to-date medical information and any relevant assessments they may have about their child;
- provide important information about their child's likes, dislikes, learning styles, interests, and reactions to situations, and about the talents and skills their child demonstrates in the home and community;
- reinforce and extend the educational efforts of the teacher by providing opportunities to practise and maintain skills in the home;
- provide feedback on the transfer of skills to the home and community environments;
- maintain open communications with the school.

Members of the IEP team should involve parents in the collaborative process as early as possible. The educational priorities identified by family members are important to the student's overall learning experience. In addition to the responsibilities outlined above, parents play an important role in the IEP process by communicating to the IEP team a picture of the life of their child thus far, suggesting ways to avoid potential problems, and helping the team achieve continuity of programming for the student.

Principals and teachers can support parental involvement by:

- communicating openly and regularly with parents in language that is clear and free of jargon;
- clarifying how parents can participate in the IEP process;
- giving parents the opportunity to specify how, and to what degree, they wish to become involved in their child's educational program;
- checking regularly with parents to share effective strategies and gather feedback;
- contacting parents by telephone as well as in writing to notify them of meetings of the IEP team;
- advising parents of the topics that will be discussed at the IEP meeting and who will attend;
- staying alert to possible parental concern or confusion (asking questions, if necessary);
- clarifying information where necessary to ensure that parents understand their child's IEP and the IEP process;
- ensuring that, as required by Regulation 181/98, parents are sent a copy of the IEP.

PHASE 3: DEVELOP THE IEP

Identify and Record the Student's Strengths and Needs

Many factors – physical, intellectual, educational, cultural, emotional, and social – influence a student's ability to learn. Understanding these factors can help the IEP team to develop statements of strengths and needs.

The student's strengths can be used to address his or her weaknesses. Identifying these strengths is essential for appropriate program development.

Statements of the student's strengths and needs should be recorded in the IEP form. The basis of these statements should be the description, contained in the IPRC's statement of decision, of the student's strengths and needs and any recommendations the IPRC may have made about programs and services.

The IEP's statements of the student's strengths and needs should describe observable factors that influence the student's learning and areas in which the student demonstrates significant strengths or the need for significant support. They should not describe the programs, services, or strategies that will address needs. It is the cluster of the needs described in these statements that should provide a clear understanding of the type of program required by the student. For example, statements of strengths and needs might complete the following sentences:

- This student demonstrates a significant strength in ...
- This student requires significant instruction/support to ...

Examples of needs statements include the following:

- This student requires significant instruction/support to ...
 - communicate with others (using communication aids such as Braille, sign language, alternative/augmentative systems, etc.);
 - develop and maintain motor skills (fine motor skills, gross motor skills, etc.);
 - orient himself or herself and move from place to place independently;
 - develop independence in daily living (skills and routines involved in using a toilet, dressing, eating, etc.);
 - control self-abusive behaviour;
 - demonstrate organizational skills;
 - demonstrate decision-making and problem-solving skills;
 - solve multi-step problems requiring numerical answers;
 - develop reading skills (phonemic awareness, reading comprehension, Braille skills).

Identify Goals and Expectations

Writing goals and expectations is part of the IEP process. Written goals and expectations:

- provide the student with a focus and motivation for his or her learning;
- help teachers develop learning activities that are specifically related to the strengths, interests, and needs of the student;
- enhance accountability by providing everyone with a point of reference against which to measure achievement;
- facilitate communication between the team and the parent/student;
- facilitate collaboration.

Goals

The goals set out in the IEP should be based on the strengths and needs of the student. They constitute the best prediction of what the student should be able to accomplish in a program area by the end of the school year.

Goals are targets, not promises. They may reflect the overall expectations in Ontario's curriculum policy documents or a modified version of the overall expectations, or they may be alternatives developed to reflect the student's individual strengths and needs. Although goals should indicate the level of performance to be achieved by the end of the school year, some goals may be achieved sooner and some may take more than a year. Because some students may show extraordinary progress and some may experience a delay in progress at certain times, goals may require modification as the year goes on.

Goals must be written for each subject, course, or skill area to which the student's IEP applies. They are written to address specific subject areas, such as language arts, mathematics, science, social studies, and fine arts, or skill areas, such as vocational skills, gross motor development, perceptual motor skills, and social skills. Goals may also address the depth and breadth of the program and the pace of learning.

Examples of goal statements include the following:

- This student will ...
 - display appropriate on-task behaviour during independent work periods;
 - use correctly the conventions of spelling, grammar, and punctuation with the support of print and electronic resources;
 - develop reading comprehension skills at a Grade [*specify grade*] level;
 - demonstrate coherent organization of ideas in final drafts of written work;
 - identify and be able to use [*specify number*] PIC-symbols;
 - dress himself or herself independently;
 - compose stories at a Grade [*specify grade*] level;
 - apply critical-thinking skills to comprehend, describe, and solve problems;
 - improve basic work skills through on-site work experience;
 - demonstrate knowledge of how his or her hearing aid works and assume responsibility for the care of it;

- develop his or her ability to use figurative language through the use of idioms, similes, metaphors, and proverbs;
- gain independence in simple routines.

Expectations

Expectations are statements that identify the knowledge and skills the student should develop or be able to demonstrate. They represent the learning a student requires to move from his or her current level of achievement to his or her learning goal. The achievements reported on the provincial report card are directly related to these expectations.

Expectations can be written to cover an approximately six- to eight-week or standard reporting period in the school calendar, but they should be reviewed and updated as necessary. When expectations are changed or added, they should be dated.

Exceptional pupils should be given every opportunity to achieve the learning expectations set out in the Ontario curriculum policy documents. In fact, the expectations for most exceptional pupils will be the same as, or similar to, those in the Ontario curriculum. However, as with the goals discussed above, they may be modified from those in curriculum policy documents or they may be alternatives developed to reflect the individual student's strengths and needs.

Expectations could be:

- the same as the appropriate grade expectations in the Ontario curriculum, but with accommodations (supports or services that help the student gain access to the curriculum and demonstrate learning);
- differentiated, as in gifted programs;
- selected from the Ontario curriculum, but with modifications (changes to the grade-level expectations) or accommodations; or
- alternative expectations, modified so extensively from those in the Ontario curriculum that, in effect, the curriculum's expectations do not form the basis for the program area.

Examples of statements of expectations include the following:

- This student will ...
 - identify the main idea and supporting details in a story;
 - read and write numerals from 1 to 10;
 - complete a two-piece puzzle;
 - manage zippers, snaps, and Velcro fasteners;
 - write coherently, organizing ideas logically and creatively;
 - use strategies to proofread, edit, and correct work;
 - use communication skills in social settings with peers.

Regulation 181/98, clause 6(6)(b), requires the principal, in developing the individual education plan, to take into consideration any recommendations made by the committee (IPRC) or the Special Education Tribunal, as the case may be, regarding special education programs or services.

Regulation 181/98, subsection 6(4), requires that, where the pupil is 14 years of age or older, the individual education plan must also include a plan for transition to appropriate postsecondary school activities, such as work, further education, and community living. Subsection 6(5) states that subsection 6(4) does not apply in respect of a pupil identified as exceptional solely on the basis of giftedness.

Regulation 181/98, subsection 6(7), requires the principal, in developing a transition plan, to consult with such community agencies and postsecondary educational institutions as he or she considers appropriate.

Determine Strategies and Resources

Strategies and resources for helping the student achieve his or her goals and expectations should be based on the information gathered and recorded in the IEP. When this section is being developed, the IPRC's statement of decision should be reviewed to ensure that any recommendations the committee made about special education programs or services are taken into consideration. However, the areas addressed in the IEP should not be limited to the suggested items in the IPRC's statement of decision.

The strategies and resources section of the IEP should identify the specific accommodations, human and material resources, and teaching methodologies and strategies required to facilitate the student's ability to acquire, store, and retrieve knowledge and skills. It should also indicate the intensity of the support required, and who is responsible.

Develop a Transition Plan

Some exceptional pupils may experience difficulty in making transitions from one grade level or course to another, from one school or school board to another, and from secondary school to postsecondary education, work, or community living. A detailed and coordinated transition plan, implemented well before the anticipated move, will help to prepare these students and assist them in making a smoother transition.

A good transition plan includes modifications to orientation and exit programs and links to postsecondary institutions, outside agencies, and community partners, to help students gain access to postsecondary options and the supports that will help them to take advantage of these options.

While transition plans are not required for students who are identified as exceptional solely on the basis of giftedness, gifted students and students younger than 14 may also benefit from such plans.

In addition to consulting with community agencies and postsecondary institutions, those developing the transition plan should take account of any recommendations made by the IPRC about special education programs and services and should coordinate the transition plan with the student's annual education plan.

The following are some elements that a transition plan may cover. It is important to note that, as the transition plan is an integral part of the IEP, there may be relevant elements appearing elsewhere in the IEP. The transition plan itself must specify:

- specific goals for the student's transition to postsecondary activities. The goals must be realistic and must reflect the strengths, needs, and interests of the student;
- the actions required, now and in the future, to achieve the stated goals. The actions identified must build on the student's identified strengths, needs, and interests;

- the person or agency (the student, parents, educators, providers of specialized support and services, community agencies) responsible for or involved in completing or providing assistance in the completion of each of the identified actions;
- timelines for the implementation of each of the identified actions.

In the event that a student is receiving support from a service provider funded by the Ministry of Community and Social Services (MCSS), IEP planning needs to be linked to the MCSS planning process outlined in the January 1998 MCSS document *Individual Support Agreement for People With Developmental Disabilities*. With the parents' permission, the IEP may constitute the educational component of the agreement.

It should be noted that, with the establishment of Making Services Work for People, a new framework for children and people with developmental disabilities introduced by MCSS, families and individuals seeking support and services are able to obtain accurate information from one source. MCSS area offices can provide school board personnel with more information regarding this initiative, and with local contacts.

Establish a Monitoring Cycle

Monitoring of the student's progress in meeting the expectations and achieving the goals will be most effective if it occurs on a regular, cyclic basis. All those involved in providing programming for the student have an important role to play in reflecting on the student's achievement and the appropriateness of the modifications, accommodations, strategies, and resources being used.

The teacher responsible for monitoring the student's progress and updating the IEP, in collaboration with other team members as appropriate, should:

- identify the criteria for evaluating the program developed for the student (for example, the criteria could include collection of data from a variety of sources to enable the team members to determine the student's level of achievement and make judgements, recommendations, and decisions about future programming);
- establish times to monitor and assess the student's achievements and progress relative to the expectations and goals set out in the plan;
- summarize and record, with dates, at least once per reporting period, the student's progress towards meeting the expectations;
- record and document changes in the IEP, noting the dates of the changes;
- make the necessary adjustments to the student's IEP and in the student's programming.

See the section entitled "Phase 5: Review and Update the IEP", page E24, for additional recommendations about monitoring procedures, including meetings to review and update the student's plan.

PHASE 4: IMPLEMENT THE IEP

Regulation 181/98, subsection 6(8), as amended by Ontario Regulation 137/01, requires the principal, within 30 school days after placement of the pupil in the program, to ensure that the plan is completed and a copy of it sent to a parent of the pupil and, where the pupil is age 16 or older, the pupil.

Share the IEP With the Student, Parent, School Staff, and Other Professionals

Once the IEP is developed, the IEP team should ensure that everyone involved with the student is aware of its contents. The team should:

- review the IEP with the principal;
- meet with all appropriate staff to discuss how the activities described in the IEP will be implemented, the responsibilities associated with the plan, and how the plan will be monitored;
- meet with the parents and the student to explain and discuss the contents of the IEP and the monitoring plan and to discuss parental involvement in support of the plan.

Put the IEP Into Practice

Appropriate members of the team should implement the IEP by:

- translating the IEP into daily plans for learning, based on the student's individual interests, strengths, needs, and achievement levels;
- determining the individual timetables of educational assistants and support staff involved with the student on a daily basis;
- using organizational groupings, learning strategies, and resources that will help the student to achieve the goals and expectations specified in the plan;
- following the monitoring plan to evaluate the student's achievements and progress towards meeting the goals and expectations specified.

Continuously Evaluate the Student's Progress

As noted in the earlier section on the monitoring cycle, a formal review and update of the IEP should take place at least once every reporting period.

However, team members should continuously monitor, assess, and evaluate the student's progress to determine if program and teaching adjustments are necessary. They should:

- view the IEP as a working document;
- use a variety of techniques to assess the student's progress, selecting assessment strategies that can be used naturally in the context of classroom learning;
- develop and implement a system for recording the student's demonstrations of learning.

Adjust Goals, Expectations, and Strategies as Necessary

If the student is not meeting the expectations and goals, the plan may need to be adjusted by:

- developing new expectations, if learning is proceeding at a faster rate than had been anticipated by the plan;
- breaking expectations into smaller steps, if learning is proceeding at a slower rate than had been anticipated by the plan;
- altering the strategies, resources, or level of support.

See the next section, "Phase 5: Review and Update the IEP", for more recommendations about reviewing and updating procedures.

PHASE 5: REVIEW AND UPDATE THE IEP

Update the IEP Periodically

Those who are involved in monitoring the student's achievements and progress and reviewing and updating the IEP may wish to consider the questions in Figure E.3 in determining whether program and teaching adjustments are necessary and, if so, what they should be.

They may also want to refer to all the previous phases of the IEP process and reconsider the activities involved in them, in order to ensure that every factor has been taken into account and every step followed. (See Figure E.2, "Overview of the IEP Process", on page E7.)

In the course of monitoring a student's progress, members of the team may wish to hold a meeting to review and update the student's IEP. Figure E.4 is a sample form for recording an IEP update meeting. Teachers may modify or adapt the sample for their own use.

Figure E.3: Sample Questions for an IEP Review

Questions to Consider in Reviewing a Student's Achievements and Progress

- ❓ Is the IEP still an accurate reflection of the student's programming needs?
- ❓ How effective are the strategies and resources selected to support the student's learning? Should changes be made?
- ❓ How much progress has the student made towards achieving the goals and meeting the expectations set out in the plan? Is the assignment of responsibility effective for achieving the goals? If not, what changes should be made?
- ❓ Is there any new information that suggests changes should be made in the student's programming? Should additional information be gathered?
- ❓ Should new goals be selected and new expectations created to reflect more accurately the student's changing strengths, needs, and interests?
- ❓ Is the student demonstrating a sense of responsibility for his or her learning?
- ❓ Does the student's family have the necessary information and other supports to assist the student in meeting goals and expectations as set out in the IEP?

Figure E.4: Sample Form for Recording an IEP Update Meeting

IEP UPDATE MEETING

Student's Name: _____

Date of Meeting: _____

In Attendance: _____

Review goals and expectations (clarify goals and expectations, determine changes and adjustments needed):

Develop new expectations (based on the rate at which the student is learning and new circumstances that may have arisen):

Review and evaluate the programming, strategies, resources, and services used to date:

Comments:

Responsibilities:

Regulation 181/98, section 8, requires the principal to ensure that the Individual Education Plan for a pupil is included in the pupil's Ontario Student Record, unless a parent of the pupil has objected in writing.

Review and Update the IEP at the End of Each Reporting Period and When the Student Transfers to Another School

A student's IEP must be included in his or her OSR unless the parent has objected in writing.

The requirement to store a student's IEP in his or her OSR ensures that the student's relevant medical information, details of the student's strengths, needs, and specific learning expectations, and information about the special education programs, services, strategies, and resources used to help the student learn are immediately available to teachers new to working with the student – for example, when the student moves to a higher grade or transfers to another school.

To ensure that the IEP stored in the OSR is up to date, at the end of each reporting period and when the student transfers to another school, the IEP team should meet to update the IEP (including the student's transition plan) and to add written recommendations. Providing recommendations about proven methodologies and materials, equipment, and strategies that were particularly effective will help to ensure continuity in programming for the student.

Information that might be summarized in the IEP at the end of a school year includes the following:

- successes and growth that occurred in the year under review;
- instructional strategies and materials that worked particularly well;
- support services (personnel, equipment, materials) and level of intensity that continue to be required;
- challenges that arose and that may continue to require attention;
- goals that continue to require focus.

If the expectations set out in the plan have been met and the goals achieved, the following questions might be asked:

- What level of special education support or related services is now required?
- What does the student need to learn next?

An effective way to provide continuity in programming is through communication between the student's current teacher and the receiving teacher. When students move from the elementary panel to the secondary panel, guidance and special education staff should also be included in the discussions.

The following procedures are recommended for the sending and receiving teachers:

Sending teachers should:

- ensure that all current and relevant information is in the student's OSR (updated IEP, most recent progress reports, and assessment reports);
- meet with other members of the student's IEP team (guidance staff, special education staff, appropriate teachers, support staff) before transition periods (e.g., the beginning of each semester in secondary schools; when the student changes schools) to summarize recommendations;
- share the IEP with the receiving teacher (keeping in mind the privacy requirements mentioned earlier);
- learn as much as possible about the new program to help prepare the student for the move;
- encourage the student and his or her parents to visit the new setting in advance and, in the case of transition to a secondary school, to meet with the special education department head and guidance staff at the secondary school.

Receiving teachers should:

- check the documents in the student's OSR, especially the IEP and the IPRC's statement of decision;
- review with the student his or her annual education plan;
- invite the student to visit the new setting in advance.

The sending and receiving teachers should arrange for the student to tour the new site and spend some time in the classroom or with special education or guidance staff. At the secondary school level, special education and/or guidance staff can facilitate this process.

Store the IEP in the Ontario Student Record

As noted above, the up-to-date IEP, with recommendations, must be stored in the student's OSR, unless a parent of the student objects in writing.

Figure E.5 is a sample checklist for the IEP process.

Figure E.5: Sample IEP Process Checklist

IEP Process Checklist

- Assign primary responsibility for the IEP

Gather Information

- Review the student's records (including the previous IEP and the IPRC statement of decision)
- Consult with the student, parent, school staff, and other professionals
- Observe the student
- Review the student's current work
- Conduct further assessments, if necessary
- Consolidate and record information

Set the Direction

- Establish a collaborative approach (including the student and parent)
- Establish roles and responsibilities

Develop the IEP

- Identify and record the student's strengths and needs
- Identify goals and expectations
- Determine strategies and resources
- Develop a transition plan
- Establish a monitoring cycle

Implement the IEP

- Share the IEP with the student, parent, school staff, and other professionals (providing a copy to the parent and to the student, if age 16 or older)
- Put the IEP into practice
- Continuously evaluate the student's progress
- Adjust goals, expectations, and strategies as necessary

Review and Update the IEP

- Update the IEP periodically (at least once per reporting period)
- Review and update the IEP at year end and when the student transfers to another school
- Store the IEP in the Ontario Student Record

SCHOOL HEALTH SUPPORT SERVICES

School board staff are increasingly aware of the importance of working collaboratively with agencies of other ministries in order to meet the special needs of students, whether or not they are identified as exceptional.

Policy/Program Memorandum (PPM) No. 81, "Provision of Health Support Services in School Settings", issued in July 1984, outlines the respective responsibilities of the school boards and Ministries of Health and Long-Term Care (MOHLTC) and of Community and Social Services (MCSS) for ensuring that students with special needs receive the health support services they require in order to benefit from an educational program. PPM No. 81 was intended to introduce a joint approach to the provision of health support services in schools. It describes in detail the role of school boards, with particular emphasis on their role in the administration of oral medication. It also describes, in broad terms, the roles of school boards and health and social service agencies in a variety of other areas.

From 1984 to the present, the School Health Support Services Program of the Ministry of Health and Long-Term Care has provided services through Home Care Centres (now Community Care Access Centres [CCACs]) to facilitate the integration of children with special health needs into the regular school system. (See Part G of this document for information about the more recent role of Community Care Access Centres.)

The role of the Ministry of Community and Social Services, as indicated in PPM No. 81, is limited to the provision of services in care and treatment facilities.

PPM No. 81 differentiates the responsibilities of the three ministries for services such as administering oral and injected medication, catheterization and suctioning, mobility assistance, physiotherapy and occupational therapy, and speech therapy. These responsibilities may be summarized as follows:

Ministry of Education (School Board)

- administering oral medication
- physical assistance (lifting, positioning, feeding, toileting)
- physio/occupational therapy (general maintenance exercises)
- speech and language services (Articulation/speech sound production problems, fluency disorders, and non-speech communication are shared responsibilities with the Ministry of Health and Long-Term Care. Language disorders are the responsibility of school boards.)

Ministry of Health and Long-Term Care

- injection of medication
- catheterization
- manual expression of bladder/stoma
- postural drainage/suctioning
- tube feeding
- physio/occupational therapy (intensive clinical treatment)
- speech therapy (treatment) and assessment (Articulation/speech sound production problems, fluency disorders, and non-speech communication are shared responsibilities with the Ministry of Education. Voice disorders and resonance problems are the responsibility of the Ministry of Health and Long-Term Care.)

Ministry of Community and Social Services

- all services in children's residential care/treatment facilities

Two companion documents developed in 1988 and 1989 provide information to assist boards in the coordination and delivery of such specialized services. These documents are:

- the *Interministerial Guidelines for the Provision of Speech and Language Services, 1988* (these guidelines were developed to reduce the variation in service levels across the province and to provide much more detail than PPM No. 81 in the area of speech and language services);
- a 1989 assistant deputy minister's memorandum clarifying interministerial responsibilities regarding catheterization and suctioning procedures.

EDUCATIONAL PROGRAMS IN GOVERNMENT-APPROVED FACILITIES FOR CARE, TREATMENT, CUSTODIAL, OR CORRECTIONAL PURPOSES

The needs of most school-age children/youth can be effectively met within their family environments and through regular attendance in local schools. There are, however, conditions where a child/youth's social and/or medical needs require admission to a care or treatment facility. In other instances, children may be admitted to residence in a custodial or correctional facility. In either case, special arrangements may be required to address the student's educational needs.

Ministry of Education PPM No. 85, "Educational Programs for Pupils in Government-Approved Care and/or Treatment Facilities", 1986, outlines ministry policy for the development of educational programs that recognize the primacy of the care and/or treatment needs of the children/youth who have been admitted to government-approved facilities. The Grants Regulation, issued annually, provides the regulatory basis for funding educational programs provided by district school boards for such children.

When a child/youth's need for treatment is so severe that a regular day school or special education classroom program cannot serve his or her needs, the child may be admitted to a care and treatment facility. In such cases, the facilities may ask school boards to enter into written agreements with them in order to provide the children/youth with educational programs. The board would provide the teachers and, if necessary, educational assistants in the child's setting as part of a multidisciplinary team. The educational program will be provided in support of the treatment and will become part of a plan of service. The same is true for youth in custodial or correctional facilities.

A child in a care, treatment, custodial, or correctional facility receiving an educational program in the facility must not be recorded as a student of a school board and is not eligible for funding, on either a full-time or a part-time basis, as a "resident pupil" of a district school board. (See also Part C, "Transition to School From Care and Treatment Facilities and Correctional Facilities", page C28.)

Programs for Children/Youth in Facilities

The care, treatment, custody, correction, and education of these students involve the direct and indirect services of several kinds of trained professionals, such as child care workers, social workers, nurses, psychologists, medical doctors, psychiatrists, and teachers. Supervision, guidance, and learning can best be accomplished through cooperative development of individual plans for each child. In the preparation and implementation of these plans, education programs often become intertwined with social and medical programs.

Since every staff function must be carried out within the context of both the facility's total program and each child's individual program, full and frank discussions must take place between facilities and district school boards about philosophies, policies (e.g., child-abuse protocols), staffing arrangements, and care, treatment, custody, or correctional programs. These discussions should include such topics as staff roles and functions, staff qualifications, arrangements for mutual support, instructional time and schedules, holiday and illness arrangements, professional development days, participation in program planning, case conferences, transmittal of information, and contact with the parent/guardian. (Any or all of these may be included in the agreement between the facility and the district school board. See Appendix 9 for an example.)

CHILDREN'S TREATMENT CENTRE SCHOOL AUTHORITIES

The Ministry of Education makes provision for the establishment of school authorities on tax-exempt land under the Education Act, subsection 68(1):

Where, in the opinion of the Minister, it is desirable to establish and maintain a public school authority for elementary school purposes on lands held by the Crown in right of Canada or Ontario, or by an agency thereof, or on other lands that are exempt from taxation for school purposes, the Minister may by order designate any portion of such lands as a school section and may appoint as members of the board such persons as the Minister considers proper, and the board so appointed is a corporation by the name indicated in the order establishing the school section and has all the powers and duties of a public district school board for elementary school purposes.

The following children's treatment centres operate as school authorities:

- The Bloorview MacMillan School Authority, Toronto
- Campbell Children's School Authority, Oshawa
- Essex County Children's Rehabilitation Centre School Authority, Windsor
- Niagara Peninsula Children's Centre School Authority, St. Catharines
- Ottawa Children's Treatment Centre, Ottawa
- Rotary Children's Centre School Authority, Waterloo

These school authorities provide special educational programs and services for the children referred from their respective children's treatment centre. The school authorities may serve students from Junior Kindergarten through to the end of secondary school. They may have residential or day treatment programs.

In addition, these children's treatment centre school authorities may serve as a resource to school boards for students who have physical, communication, and multiple exceptionalities.

Programs and Services Provided

Special Education Programs

These programs are developed and provided in conjunction with the children's treatment centre staff in an educational/therapeutic milieu. Following the Ontario curriculum, the programs are modified to provide for the student's individual academic, physical, communication, and social/emotional needs. Programs are designed to help the student make a smooth and successful transition from the treatment centre to his or her receiving school.

Liaison and Consultation Services

The school authorities, upon request from the district school boards and other school authorities, provide liaison and consultation for students who are clients of the children's treatment centres. The staff of these centres may:

- facilitate the transition and integration of children into their receiving school (see also Part C, "Transition to School From Care and Treatment Facilities and Correctional Facilities", page C28);
- provide information to assist in the identification and placement of students;
- assist with writing Individual Education Plans;
- assist in identifying and providing for special accommodations;
- provide ongoing advice as requested by the teacher, board consultant, and/or principal.

In-Service Programs

The school authorities provide specialized in-service programs and workshops for educators, school support professionals, and educational assistants who are involved in the development and delivery of educational programs and services to students with physical, communication, and multiple exceptionalities.

Research and Development

The school authorities, in conjunction with the staff of the children's treatment centres, the Ministry of Education, and other community partners, are actively involved in research and development related to their specialized programs and services for the population served.

PROVINCIAL SCHOOLS AND PROVINCIAL DEMONSTRATION SCHOOLS

Provincial Schools and provincial Demonstration Schools:

- are operated by the Ministry of Education;
- provide education for students who are deaf or blind, or who have severe learning disabilities;
- provide an alternative education option;
- serve as regional resource centres for students who are deaf, blind, or deaf-blind;
- provide preschool home visiting services for students who are deaf or deaf-blind;
- develop and provide learning materials and media for students who are deaf, blind, or deaf-blind;
- provide school board teachers with resource services;
- play a valuable role in teacher training.

W. Ross Macdonald School and Centre Jules-Léger: Schools for the Blind and Deaf-Blind

W. Ross Macdonald School in Brantford and Centre Jules-Léger in Ottawa provide education for students who are blind, visually impaired, or deaf-blind. The schools, which are provincial resource centres for the visually impaired and deaf-blind, provide:

- support to local school boards through consultation and the provision of special learning materials, such as Braille materials, audiotapes, and large-print textbooks;
- professional services and guidance to ministries of education on an inter-provincial, cooperative basis.

Programs are tailored to the needs of the individual student and:

- are designed to help these students learn to live independently in a non-sheltered environment;
- are delivered by specially trained teachers;
- follow the Ontario curriculum developed for all students in the province;
- offer a full range of courses at the secondary level;
- offer courses in special subject areas such as music, broad-based technology, family studies, physical education, and mobility training;
- are individualized, to offer a comprehensive "life skills" program;
- provide through home visiting for parents and families of preschool deaf-blind children to assist in preparing these children for future education.

Provincial Schools for the Deaf

The following Provincial Schools offer services for deaf and hard-of-hearing students:

- Sir James Whitney School for the Deaf in Belleville (serving eastern Ontario);
- Ernest C. Drury School for the Deaf in Milton (serving central and northern Ontario);
- Robarts School for the Deaf in London (serving western Ontario);
- Centre Jules-Léger in Ottawa (serving francophone students and families throughout Ontario).

(For contact information, see page F11.)

Admittance to a Provincial School is determined by the Provincial Schools Admission Committee in accordance with the requirements set out in Regulation 296.

These schools provide elementary and secondary school programs for deaf students from preschool level to high school graduation. These programs follow the Ontario curriculum and parallel courses and programs provided in school boards. Each student has his or her special needs met as set out in his or her Individual Education Plan (IEP). Schools for the deaf:

- provide rich and supportive bilingual/bicultural educational environments that facilitate students' language acquisition, learning, and social development through American Sign Language (ASL) and English and through Langue des Signes Québécois (LSQ) and French;
- operate primarily as day schools;
- provide residential facilities five days per week for those students who do not live within reasonable commuting distance from the school.

Transportation to Provincial Schools for students is provided by school boards.

Each school has a Resource Services Department that provides:

- consultation and educational advice to parents of deaf and hard-of-hearing children and school board personnel;
- information brochures;
- a wide variety of workshops for parents, school boards, and other agencies;
- an extensive home-visiting program delivered to parents of deaf and hard-of-hearing preschool children by teachers trained in preschool and deaf education.

Trillium School

347 Ontario Street South
Milton, Ontario
L9T 3X9

Tel.: (905) 878-8428

Fax: (905) 878-7540

Each provincial Demonstration School has an enrolment of forty students. The language of instruction at the Amethyst, Sagonaska, and Trillium Schools is English; at Centre Jules-Léger, instruction is in French.

Application for admission to a provincial Demonstration School is made on behalf of students by the school board, with parental consent. The Provincial Committee on Learning Disabilities (PCLD) determines whether a student is eligible for admission.

Although the primary responsibility to provide appropriate educational programs for students with learning disabilities remains with school boards, the ministry recognizes that some students require a residential school setting for a period of time.

The Demonstration Schools were established to:

- provide special residential education programs for students between the ages of 5 and 21 years;
- enhance the development of each student's academic and social skills;
- develop the abilities of the students enrolled to a level that will enable them to return to programs operated by a local school board within two years.

In addition to providing residential schooling for students with severe learning disabilities, the provincial Demonstration Schools have special programs for students with severe learning disabilities in association with attention-deficit/hyperactivity disorder (ADD/ADHD). These are highly intensive, one-year programs.

The Trillium School also operates Learning for Emotional and Academic Development (LEAD), a special program for students with severe learning disabilities who require an additional level of social/emotional support.

Further information about the academic, residential, LEAD, and LD/ADHD programs is available from the Demonstration Schools through the Special Needs Opportunity Window (SNOW) website at <http://snow.utoronto.ca>.

An in-service teacher education program is provided at each Demonstration School. This program is designed to share methodologies and materials with teachers of Ontario school boards. Information about the programs offered should be obtained from the schools themselves.

TEACHER EDUCATION

The qualifications teachers require to teach special education students are outlined in Regulation 298, "Operations of Schools – General". Qualifications are obtained in two stages:

- a) Pre-service teacher education programs are offered by faculties of education across the province.
- b) Additional qualifications in special education are obtained through a three-part qualifications program offered by faculties of education in various locations across the province. These courses prepare teachers to work with exceptional pupils. Upon successful completion of each part (Part 1, Part 2, and the Specialist qualification), the appropriate entry is made on the teacher's Certificate of Qualification. Teachers wishing to teach special education programs are required by Regulation 298 to hold the necessary qualifications.

The three-session qualifications program in special education for French-speaking teachers is offered at the University of Ottawa and Laurentian University. Applicants should contact:

- 1) Université d'Ottawa
Secrétariat scolaire

INTRODUCTION

This section lists programs and resources related to schools and special education that are provided by other ministries. Locations of relevant offices and contact information are also provided.

The Ministry of Education maintains contact and shares information with other government ministries and provincial organizations with specific interest in the well-being of exceptional pupils in order to:

- assess needs and formulate proposals for changes in policies with respect to special education;
- prepare appropriate educational policies that will assist in the development of programs for exceptional pupils in Ontario;
- manage the application and assist with the implementation of provincial policies relating to special education;
- address the needs of exceptional pupils in circulars and guidelines;
- develop support documents and materials for programs for exceptional pupils.

Information is included in this section on the following ministries:

- Ministry of Health and Long-Term Care
- Ministry of Community and Social Services
- Ministry of Tourism, Culture and Recreation

The Ontario Government website, at <http://www.gov.on.ca>, provides information on all government ministries.

Additional information is available through websites of the individual ministries or by contacting the ministries directly.

MINISTRY OF HEALTH AND LONG-TERM CARE (MOHLTC)

A number of Ministry of Health and Long-Term Care programs relate to the needs of exceptional pupils. These include:

Assistive Devices Program and Home Oxygen Program

The Assistive Devices Program (ADP) and the Home Oxygen Program (HOP) are administered by the Assistive Devices Branch (ADB) of the Ontario Ministry of Health and Long-Term Care.

The objective of both the ADP and the HOP is to provide financial assistance to Ontario residents with long-term physical disabilities to help them obtain basic, competitively priced, personalized assistive devices appropriate for their individual needs to facilitate independent living at home.

Devices covered by the programs are intended to give people increased independence and control over their lives, allowing them to avoid costly institutional settings and remain in a community living arrangement.

Equipment Funded by the ADP and the HOP

The ADP covers more than 15 000 separate pieces of equipment or supplies in the following categories: prostheses; wheelchairs/mobility aids and specialized seating systems; ostomy supplies and enteral feeding supplies; monitors and test strips for insulin-dependent diabetics (through agreement with the Canadian Diabetes Association); hearing aids; respiratory equipment; orthoses (braces, garments, and pumps); visual and communication aids.

The HOP pays for oxygen and oxygen delivery equipment such as concentrators, cylinders, and liquid systems, and for related supplies such as masks and tubing.

Initial access is often through a medical specialist or general practitioner who provides a diagnosis. In most device categories, an authorizer assesses the specific needs of the person and prescribes appropriate equipment or supplies. Most devices must be authorized by a qualified health care professional registered with the programs. There are currently more than 5000 registered authorizers working in hospitals, home care agencies, or private practice. The programs will help pay only for equipment that is purchased from vendors registered with the Assistive Devices Branch.

Children's Treatment Centres

The nineteen Children's Treatment Centres (CTCs) across the province of Ontario are locally developed, community-based organizations. The centres, which are funded by the Ministry of Health and Long-Term Care, provide services for children and youth who are up to 19 years of age and who have physical disabilities, communication disorders, or multiple special needs.

The range and scope of the services provided by the CTCs vary. For example, only some CTCs offer psychological therapy, audiology, or augmentative communication services. Cleft lip and palate dental services are provided by the Hamilton, Windsor, Kingston, London, Ottawa, Peterborough, and the two Toronto centres, but not by the others. Generally, though, physiotherapy, occupational therapy, and treatment for speech and language disorders are available at all centres.

In addition to providing services similar to those offered by most of the other CTCs, the Bloorview MacMillan Centre also operates as a province-wide information resource centre.

Children's Treatment Centres

- Belleville General Hospital Children's Treatment Centre
- Brantford: Lansdowne Children's Centre
- Chatham-Kent County Children's Treatment Centre
- Halton: Erinoak Serving Young People With Physical Disabilities
- Hamilton: Children's Developmental Rehabilitation Program
- Kingston: Child Development Centre
- London: Thames Valley Children's Centre
- Oshawa: Grandview Children's Centre
- The Ottawa Children's Treatment Centre
- Peterborough: Five Counties Children's Centre
- St. Catharines: Niagara Peninsula Children's Centre
- Sarnia and District Children's Treatment Centre
- Sault Ste. Marie: Children's Rehabilitation Centre
- Sudbury: Laurentian Hospital Children's Treatment Centre

- Thunder Bay: George Jeffrey Children's Treatment Centre
- Timmins: Cochrane-Timiskaming Children's Treatment Centre
- Toronto: Bloorview MacMillan Centre
- Waterloo: Rotary Centre
- Windsor: Children's Rehabilitation Centre

Community Care Access Centres: School Health Support Services

There are forty-three Community Care Access Centres (CCACs) province-wide. These community organizations provide a single point of access for home care and school health support services. The CCACs provide services:

- to children of any age and their families in their homes, including nursing, physiotherapy, occupational therapy, speech and language therapy, social work, dietetic services, personal support/homemaking, and medical supplies and equipment;
- to children across the province who have an acute or a chronic physical problem and require direct intervention or support in order to be maintained in the home. Intervention ranges from post-surgical therapy to palliative care for children;
- to children in the school setting, including nursing, physiotherapy, occupational therapy, speech and language therapy, and dietetic services to enable children with special health needs to attend publicly funded schools.

School boards provide support and educational services, while CCACs arrange for the necessary professional health services as specified in PPM No. 81.

Public Health

Organizations and Services – General

There are forty-two public health units in Ontario. Health units administer health-promotion and disease-prevention programs to inform the public about healthy lifestyles, control of communicable diseases (including education in STDs/AIDS), immunization, food premises inspection, healthy growth and development (including parenting education), health education for all age groups, and selected screening services.

The Public Health Branch of the Ministry of Health and Long-Term Care has the mandate to provide:

- disease-prevention and health-promotion leadership;
- support to government, local boards of health, and the people of Ontario through the use and promotion of population health strategies and communicable-disease control activities;
- implementation management and monitoring of the Preschool Speech and Language Initiative;
- public health units to work with school boards, schools, and other education facilities.

MINISTRY OF COMMUNITY AND SOCIAL SERVICES (MCSS)

Services are provided to Ontarians who are vulnerable and in need, including adults, children and youth, and people with physical and developmental disabilities. The ministry provides:

- income and employment supports (e.g., through the Ontario Disability Support Program and Ontario Works);
- social and community services (e.g., children's services, child care, and developmental services).

Ontario Disability Support Program (ODSP)

The Ontario Disability Support Program provides income support for people with disabilities and ongoing supports to employment for people who want to work.

Developmental Services

The ministry provides funding for support to children and adults with developmental disabilities.

Services are delivered largely through community-based agencies which provide supports to assist adults to live independently, help families to care for adults and children at home, and enable people to contribute to and participate in their communities.

Provincially operated facilities provide supervised-living and day programs for adults with developmental disabilities who require specialized care.

Making Services Work for People

Making Services Work for People is a multi-year initiative to restructure social services to improve the system's abilities to meet people's needs. The goal of this project is to create services that are coordinated, easy to find, effective, and available in a timely fashion.

Children's Services

The ministry provides funding for children's mental health, child welfare, young offender rehabilitation, and community support. Children's mental health provides prevention and early intervention supports and treatment for children with mental or psychiatric disorders. MCSS is the lead ministry for the coordination of children's mental health services. Children's Aid Societies protect children from abuse or neglect, provide temporary or permanent guardianship for children separated from their families, and place children (Crown wards) for adoption. Young offender rehabilitation is promoted through custodial services and alternative measures for low-risk

offenders. Community support services provide prevention and early intervention programs to support high-risk families.

The Integrated Services for Children Division

The Integrated Services for Children Division coordinates the work of the Ministries of Community and Social Services and of Health and Long-Term Care in the development and delivery of children's policies and programs. It also serves as a liaison to other ministries that provide services to children.

The division consists of four subdivisions:

- the Integration Strategies for Children's Services Branch, which provides guidance to other jurisdictions on the theory and practice of integrating children's services;
- the Early Years Secretariat, which is made up of three branches. The Early Years and Healthy Child Development Branch provides integrated policy direction and program planning for programs and services that invest in and support children on physical, social, educational, and emotional bases. The Early Years Challenge Fund Branch promotes the healthy growth and development of children by supporting and fostering cross-sectional partnerships in order to provide community-based early years and parenting programs. The Early Years Task Group Branch builds understanding and awareness of the importance of children's early years and promotes appropriate action;
- the Children With Special Needs Branch, which focuses on increasing communities' capacity to respond to the special needs of children and youth by integrating policy and program development functions within the Ministries of Health and Long-Term Care and of Community and Social Services;
- the Child Welfare and Young Offenders Branch, which provides policy and program design for the children and families served by children's aid societies and by the young offenders system.

The Office of Child and Family Service Advocacy (Advocacy Office)

The mandate of the Office of Child and Family Service Advocacy is to hear complaints, assist with problem solving, mediate disputes, negotiate with service providers or government officials, maintain liaison with the community, and intercede on behalf of children, youth, or young adults when they cannot speak for themselves.

The Advocacy Office has been in operation since 1978. Under the Child and Family Services Act, it is authorized to protect the rights and interests of children and families who are receiving or seeking services, through the Ministry of Community and Social Services, anywhere in Ontario. It advises the minister on matters that concern children and families. Any student in a residential or demonstration school (Ministry of Education) and any youth in a young offender program or facility (Ministry of the Solicitor General and Correctional Services) is also entitled to call the Advocacy Office for help.

Clients include:

- children and families;
- young offenders;
- children/youth living in child welfare and children's mental health settings, group homes, and so on;
- children/youth/young adults who have special needs (e.g., are deaf or blind, have a learning disability, or are physically or developmentally challenged).

Every child/youth in care has rights defined in the Child and Family Services Act (CFSA) and the Young Offenders Act (YOA). The Advocacy Office makes sure that children/youth in care know and understand their rights and that the laws that protect them from abuse or harsh treatment are enforced. Advocates from this office:

- empower children and families who wish to make complaints about unacceptable treatment;
- intercede and speak for children and their families who might not be able to get needed services or solutions to problems without help;
- investigate to identify changes in the system that are needed to resolve broader problems affecting groups of children/youth;
- help communities with complex, hard-to-serve cases where more than one government or community agency needs to be involved.

In addition to consulting on cases, the Advocacy Office monitors complaints and concerns that affect young people and their families. It alerts the minister to gaps in service delivery and proposes solutions.

The Advocacy Office makes every effort to offer advocacy services that are respectful and appropriate to the cultural backgrounds and lifestyles of its clients.

MINISTRY OF TOURISM, CULTURE AND RECREATION (MTCR)

The Ministry of Tourism, Culture and Recreation includes in its mandate the promotion of sports, recreation, and physical activity.

Sports

The ministry recognizes eighty-two provincial sports organizations (PSOs), among which are several that work with athletes with disabilities. PSOs are responsible for:

- training and certifying coaches;
- selecting teams for the Ontario and Canada Games;
- scheduling sports competitions and coordinating athlete development programs;
- coordinating or delivering broad-based participation programs;
- supporting local sports organizations, including voluntary and administrative activities.

School boards interested in designing sports programs for children with special needs may obtain further information from:

Sport for Disabled – Ontario

1185 Eglinton Avenue East, Suite 107
Toronto, Ontario
M3C 3C6

Tel: (416) 426-7187

Fax: (416) 426-7361

Sport for Disabled – Ontario represents four PSOs (the Ontario Amputee Sports Association, the Ontario Blind Sports Association, the Ontario Cerebral Palsy Sports Association, and the Ontario Wheelchair Sports Association).

Recreation

At the provincial level, the ministry works in partnership with provincial recreation organizations (PROs).

Key PROs that may assist school boards in developing comprehensive recreation and active-living programs for students with special needs include:

Parks and Recreation Ontario

1185 Eglinton Avenue East, Suite 406
Toronto, Ontario
M3C 3C6
Tel: (416) 426-7142

Toronto, Ontario
M3C 3C6
Tel.: (416) 426-7120
Fax: (416) 426-7373

Regional Services Branch

Community-focused priorities are developed and implemented through the ministry's Regional Services Branch, which has offices across Ontario. Branch staff work with communities and community organizations to develop strategies to address the need for high-quality programs for children and youth at the regional and local level. The local organizations deliver programs and promote participation in recreation at the community level.

APPENDIX 1: MINISTER'S ADVISORY COUNCIL ON SPECIAL EDUCATION: REPRESENTATION

Exceptionality/Community of Interest Represented

Exceptionalities

- Emotional/behaviour disorder
- Pervasive developmental disorder
- Deaf and hard of hearing
- Learning disabilities, all exceptionalities (Chair)
- Gifted
- Developmental disability
- Blind and low vision
- Physical disability
- Multiple disabilities
- Students/Youth
- Native persons

Educator Groups

- Trustees
- Supervisory officers (Vice-chair)
- Principals
- Teachers
- Educational assistants

Professional Support

- Medical
- Psychologists
- Social workers
- Speech-language pathologists

Non-voting

- Ministry of Community and Social Services
- Ministry of Health and Long-Term Care
- Ministry of Training, Colleges and Universities
- Integrated Services for Children Division

Two of the voting members are representatives of the Roman Catholic Community.

Two of the voting members (one of whom is from the educator group) are representatives of the Franco-Ontarian community.

APPENDIX 4: SAMPLE AGENDA FOR AN IN-SCHOOL TEAM MEETING

An in-school team meeting usually proceeds in an informal yet orderly manner, with a prepared agenda. Team members:

- welcome the referring teacher to the team, ask the teacher to describe the issue or concern, and review the current level of support;
- ask the resource teacher or other support personnel to contribute additional information from informal observation and assessment;
- ask clarifying questions and decide if there is enough information to begin problem solving;
- ensure that there is consensus on the nature of the problem;
- discuss, evaluate, and refine suggestions and possible interventions;
- ask the referring teacher to choose interventions for an initial trial;
- determine the support needed to implement the chosen interventions;
- define the criteria for evaluating the success of the action plan;
- decide what additional input is needed, if any;
- set the date for follow-up to assess the effectiveness of the outlined interventions for this pupil.

APPENDIX 5: PARENT-TEACHER MEETINGS

To achieve a successful outcome in meetings between teachers and parents of students with special needs, all participants should:

- focus on the best interests of the pupil;
- respect others' perceptions of the pupil's strengths and needs;
- commit the time and energy required to understand the views of the other participants, and ask for clarification when necessary;
- identify ways in which they can contribute to the development of an educational plan for the pupil;
- openly express appreciation for the efforts of other participants;
- focus on determining a positive course of action rather than on assigning blame;
- develop an action plan that sets out the responsibilities of parents and teachers;
- decide how to monitor the implementation of the action plan;
- use information from monitoring as the basis for the next parent-teacher meeting.

Teachers should be aware that parents of pupils encountering difficulties in school may feel shock, anger, denial, or frustration about the situation. Teachers should always be sensitive to parents' emotions. The following guidelines should be observed:

- begin the conference with a positive comment about the pupil;
- avoid the use of jargon and help parents understand what their child is experiencing;
- try to avoid comparing the pupil to siblings or classmates;
- focus on the pupil's strengths and needs;
- give adequate notice to participants about the time, location, and purpose of the meeting;
- prepare necessary documents in advance and share them with parents;
- make sure that all those participating in the meeting have been introduced and that their roles have been defined;
- become informed about the educational history of the pupil;
- provide support and do not assign blame;
- describe the pupil's achievement in positive, specific terms;
- concentrate on one or two issues of concern or interest;
- avoid a focus on policy and funding issues;
- recognize and respect the parents' role as advocates for their child;
- ask for and listen to the parents' ideas and opinions;

- find out how the pupil interacts at home and in the community in order to gain a better understanding of him or her;
- identify and build on the effective strategies used by parents;
- explain to families their rights and responsibilities;
- present a variety of educational suggestions and options for consideration;
- provide suggestions for community resources the family may wish to avail themselves of;
- keep a record in the action plan of parent and teacher responsibilities;
- follow up on the plan.

APPENDIX 6: EXAMPLES OF SCHOOL BOARD CONSENT FORMS

The following forms are examples only. It is up to school boards to determine the types of consent forms needed for various situations. Please note that "Form 14" is not an appropriate form to use for the release of personal information from an Ontario Student Record. Form 14 is a form for the release of clinical records from facilities designated under the Mental Health Act. School boards should devise their own consent forms for the release of student information.

Example (a)

Consent for Individual Academic Assessment

Student's Name _____ **Grade** _____

School _____ **Gender** **F** **M**

I/We understand that school personnel recommend that our child _____
be given an individual academic assessment to obtain more information for developing a program to meet his/her needs.

I/We understand the reason(s) for this recommendation. I/We are in agreement that it will involve the special education teacher and may involve Program Consultant (Special Education) Multilingual Services

It is understood that:

- the initial assessment may take place in the classroom and/or on a withdrawal basis
- an interpretation of the progress of the academic assessment will be provided to me/us within three months and on a regular basis until the assessment report is written
- the written academic assessment report will be shared with me/us within one year from the date of consent and will be filed in the documentation section of the Ontario Student Record Folder
- this consent remains in effect for one year from date of completion

I/We therefore agree that an individual academic assessment will be given to our child.

Date _____

 Parent Guardian

Principal

Classroom Teacher

Special Education Teacher

I/We do not wish an individual academic assessment.

Date _____

 Parent Guardian

File in Ontario Student Record Folder – Documentation File

Example (b)

Consent to the Release of Confidential Information*

I(We) _____
(Print full name: First Name, Last Name)

of _____
(Address)

hereby consent to the release of the following information:
Psychiatric information, Psychological information, Social Work information, Speech-Language information

and/or Other: _____ (cross out those that do not apply)
(Specify)

compiled or prepared by _____
(Name of institution, agency, or person)

(Address)

with respect to _____ (Name of student) _____ (Date of Birth: yyyy/mm/dd)

(Student ID#) _____ (School)

to _____
(Name of institution, agency, or person, e.g., DSB)

(Address)

for the purpose of Educational Planning, Co-ordination of Services, and/or

Other: _____ (cross out those that do not apply).
(Specify)

Special Instructions: _____

Signature _____ **Witness** _____

(Relationship to student)

Dated this _____ **day of** _____, _____.

This consent remains valid until:** _____ (maximum one year from date of signature)
(yyyy/mm/dd)

* Please refer to the accompanying "Instructions for Ensuring Informed Consent for the Release of Confidential Information" when filling out this form.
** Authorizing person(s) may cancel or change the above authorization in writing at any time prior to the expiry date, unless action has already been taken on the basis of the authorization.

Instructions for Ensuring Informed Consent for the Release of Confidential Information

These instructions accompany the Consent to the Release of Confidential Information form. To complete this consent, a parent, guardian, or student (aged 16 or over) must be fully informed. This means that the parent, guardian, or student (aged 16 or over) understands the following:

- **what specific information is to be disclosed.** Specific pieces of information should be indicated: Attendance Services' information, Psychiatric information, Psychological information, Physiotherapy information, Occupational Therapy information, Social Work information and/or Speech-Language information. Parents, guardians, or students (aged 16 or over) have the right to determine which information is to be released and need to be informed about which information is relevant for the purpose specified (see below). They also need to be aware that limiting access to pertinent information can make it difficult to meet the student's needs appropriately.
- **to whom the information will be disclosed.** The institution, agency, or person to receive the information should be specified on this line (e.g., *District School Board*). The address should also be indicated (e.g., *Student and Community Services*, at the appropriate district office of the Ministry of Education).
- **for what purpose it is to be disclosed.** The information may be used for educational planning and/or the co-ordination of services. Other purposes can also be specified. When releasing information to an outside agency or institution, the information may be used for the provision of their services.

Under "Special Instructions", the parent, guardian, or student (aged 16 or over) may wish to indicate other specific instructions about the disposition of the confidential information. For example, they may wish to have a copy of the confidential information placed in the student's Ontario Student Record. They may wish the information to remain in confidential psychological files (i.e., files supervised by a registered Psychologist). They may wish a copy of the information to be placed in both locations. They may wish to indicate that the confidential information must be destroyed after a specified time period (bearing in mind that legislation may stipulate a period of time during which the information must be retained). Any of these conditions should be noted on the line as a "special instruction".

The signed consent is time-limited. The consent to release the information is valid for no more than one year and may be specified to be less than a year. The consent includes a statement indicating that it may be rescinded or amended at any time. This request must be made in writing and would rescind or amend the consent except where action has already been taken in reliance on the original authorization.

The authorizing signature on the consent indicates the parent's, guardian's, or student's (aged 16 or over) agreement to the disclosure of the specified confidential information, to the specified institution/agency/person, for the specified purpose, and under a specific set of conditions.

Finally, parents, guardians, or students (aged 16 or over) should be given a copy of the original signed consent form to keep for their own records.

APPENDIX 7: A SAMPLE PARENTS' GUIDE TO SPECIAL EDUCATION

District School Board Name
Mission Statement of the Board [optional]
Philosophy of the Board [optional]

Notes:

1. If you wish to receive this parents' guide in Braille, large print, or audio-cassette format, please contact the board at the address or telephone number shown on the last page of this guide.
2. When used in this guide, the word "parent" includes guardian.

The Education Act requires that school boards provide, or purchase from another board, special education programs and services for their exceptional pupils. The purpose of this parents' guide is to provide you with information about the Identification, Placement and Review Committee (IPRC), and to set out for you the procedures involved in identifying a pupil as "exceptional", deciding the pupil's placement, or appealing such decisions if you do not agree with the IPRC.

If, after reading this guide, you require more information, please see the board's list of contacts at the end of the document.

What is an IPRC?

Regulation 181/98 requires that all school boards set up IPRCs. An IPRC is composed of at least 3 people, one of whom must be a principal or a supervisory officer of the board.

[School boards may list the members, identifying the member who is a principal or a supervisory officer.]

- 1.
- 2.
- 3.

Parents are invited and encouraged to attend the meeting.

What is the role of the IPRC?

The IPRC will:

- decide whether or not your child should be identified as exceptional;
- identify the areas of your child's exceptionality, according to the categories and definitions of exceptionalities provided by the Ministry of Education;
- decide an appropriate placement for your child [*here the board should list the full range of placement options offered by the board*]; and
- review the identification and placement at least once in each school year.

Who is identified as an exceptional pupil?

The Education Act defines an exceptional pupil as "a pupil whose behavioural, communicational, intellectual, physical or multiple exceptionalities are such that he or she is considered to need placement in a special education program...." Students are identified according to the categories and definitions of exceptionalities provided by the Ministry of Education.

What is a special education program?

A special education program is defined in the Education Act as an educational program that:

- is based on and modified by the results of continuous assessment and evaluation; and
- includes a plan (called an Individual Education Plan or IEP) containing specific objectives and an outline of special education services that meet the needs of the exceptional pupil.

What are special education services?

Special education services are defined in the Education Act as the facilities and resources, including support personnel and equipment, necessary for developing and implementing a special education program.

What is an IEP?

The IEP must be developed for your child – if he or she has been identified as an exceptional student – in consultation with you. It must include:

- specific educational expectations;
- an outline of the special education program and services that will be received;
- a statement about the methods by which your child's progress will be reviewed; and
- for students 14 years and older (except those identified as exceptional solely on the basis of giftedness), a plan for transition to appropriate postsecondary school activities, such as work, further education, and community living.

The IEP must be completed within 30 days after your child has been placed in the program, and the principal must ensure that you receive a copy of it.

How is an IPRC meeting requested?

The principal of your child's school:

- must request an IPRC meeting for your child, upon receiving your written request;
- may, with written notice to you, refer your child to an IPRC when the principal and the child's teacher or teachers believe that your child may benefit from a special education program.

Within 15 days of receiving your request, or giving you notice, the principal must provide you with a copy of this guide and a written statement of approximately when the IPRC will meet.

May parents attend the IPRC meeting?

Regulation 181/98 entitles parents and pupils 16 years of age or older:

- to be present at and participate in all committee discussions about your child; and
- to be present when the committee's identification and placement decision is made.

Who else may attend an IPRC meeting?

- the principal of your child's school;
- other resource people such as your child's teacher, special education staff, board support staff, or other professionals, who may provide further information or clarification;
- your representative – that is, a person who may support you or speak on behalf of you or your child; and
- an interpreter, if one is required. (You may request the services of an interpreter through the principal of your child's school.) *[Boards may wish to list the types of interpreters available, e.g., sign language, oral, specific language.]*

Who may request that they attend?

Either you or the principal of your child's school may make a request for the attendance of others at the IPRC meeting.

What information will parents receive about the IPRC meeting?

At least 10 days in advance of the meeting, the chair of the IPRC will provide you with written notification of the meeting and an invitation to attend as an important partner in considering your child's placement. This letter will notify you of the date, time, and place of the meeting, and it will ask you to indicate whether you will attend.

Before the IPRC meeting occurs, you will receive a written copy of any information about your child that the chair of the IPRC has received. This may include the results of assessments or a summary of information.

What if parents are unable to make the scheduled meeting?

If you are unable to make the scheduled meeting, you may:

- contact the school principal to arrange an alternative date or time; or
- let the school principal know you will not be attending. As soon as possible after the meeting, the principal will forward to you, for your consideration and signature, the IPRC's written statement of decision noting the decision about identification and placement and any recommendations regarding special education programs and services.

What happens at an IPRC meeting?

- The chair introduces everyone and explains the purpose of the meeting.
- The IPRC will review all available information about your child. The members will:
 - consider an educational assessment of your child;
 - consider, subject to the provisions of the Health Care Consent Act, 1996, a health or psychological assessment of your child conducted by a qualified practitioner, if they feel that such an assessment is required to make a correct identification or placement decision;
 - interview your child, with your consent if your child is less than 16 years of age, if they feel it would be useful to do so; and
 - consider any information that you submit about your child or that your child submits if he or she is 16 years of age or older.
- The committee may discuss any proposal that has been made about a special education program or special education services for the child. Committee members will discuss any such proposal at your request or at the request of your child, if the child is 16 years of age or older.
- You are encouraged to ask questions and join in the discussion.
- Following the discussion, after all the information has been presented and considered, the committee will make its decision.

What will the IPRC consider in making its placement decision?

Before the IPRC can consider placing your child in a special education class, it must consider whether placement in a regular class with appropriate special education services will:

- meet your child's needs; and
- be consistent with your preferences.

If, after considering all of the information presented to it, the IPRC is satisfied that placement in a regular class will meet your child's needs and that such a decision is consistent with your preferences, the committee will decide in favour of placement in a regular class with appropriate special education services.

If the committee decides that your child should be placed in a special education class, it must state the reasons for that decision in its written statement of decision.

What will the IPRC's written statement of decision include?

The IPRC's written statement of decision will state:

- whether the IPRC has identified your child as exceptional;
- where the IPRC has identified your child as exceptional,
 - the categories and definitions of any exceptionalities identified, as they are defined by the Ministry of Education;
 - the IPRC's description of your child's strengths and needs;
 - the IPRC's placement decision; and
 - the IPRC's recommendations regarding a special education program and special education services;
- where the IPRC has decided that your child should be placed in a special education class, the reasons for that decision.

What happens after the IPRC has made its decision?

- If you **agree** with the IPRC decision, you will be asked to indicate, by signing your name, that you agree with the identification and placement decisions made by the IPRC.
- If the IPRC has identified your child as an exceptional pupil and if you **agree** with the IPRC identification and placement decisions, the board will promptly notify the principal of the school at which the special education program is to be provided of the need to develop an Individual Education Plan (IEP) for your child.

Once a child has been placed in a special education program, can the placement be reviewed?

- A review IPRC meeting will be held at least once in each school year, unless the principal of the school at which the special education program is being provided receives written notice from you, the parent, dispensing with the annual review.
- You may request a review IPRC meeting any time after your child has been in a special education program for 3 months.

What does a review IPRC consider and decide?

- With your written permission, the IPRC conducting the review will consider the progress your child has made in relation to the IEP. It will consider the same type of information that was originally considered by the IPRC, as well as any new information.
- The IPRC will review the placement and identification decisions and decide whether they should be continued or whether a different decision should now be made.

What can parents do if they disagree with the IPRC decision?

- If you **do not agree** with either the identification or the placement decision made by the IPRC, you may:
 - within 15 days of receipt of the decision, request that the IPRC hold a second meeting to discuss your concerns; or
 - within 30 days of receipt of the decision, file a notice of appeal with *[boards should fill in the name and address of the secretary of the board]*.
- If you **do not agree** with the decision after the second meeting, you may file a notice of appeal within 15 days of your receipt of the decision.

If you do not consent to the IPRC decision but you do not appeal it, the board will instruct the principal to implement the IPRC decision.

How do I appeal an IPRC decision?

If you disagree with the IPRC's identification of your child as exceptional or with the placement decision of the IPRC, you may, within 30 days of receipt of the original decision or within 15 days of receipt of the decision from the second meeting described above, give written notification of your intention to appeal the decision to *[boards should fill in the name and address of the secretary of the board]*.

The notice of appeal must:

- indicate the decision with which you disagree; and
- include a statement that sets out your reasons for disagreeing.

What happens in the appeal process?

The appeal process involves the following steps:

- The board will establish a special education appeal board to hear your appeal. The appeal board will be composed of three persons who have no prior knowledge of the matter under appeal, one of whom is to be selected by you, the parent.
- The chair of the appeal board will arrange a meeting to take place at a convenient time and place, but no later than 30 days after he or she has been selected (unless parents and board provide written consent to a later date).
- The appeal board will receive the material reviewed by the IPRC and may interview any persons who may be able to contribute information about the matter under appeal.
- You, the parent, and your child, if he or she is 16 years old or over, are entitled to be present at, and to participate in, all discussions.
- The appeal board must make its recommendations within 3 days of the meeting's ending. It may:
 - agree with the IPRC and recommend that the decision be implemented; or
 - disagree with the IPRC and make a recommendation to the board about your child's identification or placement or both.

- The appeal board will report its recommendations in writing, to you and to the school board, providing the reasons for its recommendations.
- Within 30 days of receiving the appeal board's written statement, the school board will decide what action it will take with respect to the recommendations (boards are not required to follow the appeal board recommendations).
- You may accept the decision of the school board or you may appeal to a Special Education Tribunal. You may request a hearing by writing to the secretary of the Special Education Tribunal. Information about making an application to the tribunal will be included with the school board's decision.

What special education programs and services are provided by the board?

[This section should indicate the extent to which the board provides special education programs and services and the extent to which it purchases them from another board or boards.]

What organizations are available to assist parents?

Many parent organizations are available to provide information and support to parents of exceptional children.

[Boards should list here the local associations eligible for membership on their SEAC. Some boards may need to include the provincial office of a major exceptionality group if there is no local association for that group in the community.]

What are the ministry's Provincial and Demonstration Schools?

The ministry operates Provincial and Demonstration Schools throughout Ontario for deaf, blind, deaf-blind, and severely learning-disabled students, including those whose learning disabilities are associated with attention deficit hyperactivity disorder (ADHD). Residential programs are offered at the schools from Monday to Friday, for students who live too far from school to travel daily.

Demonstration Schools for English-speaking students with severe learning disabilities, including learning disabilities associated with ADHD

Amethyst School
1090 Highbury Avenue
London ON N5Y 4V9
Telephone: (519) 453-4408

Sagonaska School
350 Dundas Street West
Belleville ON K8P 1B2
Telephone: (613) 967-2830

Trillium School
347 Ontario Street South
Milton ON L9T 3X9
Telephone: (905) 878-8428

Schools for the deaf

Ernest C. Drury School
255 Ontario Street South
Milton ON L9T 2M5
Telephone: (905) 878-2851
TTY: (905) 878-7195

Robarts School
1090 Highbury Avenue
P.O. Box 7360, Station "E"
London ON N5Y 4V9
Telephone and TTY: (519) 453-4400

Sir James Whitney School
350 Dundas Street West
Belleville ON K8P 1B2
Telephone and TTY: (613) 967-2823

School for the blind and deaf-blind

W. Ross Macdonald School
350 Brant Avenue
Brantford ON N3T 3J9
Telephone: (519) 759-0730

French-language school for the deaf, blind, and deaf-blind, and Demonstration School for French-speaking students with severe learning disabilities, including learning disabilities associated with ADHD

Centre Jules-Léger
281, rue Lanark
Ottawa ON K1Z 6R8
Telephone: (613) 761-9300
TTY: (613) 761-9302 and 761-9304

Where can parents obtain additional information?

Additional information can be obtained from:

- the school principal *[provide name, school address, and school telephone number]*; or
- *[provide the name, address, and telephone number of a contact at the district school board]*.

APPENDIX 8: SYNOPSIS OF STATUTORY POWERS PROCEDURE ACT

The following synopsis is intended to give parents and school board officials a quick overview of the principal provisions of the Statutory Powers Procedure Act, under which the Ontario Special Education Tribunal operates. This synopsis has no official status and should not be cited as an authority. Readers are advised to refer to the act itself for original wording. The bracketed numbers in the text refer to the sections and subsections of the Statutory Powers Procedure Act, consolidated as of May 4, 1998.

This synopsis is limited to those sections that relate directly to the two parties' preparation and presentation of their respective cases to the tribunal.

Note: The two parties in a hearing before the Ontario Special Education Tribunal are the parent(s) and the school board.

The parties may represent themselves at a tribunal hearing or may be represented by an "agent" (or advocate) or by a lawyer (10). However, to ensure order and prevent abuse of its processes, a tribunal may exclude from the hearing any agent whom it considers to be not competent properly to represent or advise his or her client, or who, in the opinion of the tribunal, does not properly understand his or her role as agent (23[3]). This subsection does not apply to lawyers qualified to practise in Ontario.

If either party intends to raise allegations as to the good character, propriety of conduct, or competence of the other party, the other party is entitled to receive reasonable information about these allegations prior to the hearing (8).

At a tribunal hearing, the parties may call witnesses and present evidence and submissions (10.1[a]). They may also cross-examine witnesses "reasonably required for a full and fair disclosure of all matters relevant to the issues in the proceeding". The tribunal may limit further examination or cross-examination when it is satisfied that the examination or cross-examination has been sufficient to disclose fully and fairly all matters relevant to the issues in the proceeding (23[2]).

A tribunal may require any person, including a party, by summons, (a) to give evidence on oath or affirmation at an oral or electronic hearing; and (b) to produce in evidence at an oral or electronic hearing documents and things specified by the tribunal relevant to the subject matter of the proceeding and admissible at a hearing (12[1]). A witness who refuses to appear before the tribunal or refuses to testify may be tried in an Ontario Divisional Court and (if found guilty) punished as if he or she had been guilty of contempt of court (13).

Witnesses normally give evidence to the Ontario Special Education Tribunal under oath. The tribunal has the power to administer oaths (22).

Witnesses are entitled to advice from their own lawyer or advocate but must speak for themselves (i.e., the lawyer or advocate may not speak for them at the hearing), unless otherwise permitted by the tribunal (11[1]). Nothing that would be inadmissible in a court by reason of privilege under the laws of evidence is admissible in evidence at the tribunal [15(2)]. Evidence given by a witness before the tribunal cannot subsequently be used to incriminate the witness (except in the case of perjury) (14[1]).

If one of the parties does not attend the hearing, the hearing may proceed in the party's absence and the non-attending party is not entitled to further notice in the proceeding (7).

Either party may request an adjournment of a hearing. The tribunal decides whether or not to adjourn and for how long (21).

Hearings are open to the public unless the tribunal is of the opinion that it deals with matters of public security or intimate financial or personal matters, in which case the tribunal may order the hearing to be closed to the public (9[1]).

The decision of the tribunal is binding on both parties (Education Act, subsection 57[5]). Either party or the tribunal itself may file the tribunal's decision with the Ontario Court (General Division). The tribunal decision shall consequently be deemed to be a court order and is enforceable as such (19[1]).

An application for judicial review does not operate as a stay of the tribunal decision (25[2]).

APPENDIX 9: ELEMENTS OF AN AGREEMENT BETWEEN A FACILITY AND A DISTRICT SCHOOL BOARD

District school boards and facilities should consult with their own legal counsel when preparing their agreements. However, the following may serve as a guide to components of an agreement:

Heading and Introduction

- a. names of facility or agency and local district school board;
- b. name of act under which facility/agency is licensed;
- c. type of clientele, referral sources, catchment area, location of program (address), number of pupils per teacher, total number of children/youth;
- d. duration of agreement and timelines for review or termination of agreement;
- e. philosophy of care, treatment, custodial, or correctional facility program in conjunction with the district school board's educational program;
- f. geographic area serviced by facility.

Responsibilities of the Facility/Agency

- a. admitting children/youth to care, treatment, custodial, or correctional facility;
- b. providing appropriate accommodation for the educational program (identify location);
- c. providing care, treatment, or therapeutic support services during school hours (nature and frequency of services should be specified);
- d. assigning professionals to address the care/treatment needs of the children/youth (number and type of professionals should be specified);
- e. supervising the care and/or treatment program (name and title of person responsible should be given);
- f. providing a care and/or treatment program for the children/youth (description of program should be given);
- g. developing a treatment or care plan for each pupil;
- h. providing a copy of site plan (physical location);
- i. developing a timetable for educational program (to be kept on file at the facility);
- j. providing security.

Responsibilities of the District School Board

- a. hiring teachers, under the terms of the district school board's teachers' collective agreement, for the provision of an educational program in the care, treatment, custodial, or correctional facility;
- b. supervising the educational program and teacher;
- c. providing furniture, equipment, and instructional supplies;
- d. developing a schedule for operating the educational program within the facility/agency;
- e. providing professional development for educational staff;
- f. assessing and evaluating students' educational achievement;
- g. maintaining the daily attendance record;
- h. providing a detailed description of the educational program;
- i. developing procedures for selecting educational staff.

Shared Responsibilities

- a. ensuring a multidisciplinary cooperative approach to planning of child/youth's program;
- b. maintaining confidentiality;
- c. developing a process for conflict resolution;
- d. defining the roles of educational and facility supervisory personnel;
- e. providing and maintaining equipment;
- f. outlining the process for the student's transition from the facility's educational program to a community school;
- g. interpreting the Occupational Health and Safety Act and determining each party's role in carrying out its provisions;
- h. designing, reviewing, and evaluating individual programs;
- i. adapting programs to specific local conditions;
- j. developing a violence-prevention policy, as required.

Signatures

- a. signatures of signing officials of each party.

For further information, school board officials are advised to contact an official in the appropriate district office of the Ministry of Education.

APPENDIX 10: REGULATION 181/98 AND REGULATION 464/97

Ontario Regulation 181/98 as amended by Ontario Regulation 137/01 made under the Education Act

O. Reg. 181/98 filed: April 30, 1998

O. Reg. 137/01 filed: May 2, 2001

Identification and Placement of Exceptional Pupils

Part I. General

1. (1) In this Regulation,
“committee” means a special education identification, placement and review committee established under Part II and includes a committee established under Regulation 305 of the Revised Regulations of Ontario, 1990;
“designated representative” means,
(a) in relation to a board that has a director of education, the director of education of the board, and
(b) in relation to a board that does not have a director of education, the secretary or equivalent of the board;
“parent” includes a guardian;
“special education appeal board” means a special education appeal board established under Part VI.
(2) In this Regulation, a reference to the category and definition of an exceptionality is a reference to the category and definition of the exceptionality as established under subsection 8 (3) of the Act.
2. Where the time limited by this Regulation for doing anything expires or falls on a school holiday within the meaning of Regulation 304 of the Revised Regulations of Ontario, 1990, the time so limited extends to and the thing may be done on the next day following that is not a school holiday.
3. (1) Subject to subsection (2), mail shall be deemed to have been received by the person to whom it was sent on the fifth day after the day on which it was mailed.
(2) If the fifth day is a school holiday within the meaning of Regulation 304 of the Revised Regulations of Ontario, 1990, the mail shall be deemed to have been received by the person to whom it was sent on the first day after the fifth day that is not a school holiday.
4. A person or body required by this Regulation to communicate in writing to a parent or pupil shall, at the request of the parent or pupil, use a braille, large print or audio-cassette format for the communication.
5. (1) A parent of a pupil and, where the pupil is 16 years of age or older, the pupil, are entitled,
(a) to be present at and participate in all committee discussions about the pupil; and
(b) to be present when the committee’s identification and placement decisions are made.
(2) A parent of a pupil and, where the pupil is 16 years of age or older, the pupil, are entitled to be present at and participate in all discussions about the pupil at the meeting held by the special education appeal board under section 28.
(3) A person who has a right under subsection (1) or (2) to participate in a discussion also has the right to have a representative present at the discussion, to speak on behalf of the person or otherwise support the person.
(4) A person who has a right under clause (1) (b) to be present also has the right to have a representative present to support the person.
(5) At least 10 days in advance of a meeting of a committee or special education appeal board, the chair of the committee or board shall give written notice of the time and place of the meeting to a parent of the pupil and, where the pupil is 16 years of age or older, the pupil.
6. (1) Subsection (2) applies when,
(a) a board implements a placement decision under section 20;
(b) a board implements a placement decision under section 31 following an appeal to a special education appeal board in respect of a committee decision under Part IV; or
(c) a board implements a placement decision following an appeal to the Special Education Tribunal in respect of a committee decision under Part IV.

(2) The board shall promptly notify the principal of the school at which the special education program is to be provided of the need to develop an individual education plan for the pupil in consultation with the parent and, where the pupil is 16 years of age or older, the pupil.

(3) The individual education plan must include,
(a) specific educational expectations for the pupil;
(b) an outline of the special education program and services to be received by the pupil; and
(c) a statement of the methods by which the pupil's progress will be reviewed.

(4) Where the pupil is 14 years of age or older, the individual education plan must also include a plan for transition to appropriate post-secondary school activities, such as work, further education and community living.

(5) Subsection (4) does not apply in respect of a pupil identified as exceptional solely on the basis of giftedness.

(6) In developing the individual education plan, the principal shall,
(a) consult with the parent and, where the pupil is 16 years of age or older, the pupil; and
(b) take into consideration any recommendations made by the committee or the Special Education Tribunal, as the case may be, regarding special education programs or special education services.

(7) In developing a transition plan under subsection (4), the principal shall consult with such community agencies and post-secondary educational institutions as he or she considers appropriate.

(8) Within 30 school days* after placement of the pupil in the program, the principal shall ensure that the plan is completed and a copy of it sent to a parent of the pupil and, where the pupil is 16 years of age or older, the pupil.

- 7.** (1) Subsection (2) applies when,
(a) a board implements a change in placement under section 25;
(b) a board implements a change in placement under section 31 following an appeal to a special education appeal board in respect of a committee decision under Part V;

- (c) a board implements a change in placement in accordance with a decision of the Special Education Tribunal following an appeal to the Special Education Tribunal in respect of a committee decision under Part V;
(d) an existing placement is confirmed in a statement of decision under Part V and a parent of the pupil consents in writing to the decision or the time period provided in section 31 for filing a notice of appeal from the decision expires without a notice of appeal being filed;
(e) an existing placement is confirmed in a decision under subsection 30 (1) and a parent consents in writing to the decision or the time period provided in section 31 expires without an appeal being commenced;
(f) an existing placement is confirmed in a decision under subsection 30 (1), an appeal from the decision is made under section 57 of the Act to the Special Education Tribunal and the appeal is dismissed or abandoned; or
(g) an existing placement is confirmed in an order of the Special Education Tribunal granting an appeal under section 57 of the Act.

(2) The board shall promptly notify the principal of the school at which the special education program is to be provided of the need to review the pupil's individual education plan to determine whether it needs to be updated.

(3) In reviewing the plan, the principal shall,
(a) consult with the parent and, where the pupil is 16 years of age or older, the pupil; and
(b) take into consideration any recommendations of the committee or the Special Education Tribunal, as the case may be, regarding special education programs or special education services.

(4) Where an individual education plan does not include a plan for transition to appropriate post-secondary school activities and the pupil has attained the age of 14 or will attain the age of 14 within the school year, the principal shall ensure that a transition plan is developed and included in the individual education plan.

(5) Subsection (4) does not apply in respect of a pupil identified as exceptional solely on the basis of giftedness.

(6) In reviewing an individual education plan that includes a transition plan or in developing a transition plan under subsection (4), the principal shall consult with such community agencies and post-secondary educational institutions as he or she considers appropriate.

* Ontario Regulation 137/01, which was filed on May 2, 2001, amends the phrase "within 30 days", which appears in subsections 6(8) and 7(7) of Ontario Regulation 181/98, to "within 30 school days". (There are no other amendments to Regulation 181/98.)

- (7) Within 30 school days* of an implementation of a change in placement or, where the placement is confirmed, within 30 school days* of receiving the notice under subsection (1), the principal shall ensure that,
- (a) the plan has been reviewed and updated as appropriate;
 - (b) a transition plan has been added to the individual education plan where required by subsection (4); and
 - (c) a copy of the individual education plan has been sent to a parent of the pupil and, where the pupil is 16 years of age or older, the pupil.
- 8.** The principal shall ensure that the individual education plan for a pupil is included in the record kept in respect of the pupil under clause 265 (d) of the Act, unless a parent of the pupil has objected in writing.
- 9.** (1) In accordance with requirements under the *Education Act*, no pupil is to be denied an education program pending a meeting or decision under this Regulation.
- (2) Where an education program is provided to a pupil pending a meeting or decision under this Regulation,
- (a) the program must be appropriate to the pupil's apparent strengths and needs;
 - (b) the placement for the program must be consistent with the principles underlying section 17; and
 - (c) appropriate education services must be provided to meet the pupil's apparent needs.

Part II. Establishment of Committees and Committee Procedures

- 10.** Each board shall, in accordance with section 11, establish one or more committees for the identification and placement of exceptional pupils, determine the jurisdiction of each committee and establish the manner of selecting the chair of each committee.
- 11.** (1) A board shall appoint three or more persons to each committee that it establishes.
- (2) The board shall appoint, as one of the members of each committee,
- (a) a principal employed by the board;

- (b) a supervisory officer employed by the board under Part XI of the Act; or
 - (c) a supervisory officer whose services are used by the board under Part XI of the Act.
- (3) A principal or supervisory officer appointed under subsection (2) may designate a person to act in his or her place as a member of the committee without the approval of the board.
- (4) Only a person who is eligible to be appointed to the committee under subsection (2) may be designated to act on the committee under subsection (3).
- (5) No member of the board may be appointed to a committee under subsection (2) or designated to act on the committee under subsection (3).

- 12.** (1) A board may establish procedures for committees in addition to those set out in this Regulation.
- (2) Committee decisions made under this Regulation must be consistent with the board's special education plan.

Part III. Parents' Guide

- 13.** (1) Each board shall prepare a guide for the use and information of parents and pupils that,
- (a) explains the function of a committee on a referral under Part IV and on a review under Part V;
 - (b) outlines the procedures set out in this Regulation or established under section 12 that a committee must follow in identifying a pupil as exceptional and in deciding the pupil's placement;
 - (c) explains the committee's duty to describe pupils' strengths and needs and to include, in its statements of decision, the categories and definitions of any exceptionalities it identifies;
 - (d) explains the function of a special education appeal board under Part VI and the right of parents to appeal committee decisions to it;
 - (e) lists the parent organizations that are, to the best of the board's knowledge, local associations of the board, within the meaning of Ontario Regulation 464/97;
 - (f) includes the names, addresses and telephone numbers of the provincial and demonstration schools in Ontario;
 - (g) indicates the extent to which the board provides special education programs and special education services and the extent to which it purchases those programs and services from another board;

* Ontario Regulation 137/01, which was filed on May 2, 2001, amends the phrase "within 30 days", which appears in subsections 6(8) and 7(7) of Ontario Regulation 181/98, to "within 30 school days". (There are no other amendments to Regulation 181/98.)

- (h) explains that no committee placement decision can be implemented unless,
 - (i) a parent has consented to the decision, or
 - (ii) the time limit for filing a notice of appeal in respect of the decision has expired and no such notice has been filed.

(2) The board shall ensure that copies of the guide are available at each school in the board's jurisdiction and at the board's head office and shall provide a copy to the appropriate district office of the Ministry.

(3) The board shall, at the request of a parent or pupil, provide the parent or pupil with a guide in a braille, large print or audio-cassette format.

Part IV. Referral of Pupils to Committees

- 14.** (1) The principal of the school at which a pupil is enrolled,
 - (a) may on written notice to a parent of the pupil; and
 - (b) shall at the written request of a parent of the pupil,refer the pupil to a committee established by the board, for a decision as to whether the pupil should be identified as an exceptional pupil and, if so, what the placement of the pupil should be.
- (2) Where a decision is made that a pupil is to leave a demonstration school and enter a school of a board, the superintendent of the demonstration school shall so notify the designated representative of the board.
- (3) On receiving the notice under subsection (2), the designated representative of the board shall ensure that the pupil is referred to a committee established by the board, for a decision as to what the placement of the pupil should be.
- (4) The superintendent of the demonstration school acting under subsection (2) and the designated representative of the board acting under subsection (3) shall use their best efforts to ensure that the committee meets as soon as possible after the decision is made to move the pupil from the demonstration school to the school of the board.
- (5) Where more than one committee has been established by the board, the referral under subsection (1) or (3) shall be to the committee that the principal or the designated representative, as the case may be, considers to be the most appropriate for the pupil, having regard to the jurisdiction of the committees.

- (6) Within 15 days of giving a notice under clause (1) (a) or receiving a request under clause (1) (b), the principal shall provide the parent with,
 - (a) a copy of the guide prepared under section 13;
 - (b) a written statement of approximately when the principal expects that a committee will meet for the first time to discuss the pupil; and
 - (c) in the case of a request under clause (1) (b), a written acknowledgement of the request.
- (7) Within 15 days of receiving a notification under subsection (2), the designated representative shall provide the parent with,
 - (a) a copy of the notification under subsection (2);
 - (b) a copy of the guide prepared under section 13; and
 - (c) a written statement of approximately when the designated representative expects that a committee will meet for the first time to discuss the pupil.

- 15.** (1) A committee that has received a referral under section 14 shall obtain and consider an educational assessment of the pupil.
- (2) Subject to the *Health Care Consent Act, 1996*, the committee shall also obtain and consider a health assessment of the pupil by a qualified medical practitioner if the committee determines that the assessment is required to enable it to make a correct identification or placement decision.
- (3) Subject to the *Health Care Consent Act, 1996*, the committee shall also obtain and consider a psychological assessment of the pupil if the committee determines that the assessment is required to enable it to make a correct identification or placement decision.
- (4) Where the committee determines that it would be useful to do so and the pupil is less than 16 years of age, the committee shall, with the consent of a parent, interview the pupil.
- (5) A parent of the pupil has a right to be present at the interview.
- (6) The committee shall also consider any information about the pupil submitted to it by a parent of the pupil and, where the pupil is 16 years of age or older, the pupil.
- (7) In addition to complying with this section, the committee shall consider any information submitted to it that it considers relevant.

- (8) As soon as possible after the chair of the committee obtains any information relating to the pupil, the chair shall provide the information to,
- (a) a parent of the pupil; and
 - (b) the pupil, where the pupil is 16 years of age or older.
- (9) Subsection (8) does not apply to oral information submitted at a meeting that the committee holds in respect of the pupil in accordance with this Regulation.
- 16.** (1) The committee may discuss any proposal for special education services or special education programs and shall do so at the request of a parent or a pupil who is 16 years of age or older.
- (2) The committee may make recommendations regarding special education programs and special education services.
- (3) The committee may recommend that an exceptional pupil who is 21 years of age or older remain in a secondary day school program.
- (4) Despite subsections (1) to (3), the committee shall not make decisions about special education services or special education programs.
- (5) Despite subsection (4), a recommendation of a committee under subsection (3) is effective for the purposes of subsection 49.2 (7) of the Act.
- (6) A recommendation under this section is not a decision for the purposes of subsection 26 (1).
- 17.** (1) When making a placement decision on a referral under section 14, the committee shall, before considering the option of placement in a special education class, consider whether placement in a regular class, with appropriate special education services,
- (a) would meet the pupil's needs; and
 - (b) is consistent with parental preferences.
- (2) If, after considering all of the information obtained by it or submitted to it under section 15 that it considers relevant, the committee is satisfied that placement in a regular class would meet the pupil's needs and is consistent with parental preferences, the committee shall decide in favour of placement in a regular class.
- 18.** (1) As soon as possible after making its decisions on a referral under section 14, the chair of the committee shall send a written statement of decision to,
- (a) a parent of the pupil;
 - (b) the pupil, where the pupil is 16 years of age or older;
- (c) the principal who made the referral, where the referral was made by a principal; and
 - (d) the designated representative of the board that established the committee.
- (2) In the case of a referral by a principal under subsection 14 (1), the statement of decision shall,
- (a) state whether the committee has identified the pupil as an exceptional pupil;
 - (b) where the committee has identified the pupil as an exceptional pupil, include,
 - (i) the committee's description of the pupil's strengths and needs,
 - (ii) the categories and definitions of any exceptionalities identified by the committee,
 - (iii) the committee's placement decision, and
 - (iv) the committee's recommendation under subsection 16 (2), if any; and
 - (c) where the committee has decided that the pupil should be placed in a special education class, state the reasons for that decision.
- (3) In the case of a referral by a designated representative under subsection 14 (3), the statement of decision shall,
- (a) include,
 - (i) the committee's description of the pupil's strengths and needs,
 - (ii) the categories and definitions of any exceptionalities identified by the committee,
 - (iii) the committee's placement decision, and
 - (iv) the committee's recommendation under subsection 16 (2), if any; and
 - (b) where the committee has decided that the pupil should be placed in a special education class, state the reasons for that decision.
- 19.** (1) A parent who receives a statement of decision under section 18 may, by written notice delivered to the person specified in subsection (2) within 15 days of receipt of the statement of decision, request a meeting with the committee.
- (2) The notice under subsection (1) shall be delivered to the principal in the case of a referral under subsection 14 (1) and to the designated representative in the case of a referral under subsection 14 (3).
- (3) On receiving the request, the principal or designated representative, as the case may be, shall arrange for the committee to meet as soon as possible with the parent and, where the pupil is 16 years of age or older and wishes to attend, the pupil, to discuss the statement of decision.

(4) As soon as possible following a meeting under this section, the chair of the committee shall send a written notice to each of the persons described in subsection 18 (1), stating whether any changes in its decisions were made as a result of the meeting.

(5) If changes in the committee's decisions were made as a result of the meeting, the notice under subsection (4) shall be accompanied by a revised statement of decision, together with written reasons for the changes.

20. (1) A board shall implement a placement decision made by a committee under this Part when one of the following two events occurs:

1. A parent of the pupil consents in writing to the placement.
2. The time period provided in subsection 26 (2) for filing a notice of appeal from the decision expires without a notice of appeal being filed.

(2) The board shall implement a placement decision made by a committee under this Part as soon as possible after an event described in paragraph 1 or 2 of subsection (1) occurs.

(3) A board that, without the written consent of a parent of the pupil, implements a placement decision made by a committee under this Part shall give written notice of the implementation to a parent of the pupil.

Part V. Committee Reviews

21. (1) The principal of the school at which a pupil's special education program is being provided,

- (a) may on written notice to a parent of the pupil;
- (b) shall at the written request of a parent of the pupil; and
- (c) shall, at the written request of the designated representative of the board that is providing the special education program to the pupil,

refer the pupil to a committee established by the board that is providing the special education program to the pupil, for a review of the identification or placement of the pupil.

(2) A request by a parent under clause (1) (b) may be made at any time after a placement has been in effect for three months but may not be made more often than once in every three month period.

(3) Subject to subsection (4), the designated representative shall make a request under clause (1) (c) when in his or her opinion it is necessary to do so in order to ensure that a review in respect of the pupil is held under this Part at least once in each school year.

(4) Subsection (3) does not apply where,

- (a) a committee proceeding with respect to the pupil was held under Part IV during the school year; or
- (b) a parent of the pupil gives a written notice dispensing with the annual review to the principal of the school at which the special education program is being provided.

(5) Within 15 days of giving a notice under clause (1) (a) or receiving a request under clause (1) (b) or (c), the principal shall provide the parent with a written statement of the approximate time when the review meeting will take place.

22. (1) Where more than one committee has been established by a board, the principal of the school at which the special education program is provided shall determine which of the committees is most appropriate for the pupil, having regard to the jurisdiction of the committees.

(2) Where one board purchases a special education program from another board, the board that is providing the special education program to the pupil shall invite the purchasing board to select a representative who may,

- (a) be present at and participate in all committee discussions about the pupil; and
- (b) be present when the committee's identification and placement decisions are made.

23. (1) Sections 15 and 16 apply with necessary modifications to a committee engaged in a review under this Part.

(2) With the written permission of a parent of the pupil, a committee conducting a review under this Part shall consider the pupil's progress with reference to the pupil's individual education plan.

(3) As soon as possible after a committee engaged in a review under this Part decides that it is satisfied with the identification and placement of a pupil, the chair of the committee shall send a written statement of decision confirming the identification and placement to,

- (a) a parent of the pupil;
- (b) the pupil, where the pupil is 16 years of age or older;
- (c) the principal of the school at which the pupil's special education program is being provided;

- (d) the designated representative of the board that is providing the special education program to the pupil; and
- (e) in the circumstances described in subsection 22 (2), the designated representative of the board that is purchasing the special education program.

(4) As soon as possible after a committee engaged in a review under this Part decides that the identification or placement or both should be changed, the chair of the committee shall send a written statement of decision to the persons described in subsection (3).

(5) A statement of decision under subsection (4) shall state,

- (a) the reasons for the committee's decision that the pupil's identification or placement or both should be changed;
- (b) whether the committee considers that the pupil should continue to be identified as an exceptional pupil;
- (c) where the committee considers that the pupil should continue to be identified as an exceptional pupil,
 - (i) the committee's placement decision,
 - (ii) the committee's description of the pupil's strengths and needs, and
 - (iii) the categories and definitions of any exceptionalities identified by the committee; and
- (d) where the committee considers that the pupil should be placed in a special education class, the reasons for that decision.

(6) Section 17 applies with necessary modifications where a committee is considering the option of placing a pupil in a special education class and the pupil is not already in such a placement.

24. (1) A parent who receives a confirmation under subsection 23 (3) or a statement of decision under subsection 23 (4) may request a meeting with the committee by written notice, delivered within 15 days of receiving the confirmation or statement of decision, to the principal of the school at which the pupil's special education program is being provided.

(2) On receiving the request for a meeting, the principal shall arrange for the committee to meet as soon as possible with the parent and, where the pupil is 16 years of age or older and wishes to attend, the pupil, to discuss the statement of decision.

(3) As soon as possible following a meeting under this section, the chair of the committee shall send a written notice to each of the persons described in subsection 23 (3), stating whether any changes in its decisions were made as a result of the meeting.

(4) If changes in the committee's decisions were made as a result of the meeting, the notice under subsection (3) shall be accompanied by a revised statement of decision, together with written reasons for the changes.

25. (1) A board shall implement a change in placement as a result of a decision made by a committee under this Part when one of the following two events occurs:

- 1. A parent of the pupil consents in writing to the placement.
- 2. The time period provided in subsection 26 (3) for filing a notice of appeal from the decision expires without a notice of appeal being filed.

(2) The board shall implement a change in placement as a result of a decision made by a committee under this Part as soon as possible after an event described in paragraph 1 or 2 of subsection (1) occurs.

(3) A board that, without the written consent of a parent of the pupil, implements a change in placement as a result of a decision made by a committee under this Part shall give written notice of the implementation to a parent of the pupil.

Part VI. Appeals from Committee Decisions

26. (1) A parent of a pupil may, by filing a notice of appeal in accordance with subsection (2) or (3), require a hearing by a special education appeal board in respect of,

- (a) a committee decision under Part IV or V that the pupil is an exceptional pupil;
- (b) a committee decision under Part IV or V that the pupil is not an exceptional pupil; or
- (c) a committee decision under Part IV or V on placement of the pupil.

(2) A notice of appeal in respect of a committee decision under Part IV shall be filed with the secretary of the board,

- (a) if no meeting is held under section 19, within 30 days of receipt of the statement of decision under section 18 by the parent who is seeking to appeal; or
- (b) if a meeting is held under section 19, within 15 days of receipt of the notice under subsection 19 (4) by the parent who is seeking to appeal.

(3) A notice of appeal in respect of a committee decision under Part V shall be filed with the secretary of the board,

(a) if no meeting is held under section 24, within 30 days of receipt of the confirmation under subsection 23 (3) or the statement of decision under subsection 23 (4) by the parent who is seeking to appeal; or

(b) if a meeting is held under section 24, within 15 days of receipt of the notice under subsection 24 (3) by the parent who is seeking to appeal.

(4) A notice of appeal shall indicate which of the decisions referred to in subsection (1) the parent disagrees with and shall include a statement that sets out the nature of the disagreement.

(5) The special education appeal board shall not reject or refuse to deal with an appeal by reason of any actual or alleged deficiency in the statement referred to in subsection (4) or by reason of the failure of the parent, in the opinion of the special education appeal board, to accurately indicate in the notice of appeal the subject of the disagreement.

27. (1) The special education appeal board shall be composed of,

(a) one member selected by the board in which the pupil is placed;

(b) one member selected by a parent of the pupil; and

(c) a chair, selected jointly by the members selected under clauses (a) and (b) or, where those members cannot agree, by the appropriate district manager of the Ministry.

(2) Selections under clauses (1) (a) and (b) shall be made within 15 days of receipt of the notice of appeal by the secretary of the board.

(3) The selection of a chair under clause (1) (c) shall be made within 15 days of the last selection under clauses (1) (a) and (b).

(4) No member or employee of the board providing or purchasing the special education program and no employee of the Ministry may be selected under subsection (1).

(5) No person who has had any prior involvement with the matter under appeal may be selected under subsection (1).

(6) The chair of the committee the decision of which is being appealed shall provide the special education appeal board with the record of the committee proceeding, including the statement of decision and any reports, assessments or other documents considered by the committee.

(7) The board shall provide the special education appeal board with the secretarial and administrative services it requires and shall, in accordance with the rules and policies that apply to members of the board under section 191.2 of the Act, pay the travelling and other expenses incurred by the members of the special education appeal board while engaged in their duties.

28. (1) The chair of the special education appeal board shall arrange for a meeting of the members of the special education appeal board to discuss the matters under appeal and shall give notice of the meeting, in accordance with subsection 5 (5), to a parent of the pupil and, where the pupil is 16 years of age or older, the pupil.

(2) The meeting shall be arranged to take place at a convenient place and at a time that is no more than 30 days after the day on which the chair is selected and shall be conducted in an informal manner.

(3) Despite subsection (2), with the written consent of the parents of the pupil and the designated representative of the board, the meeting may be scheduled for a time that is more than 30 days after the day on which the chair is selected.

(4) Any person who in the opinion of the chair of the special education appeal board may be able to contribute information with respect to the matters under appeal shall be invited to attend the meeting.

(5) Where the pupil's special education program is being purchased by one board from another board, the chair shall invite the purchasing board to select a representative who may be present at and participate in all discussions about the pupil at the meeting held by the special education appeal board under section 28.

(6) Where the special education appeal board is satisfied that the opinions, views and information that bear on the appeal have been sufficiently presented to it, the special education appeal board shall end the meeting and, within three days of ending the meeting, shall,

(a) agree with the committee and recommend that its decisions be implemented; or

(b) disagree with the committee and make a recommendation to the board about the pupil's identification, placement or both.

29. (1) The special education appeal board shall send a written statement of its recommendations under section 28 to,

(a) a parent of the pupil;

(b) where the pupil is 16 years of age or older, the pupil;

- (c) the chair of the committee;
- (d) the principal of the school in which the pupil is placed;
- (e) the designated representative of the board in which the pupil is placed; and
- (f) in the circumstances described in subsection 28 (5), the designated representative of the board that is purchasing the special education program.

(2) The written statement shall be accompanied by written reasons for the recommendations.

30. (1) Within 30 days of receiving the special education appeal board's written statement, the board shall consider the special education appeal board's recommendations, shall decide what action to take with respect to the pupil and shall give notice in writing of the decision to each of the persons described in subsection 29 (1).

(2) In deciding what action to take with respect to a pupil, the board is not limited to the actions that the special education appeal board recommended or could have recommended.

(3) Notice to a parent under subsection (1) shall include an explanation of the further right of appeal provided by section 57 of the Act.

31. (1) The board shall implement a decision under subsection 30 (1) when one of the following events occurs:

1. A parent of the pupil consents in writing to the decision.
2. Thirty days have elapsed from receipt of the notice under subsection 30 (1) by a parent of the pupil and no appeal has been commenced in respect of the decision under section 57 of the Act.
3. An appeal under section 57 of the Act from the decision is dismissed or abandoned.

(2) In accordance with an agreement between the board and a parent of the pupil, the board may change a decision made by it under section 30,

- (a) while an appeal under section 57 of the Act is pending; or
- (b) before the end of the period referred to in paragraph 2 of subsection (1).

(3) Where the board changes a decision under subsection (2), the board shall give notice in writing of the change in decision to each of the persons described in subsection 29 (1).

(4) Subsections 30 (2) and (3) apply with necessary modifications in respect of a change in decision under subsection (2).

Part VII. Transitional Provisions

Interpretation

32. In this Part,

"old regulation" means Regulation 305 of the Revised Regulation of Ontario, 1990.

Committees Established Before September 1, 1998

33. (1) Where a matter was referred to a committee under section 2 of the old Regulation, the matter shall be dealt with on and after September 1, 1998 as if it had been referred to a committee under Part IV of this Regulation and, for the purpose, the provisions of this Regulation apply to the committee proceeding and to all related proceedings, including appeals, with appropriate modifications.

(2) Where a matter was referred to a committee under section 8 of the old Regulation, the matter shall be dealt with on and after September 1, 1998 as if it had been referred to a committee under Part V of this Regulation and, for the purpose, the provisions of this Regulation apply to the committee proceeding and to all related proceedings, including appeals, with appropriate modifications.

(3) The modifications required by subsections (1) and (2) are such modifications as the person or body exercising a power or meeting a requirement under this Regulation considers appropriate having regard to the stage to which the matter has proceeded.

Parents' Guide

34. Until December 31, 1998, a board may meet the requirements of subsection 13 (2) and clauses 14 (6) (a) and 14 (7) (b) using copies of a guide prepared under section 2 of the old regulation.

Individual Education Plans

35. Subsections 7 (2) to (7) apply with necessary modifications if, as a result of a decision of a committee, a special education appeal board or the Special Education Tribunal,

- (a) an existing placement of an exceptional pupil who does not yet have an individual education plan is confirmed; or
- (b) a board implements a change in placement of an exceptional pupil who does not yet have an individual education plan.

Appeals Filed Before September 1, 1998

36. (1) This section applies if a notice of appeal is given under section 4 of the old regulation before September 1, 1998 but the appeal is not finally determined before that date.

(2) If three people are appointed before September 1, 1998 under section 7 of the old regulation to form an appeal board to hear the appeal, the appeal shall be held in accordance with the old regulation as it read immediately before it was revoked.

(3) If three people are not appointed before September 1, 1998 under section 7 of the old regulation to form an appeal board to hear the appeal, the appeal shall be held in accordance with this Regulation.

- (4) For the purposes of subsection (3),
- (a) the notice given under section 4 of the old regulation shall be deemed to be a notice properly given under section 26 of this Regulation; and
 - (b) selections under clauses 27 (1) (a) and (b) shall be made on or before September 15, 1998 rather than within the times specified in subsections 27 (2) and (3).

37. (1) This section applies where an appeal is held in accordance with the old regulation as a result of the application of subsection 36 (2) of this Regulation.

(2) If the board receives the report of the appeal decision under subsection 7 (10) of the old regulation before September 1, 1998, subsection 7 (11) of the old regulation applies as it read immediately before it was revoked.

(3) If the board does not receive the report of the appeal decision under subsection 7 (10) of the old regulation before September 1, 1998, sections 30 and 31 of this Regulation apply as if the report of the appeal decision given under subsection 7 (10) of the old regulation were a statement given under section 29 of this Regulation.

Part VIII. Revocation

38. Regulation 305 of the Revised Regulations of Ontario, 1990 and Ontario Regulation 663/91 are revoked.

Part IX. Commencement

39. (1) This Regulation, except subsection 13 (3), comes into force on September 1, 1998.

(2) Subsection 13 (3) comes into force on January 1, 1999.

Ontario Regulation 464/97
made under the Education Act
Filed: December 11, 1997

Special Education Advisory Committees

1. In this Regulation,
“local association” means an association or organization of parents that operates locally within the area of jurisdiction of a board and that is affiliated with an association or organization that is not an association or organization of professional educators but that is incorporated and operates throughout Ontario to further the interests and well-being of one or more groups of exceptional children or adults.
2. (1) Every district school board shall establish a special education advisory committee that shall consist of,
 - (a) subject to subsections (2) and (3), one representative from each of the local associations that operates locally within the area of jurisdiction of the board, as nominated by the local association and appointed by the board;
 - (b) one alternate for each representative appointed under clause (a), as nominated by the local association and appointed by the board;
 - (c) such number of members from among the board’s own members as is determined under subsection (4), as appointed by the board;
 - (d) where the number of members appointed under clause (c) is less than three, one alternate, as appointed by the board from among its own members, for each member appointed under clause (c);
 - (e) one or two persons to represent the interests of Indian pupils, as provided by section 4; and
 - (f) one or more additional members appointed under subsection (5).
 - (2) The board shall not appoint more than 12 representatives under clause (1) (a).
 - (3) Where there are more than 12 local associations within the area of jurisdiction of the board, the board shall select the 12 local associations that shall be represented.
 - (4) The number to be appointed by the board under clause (1) (c) shall be the lesser of,
 - (a) three; and
 - (b) 25 per cent of the total number of members of the board, rounded down to the nearest whole number.
 - (5) For the purposes of clause (1) (f), the board may appoint one or more additional members who are neither representatives of a local association nor members of the board or another committee of the board.
3. (1) Every school authority, other than a board established under section 68 of the Act, shall establish a special education advisory committee that shall consist of,
 - (a) two representatives from the local associations that operate locally within the area of jurisdiction of the board, as nominated by the local associations and appointed by the board;
 - (b) one alternate for each representative appointed under clause (a), as nominated by the local associations and appointed by the board;
 - (c) one member from among the board’s own members, as appointed by the board;
 - (d) one alternate, as appointed by the board from among its own members, for the member appointed under clause (c); and
 - (e) one or two persons to represent the interests of Indian pupils, as provided by section 4.
 - (2) Where no local association or associations have been established, instead of the members and alternates required by clauses (1) (a) and (b), the board shall appoint two members and two alternates who are not members of the board.
4. (1) Where a board has one member appointed in accordance with a regulation made under section 188 of the Act, the special education advisory committee shall include one person appointed to represent the interests of Indian pupils.
 - (2) Where a board has more than one member appointed in accordance with a regulation made under section 188 of the Act, the special education advisory committee shall include two persons appointed to represent the interests of Indian pupils.
 - (3) One alternate shall be appointed for each person appointed in accordance with subsection (1) or (2).
 - (4) The representatives and alternates shall be nominated by the councils of the bands with

which the board has entered into agreements under section 188 of the Act.

(5) The board shall appoint the persons nominated under subsection (4).

5. (1) A person is not qualified to be nominated or appointed under section 2 or 3 to a special education advisory committee of a board unless the person is qualified to vote for members of that board and is resident in its area of jurisdiction.
(2) Subsection (1) does not apply in respect of persons appointed under section 4.
(3) A person is not qualified to be nominated or appointed under section 2, 3 or 4 if the person is employed by the board.
6. Subject to section 7, each of the persons appointed to a special education advisory committee of a board shall hold office during the term of office of the members of the board and until a new board is organized.
7. (1) A member of a special education advisory committee vacates his or her seat if he or she,
 - (a) is convicted of an indictable offence;
 - (b) absents himself or herself without being authorized by resolution entered in the minutes from three consecutive regular meetings of the committee; or
 - (c) ceases to hold the qualifications to be appointed to the committee.(2) An alternate for a member of a special education advisory committee vacates his or her position if he or she,
 - (a) is convicted of an indictable offence;
 - (b) absents himself or herself without being authorized by resolution entered in the minutes from three consecutive regular meetings of the committee in respect of which the alternate received a notice under subsection 9 (9); or
 - (c) ceases to hold the qualifications to be appointed as an alternate.(3) Where a seat or position becomes vacant under this section, section 8 applies with respect to filling the vacancy.
(4) Despite subsection (3), where a member of the committee or an alternate for a member of a committee is convicted of an indictable offence, the vacancy or position shall not be filled until the time for taking any appeal that may be taken from the conviction has elapsed, or until the final determination of any appeal so taken, and in the event of the quashing of the conviction the seat or position shall be deemed not to have been vacated.
8. (1) If a seat or position on a special education advisory committee becomes vacant, the board that appointed the person whose seat or position has become vacant shall appoint a qualified person to fill the vacancy for the remainder of the term of the person whose seat or position has become vacant.
(2) The nomination requirements of sections 2, 3 and 4 apply with respect to appointments under this section.
(3) Where a seat of a member of the committee is vacant and has not yet been filled, the alternate for the member, if there is an alternate, shall act in the member's place for all purposes of this Regulation.
9. (1) A majority of the members of a special education advisory committee is a quorum, and a vote of a majority of the members present at a meeting is necessary to bind the committee.
(2) Every member present at a meeting, or his or her alternate when attending the meeting in his or her place, is entitled to one vote.
(3) The members of the committee shall, at their first meeting, elect one of their members as chair and one of their members as vice-chair.
(4) The vice-chair shall assist the chair and shall act for the chair at meetings in his or her absence.
(5) The chair or, in the absence of the chair, the vice-chair, shall preside at meetings.
(6) If at any meeting the chair and vice-chair are not present, the members present may elect a chair for that meeting.
(7) The chair may vote with the other members of the committee and any motion on which there is an equality of votes is lost.
(8) The committee shall meet at least 10 times in each school year.
(9) Where a member for whom an alternate has been appointed cannot attend a meeting of the committee, the member shall so notify the alternate.
(10) Where an alternate receives a notice under subsection (9), he or she shall attend the meeting and act at the meeting in the member's place.
10. (1) The board shall make available to its special education advisory committee the personnel and facilities that the board considers necessary for the proper functioning of the committee, including the personnel and facilities that the board considers necessary to permit the use of electronic

means for the holding of meetings of the committee in accordance with the regulations made under section 208.1 of the Act.

(2) Within a reasonable time after a special education advisory committee is appointed, the board shall provide the members of the committee and their alternates with information and orientation respecting,

- (a) the role of the committee and of the board in relation to special education; and
- (b) Ministry and board policies relating to special education.

11. (1) A special education advisory committee of a board may make recommendations to the board in respect of any matter affecting the establishment, development and delivery of special education programs and services for exceptional pupils of the board.

(2) Before making a decision on a recommendation of the committee, the board shall provide an opportunity for the committee to be heard before the board and before any other committee of the board to which the recommendation is referred.

12. (1) The board shall ensure that its special education advisory committee is provided with the opportunity to participate in the board's annual review, under Regulation 306 of the Revised Regulations of Ontario, 1990, of its special education plan.

(2) The board shall ensure that its special education advisory committee is provided with the opportunity to participate in the board's annual budget process under section 231 of the Act, as that process relates to special education.

(3) The board shall ensure that its special education advisory committee is provided with the opportunity to review the financial statements of the board, prepared under section 252 of the Act, as those statements relate to special education.
